

2025

Veseys Seeds

Commercial Growers Guide

*Sweet & crisp or hot & spicy.
Over 20 pepper varieties
for the professional grower.
(see pages 44-46)*

Dear Fellow Gardeners,

As always, we are excited to present our newest seed catalogue containing not only the tried-and-true varieties you've come to love over the years but also some of the newest, best producing varieties we've been able to discover through our extensive field trial efforts and visits to test gardens at home and abroad.

Entering our 86th year we are finally reaching a point where Covid related

influences on supply and transportation have settled down to a more normal cost of doing business. With that in mind we are pleased to share some rather major price reductions on such items as light gardens and greenhouses. As well, for the third year running, we are pleased to hold the line on our shipping and handling rates. We've listened to your comments on the costs of shipping, and we will continue to absorb much of these costs. In fact, you may not be aware that Vesey's absorbs 25% of your shipping costs in order to keep your rates at an affordable level; that is to say you only pay 75% of the postage cost we incur.

As was established by Arthur Vesey in the beginning days of our company, our family stands behind Arthur's pledge to offer outstanding customer service, excellent product quality and a commitment to assist you in any way we can. We are honoured by the trust and faith that you have in our firm and look forward to serving you with all your gardening needs once again in 2025.

We are very pleased to offer quite a number of new introductions throughout this year's catalogue as we strive to provide you with the best and brightest selections that have shown proven results in our trials and throughout our test garden visits.

A few of these are featured on the next two pages and all are highlighted throughout the publication with our NEW designation symbol.

In the meantime, we wish you well with all your gardening endeavours and encourage you to keep sending us letters, emails and photos of all you have accomplished with our products.

Gerry Simpson, President

Vesey's Seeds

Something new has been added!

As we are fully aware of the importance in reducing our company's carbon footprint, we have added a new feature to certain sections of our catalogue this year. To decrease the number of printed pages, we have decided to display the attachments and accessories for certain items on our

web site. The sections we have chosen to provide you with this new feature are greenhouse accessories (page 104), light garden bulbs & accessories (page 106), Mantis tiller attachments & accessories (page 119), additional plant supports (page 126), irrigation parts (page 128) and our full line of gardening gloves (page 139). On any page that this occurs you will see a QR code and explanation. Simply scan the QR code and this technology will take you directly to what you're looking for.

Shipping Rates

Our Shipping & Handling rates are for Canada Post Expedited parcel service. Due to Vesey's large volume with Canada Post we are able to provide shipping rates that are far below what you as a consumer would incur if shipping the same parcel through your local Canada Post Retail Outlet. If you live in an area served by Canada Post Air, please call our customer service department for a freight quote. **1-800-363-7333.**

Additional Freight

You will notice that in addition to the selling price and our standard shipping & handling rates (outlined on the order form), certain items in this catalogue carry an additional charge referred to as "Additional Freight". There are a variety of reasons as to why certain items may require this additional charge. For some items that are light in weight but take up a large shipping carton, these items are 'cubed' by Canada Post as the potential weight of what could be in the carton is charged to Vesey's Seeds. For items longer than one meter, an oversize charge is also levied by Canada Post due to the space the carton occupies in their transportation vehicles. For larger items such as greenhouse, light gardens, and wheelbarrows, these items are often shipped by transport companies and in some cases, they contain more than one shipping carton. In all instances, Vesey's Seeds Ltd. attempts to provide you with the most economical cost when shipping your purchases to you.

Gift Certificates

Give the gift that grows! Our gift certificates make ideal gifts for Christmas, Mother's Day, Father's Day, birthdays or any other special event. Available in any amount, they're the perfect choice for the gardeners on your gift-giving list. When ordering, please indicate if you wish the Gift Certificate to be sent to the recipient (along with a current catalogue and greeting card), or returned to you. **Item # GIFT-CDN**

Vesey's Bulbs

As you will also receive both our Spring planting and Fall planting Bulb Catalogues throughout the year, we wish to clarify that any special offers that may be contained in those catalogues only apply to those specific catalogues. Combined orders from this catalogue with either of the bulb catalogues will be separated by our order entry staff and the appropriate shipping & handling charges, along with any discounts offered, will be assigned. We strongly suggest that if ordering from more than one catalogue or category (in the case of bulbs), that you submit two separate orders either online or when using our printed order form.

New Selections for 2025

Voltage Yellow Bean #11445
The best of qualities in one variety. Voltage has shown itself to be a top competitor in the wax bean segment. The best qualities mixed into one variety, Voltage has rugged plant vigour, consistent 5.5" pods, and yield very well, even when spaced slightly closer together. Growing well in both wet and dry seasons, and with a strong disease tolerance package, Voltage is sure to find its way to a dinner plate near you. Matures in 60-65 days.

Dominator Organic Green Bean #40304
Strong plants and large beans. Dominator is the perfect bean for both eating fresh or cutting to freeze. Pods grow 6-6.5" and are smooth, with a lighter green colour. Plants set pods high making harvest easier. The best quality of Dominator is its ability to perform in soils that are less than ideal. Matures in 55-60 days.

Zeppo RZ Beet #12002
Baby or full size. Zeppo is the perfect beet for bunching. The roots are incredibly uniform, nearly hairless, and tops are short and strong. Zeppo creates the perfect opportunity for pickling and fresh beets in the same variety! 40-45 days for baby, 50-55 days for full size. Approx. 500 sds/pkg.

Flexima RZ Cabbage #12242
Perfect for personal or full-size production! Flexima, with its adaptable growing size, is perfect for personal use or grown to a larger size for processing or large batches of sauerkraut! Heads are very dense with a short to medium core weighing 3-9 lb. Matures in 115-125 days from transplant. Approx. 100 sds/pkg.

Bangor Organic Carrot #40532
Extra-large with great storage. This high yielding and long storage type of carrot is like Nantes types but is slightly bigger at 7-9", perfect for juicing or slice and dice market. Matures in 80-85 days. Pelleted seed.

Awaken Sh2 Bi-colour Corn #13228
The season awakes with this corn! Awaken is an early, bicolour type with good tip fill and great husk protection. Ears are constantly 8" long and produce 14-16 rows of sugary kernels. Matures in 65-70 days.

Convoy Cucumber #14170
Impressive yields. Convoy, while producing a vigorous vine, was one of the best yielding American slicer types in our field trials. Convoy lasted longer and continued to produce more new growth later into the season when other plants were slowing down. Be prepared for plentiful, dark green, 8" fruit! Matures in 40-45 days from transplant. Approx. 50 sds/pkg.

Tropical Sunshine RZ Watermelon #15735
Sweetness that'll sweep you away! Tropical Sunrise is a high-sugar-content watermelon with lovely yellow flesh! The 11-13 lb., seedless fruit are sure to be a hit at any picnic or roadside stand. Matures in 80-85 days from transplant. Approx. 5 sds/pkg plus pollinator.

M-14 Organic Pea #40704
Strong yielding. M-14 is a main season shelling pea with great yield potential. 3" pods can be found in groups of 2-3 per node and each filled with 8 peas. Pods are light green in colour with a blue/green foliage making harvest a breeze. Matures in 55-60 days.

Hortiwool Garden Pad #89338

Our 100% British Wool Garden Pad is compostable, biodegradable, a protector and a natural insulator. Wrap around your plants for frost protection, kneel on it when weeding, break it up or wrap your plants for protection from slugs & snails. Also, a perfect liner for hanging baskets, hydration as a growing medium & capillary matting, nutrition for root balls and even serves as nesting material for wildlife. This all-natural product is an extraordinary garden companion. Each pad measures 250 x 600mm.

Weedcomb Weeder/Cultivator #89327

Constructed with alloy steel, the Weedcomb weeder/cultivator is built to last, ensuring durability and long-lasting use with its extremely comfortable grip. Featuring an ergonomic handle with a rubber grip, this handheld rake literally combs out the weeds and provides a secure grip which reduces hand fatigue. The unique design of the Weedcomb helps to easily and effectively remove weeds in a wide range of sizes and thicknesses, making yard work less of a chore.

Hanging Bags & Saddlebags #89328

Our canvas Hanging Bags & Saddlebags are made from 65% jute and 35% cotton. The material and construction ensure that you can get many, many years of use from these planters unlike the plastic versions you may see in stores. The 1"-hole versions are for sowing seeds directly in bag, or small root plants like strawberries). The 2"-hole versions are better suited for plugs and larger bareroot plants. Our hanging bags (55 cm x 23.5cm), hold 5.7 liters of soil while our Saddlebags (73.6cm x 20.3cm), hold 7.5 liters of soil.

Flavourburst Organic Pepper #40123
Bursting with colour and flavour!

Flavourburst was a standout bell pepper in our trials for its vigour and production into cooler temperatures. 3 lobed Fruit start out lime green but mature into 3-4" elongated bells, turning to deep yellow with hints of orange. Flavour was consistently a favourite of employees. Matures in 65-70 days for green, 85-90 days for yellow. Approx 10 sds/pkg.

Vendetta Pie Pumpkin #17723
High yielding pie.

Vendetta is a wonderful vining, pie type. Fruit weigh 3-5 lb, plentiful, and have a strong handle. A nice pie or tart awaits this dark orange pumpkin! Matures in 100-105 days from transplant. Approx. 15 sds/pkg.

Spellcast Butternut Squash #18755
Something different!

Spellcast is a new butternut hybrid squash. Internal flesh resembles that of a butternut, perfect for soups. While great tasting, Spellcast is perfect for decorating. Its flat top and bottom allow for easy stacking on the front deck until ready to consume. Plants are highly productive. Approx. 15 sds/pkg.

Toto Mix Rudbeckia #27595

Toto series is early flowering and because of its compact height, can be grown in pots or utilized as a walking path border. 2" flowers are settled on stems reaching 14", making for great cut flowers. Toto Mix includes a light yellow, dark yellow, and two-toned variety of dark yellow and light burgundy. Zone 4-8. Approx. 20 sds/pkg.

Blueberry Cheesecake Zinnia #25474

Feast your eyes on the Dessert Series! Striking contrasts of flowers make great accent pieces for doors and shutters and make invigorating summer bouquets. Trials staff were reminded of freshly baked pies and cheesecake with these spot-on colour ranges. Grows 30-40" tall. Approx. 100 sds/pkg.

Black Velvet Nasturtium #23214

This mahogany colour flower creates spectacular contrast while being backdropped by light green leaves. Up close, the flowers look like velvet or wood grain, but look much darker from afar. Define walking borders or definition to accent pieces around the home. Mounding type, grows up to 12" tall. Approx. 40 sds/pkg.

Vegetable Seed

Tavor

Guelph Eclipse

Guelph Millennium

Emiko

Bopak

Feng Qing Choi

Asian Stir-Fry Mix

Tatsoi

ARTICHOKE

Enjoy artichokes as a fun-to-grow annual. This Mediterranean appetizer is delicious with many sauces or simply eaten on its own and dipped in melted butter.

Tavor Organic

#40270

No cooling period required! Artichokes are usually perennial plants in the Mediterranean, requiring the mild winters to produce harvestable buds, but Tavor has been bred to produce multiple buds during the first year of growth. When started early indoors, they will produce 6-7 firm, tight buds. This variety has been proven to yield early and grow successfully in Northern latitudes. Matures in 90-95 days. Approx. 20 sds/pkg.

ASPARAGUS

When you see the tips of this perennial vegetable poke through the soil, you know that spring is here! Asparagus is one of the first vegetables you will harvest after establishing for a few years. Whether you choose to grow it from seed or from roots, you will end up with a delicious crop to enjoy year after year!

ASPARAGUS SEED

Guelph Eclipse

#10015

One of the highest yielding hybrids! This early season, male-dominant hybrid variety is well-suited for cool climates. The spears are thicker than standard varieties and stand up well in poor weather conditions. Suitable for both fresh and main markets. Approx. 15 sds/pkg.

Guelph Millennium

#10020

Highly Productive! Guelph Millennium continues to be one of the best asparagus varieties with consistently high yields. These hardy male plants produce top quality spears ideal for both backyard gardens and commercial production. Rust tolerant. Approx. 15 sds/pkg.

ASIAN VEGETABLES

Asian vegetables and greens of this category have grown in popularity and are now found in many backyard gardens. The versatility, unique flavours, textures, and colours add to stir-fries, salads and many other dishes. Grown best in the cool temperatures of spring and late fall.

CHINESE CABBAGE

Emiko

#12265

Superior in disease resistance. Emiko is a Napa type cabbage good for summer harvest. Green savoyed wrapper leaves have a mild flavour and are excellent in stir-fry or a fresh salad. Matures in 60-65 days. Approx. 50 sds/pkg.

Emiko Organic

#40275

Certified organic seed. Approx. 50 sds/pkg.

PAK CHOI (BOK CHOY)

Bopak

#12921

Great flavour, even in warm weather. Bopak is a Pak Choi staple in Asian soup and stir-fry recipes. The tender, crisp leaves can also be eaten raw in salads. May be harvested as a baby Pak Choi as well as grown to full size. Bopak's tight, upright growth is ideal for home gardeners with limited space. Early maturity of 50-60 days. AAS winner. Approx. 100 sds/pkg.

Feng Qing Choi

#13680

Tender, dwarf Pak Choi. A delicious and tender baby Pak Choi! The first hybrid Shanghai (green petiole) Pak Choi with great heat tolerance and bolting resistance. Performs well with limited growing space. Plants hold very well leading up to harvest. Matures in 35-40 days. Approx. 250 sds/pkg.

ASIAN GREENS

Asian Stir-Fry Mix EXCLUSIVE

#15461

Hardy with a fine peppery flavour. This Vesey's exclusive is an attractive blend of greens sure to add great flavour to any stir-fry, sautés or salads with its abundance of flavours, textures and colours. It includes a variety of Asian greens, mustards and kale that will re-grow after being harvested. Ready in just 35 days for baby leaf size, 45 days for full leaf size. Approx. 400 sds/pkg.

Tatsoi

#13640

Popular and versatile. Tatsoi has thick dark green leaves that are a popular open-hearted oriental mustard. This tender flavourful green, closely related to Bok Choi, is excellent for salads, soups, and oriental-style cooking. Maturity is 45 days. Approx. 800 sds/pkg.

Jacob's Cattle

Red Kidney

Soldier

Yellow Eye

Black Turtle

Jumbo

Velero

Karikachi No.3

BAKING BEANS

Jacob's Cattle HEIRLOOM #61030
An old-fashioned Maritime favourite. Slender, kidney-shaped beans with red markings on a white shell. Superb for baking. Matures in 95-100 days.

Red Kidney #61060
High yields. A must-have for your favourite chili! This bean produces large, light-red, kidney-shaped beans. Very hardy and high yielding with distinctive flavour. Matures in 95-105 days.

Soldier HEIRLOOM #61020
Excellent flavour and early maturity. Soldier got its name from the dark maroon 'soldier' on the eye. Abundant yield of extra-long pods. Matures in 95-105 days.

Yellow Eye #61015
Early maturity. Yellow Eye produces kidney-shaped, cream white beans while hosting a light brown spot on one side of the seed. This strain of Yellow Eye, Keneary, was developed at AAFC Kentville, Nova Scotia for its early maturity. 85-95 days to maturity.

Black Turtle #61045
Top producing black bean. Black Turtles are erect, high yielding beans with excellent quality. They have good resistance to lodging, as well as Rust and Bean Common Mosaic Virus. Matures in Approx. 100 days.

BROAD/FAVA BEANS

Jumbo #61890
Versatile. Jumbo forms large pods filled with 3-5 plump beans that can be used for freezing, fresh shelled or dried. Plants are robust and should be planted early in cool conditions. Maturity in 70-80 days.

ROMANO FLAT BEANS

Velero #61320/11320
Easy harvesting. Pods are set high on upright plants resulting in an easy harvest. Good yields of dark green, 6" long uniform pods. High quality interiors with excellent flavour. High resistance to Bean Common Mosaic Virus and Curly Top Virus. Maturity in 55-60 days.

SOY BEANS (Edamame)

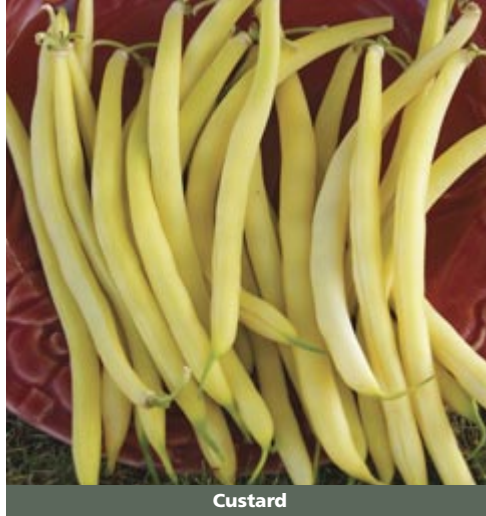

Karikachi No.3 #60050
High yielding soybean! Karikachi #3 is very reliable and productive. With a long harvest window, expect great yields with 3 seeds per pod. Matures in 80-90 days.

Caspian

Custard

Gold Rush

Golden Rod

Rocdor

Voltage

YELLOW WAX BUSH BEANS

Caspian #61440/11440

Rust resistant. Caspian fills 4.5-5" pods slowly insuring you get an extended, high-quality, harvest that will deliver a satisfying snap. Yellow pods bode well with other vegetables or in the classic Nova Scotian dish, Hodge Podge. With strong disease resistance, including Rust, Caspian has shown to be a top performer in both wet and dry seasons. Matures in 55-65 days.

Custard VESEYS TOP PICK! #61610/11610

An improved Gold Dust type. Custard produces 5.5-6" long, round slender bright yellow pods on a compact plant. The upright plants are easy to pick and will continue to produce over several weeks. They have resistance to Bacterial Brown Spot disease so are ideal for fall harvest. Maturity is 50-60 days.

Growing Beans

Phaseolus spp

Can direct seed:	Yes
Days to germinate:	6-10, soil temperatures 15-22°C
Planting depth:	1-2"

Approx seeds for 50 ft row:	150-300sds/50g
Approx seeds per acre:	65-175m

BEAN SEED COUNTS:

Approximately 1600 seeds per pound
(200 seeds per 50g package)

Gold Rush #61550/11550

One of our best sellers. Long, straight pods hang in clusters around the main stem making them easy to pick. The fine flavour and the ability to remain in prime condition on the plant over a long period makes Gold Rush extremely popular for the home garden. Excellent for freezing. 55-60 days to maturity.

Gold Rush Organic #40600
Certified Organic Seed.

Golden Rod #61530/11530

Easy picking. We were very impressed by this yellow bush wax bean. Golden Rod is adaptable to a wide range of growing conditions and produces excellent, 6" long coloured pods. Plant foliage allows beans to be picked with ease. 50-60 days to maturity.

Rocdor STAFF TOP PICK! #61540/11540

Pick of the bunch! Rocdor produces great yields of high quality, 6" royal-yellow pods. Beans set early on vigorous and adaptable plants. With a great disease resistant package, Rocdor is perfect for any grower! Matures in 50-55 days.

Voltage NEW! #11445

The best of qualities in one variety. Voltage has shown itself to be a top competitor in the wax bean segment. The best qualities mixed into one variety, Voltage has rugged plant vigour, consistent 5.5" pods, and yield very well, even when spaced slightly closer together. Growing well in both wet and dry seasons, and with a strong disease tolerance package, Voltage is sure to find its way to a dinner plate near you. Matures in 60-65 days.

Aldrin

Dominator Organic

Lewis

Valentino

Wyatt

Red Swan

GREEN BUSH BEANS

Aldrin #61470/11470
Attractive and high yielding. The most attractive green bean in our trials. Aldrin yields well and produces straight, dark, glossy, 5" pods. Pods are positioned high on upright plants resulting in fast, easy picking. Exceptional flavour. Matures in 55-60 days.

Dominator Organic NEW! #40304
Strong plants and large beans. Dominator is the perfect bean for both eating fresh or cutting to freeze. Pods grow 6-6.5" and are smooth, with a lighter green colour. Plants set pods high making harvest easier. The best quality of Dominator is its ability to perform in soils that are less than ideal. Matures in 55-60 days.

Lewis VESEYS TOP PICK! #61461/11461
Big yields of beautiful, dark green beans. Lewis with its slow seed development in pod is a perfect variety for succession planting with crisp, juicy flavour, and excellent eating quality. It produces an early, concentrated set of 6" beans on an upright plant, which makes for easy picking. Resistant to Bean Common Mosaic Virus, Curly Halo Blight, and Rust. Matures in 50-55 days.

Valentino #61480/11480
Strong performer under warm conditions. Beautiful, dark green and glossy beans with quality to match their appearance. Valentino's low-fibre pods mean very tender and tasty beans. 6" pods are set high on the plants, with a concentrated set allowing for fast and easy picking even under warm summer conditions. Approx. 50-55 days to maturity.

Wyatt #61475/11475
High quality. Wyatt is an adaptable and strong, producing green bean with great resistance to diseases. The plants produce excellent quality yields of straight, glossy green 6" beans. Beans are set high making harvest easy. Great for both home gardeners and commercial growers. Matures in 55-65 days.

RED BUSH BEANS

Red Swan #61560
Stringless and unique. Red Swan is a cross between a purple snap and pinto bean. Pods are 5-6" long and a light red-purple colour. A Trial Staff favourite, Red Swan kept producing late into the season for multiple harvests and pods hold onto their flavour well at every size. Matures in 60 days.

Borsalino

Maxibel

Carminat

Cobra

Fortex

Kentucky Blue

FRENCH FILET BEANS

Borsalino #61381
Gourmet yellow beans. A fine yellow 4-5" French filet stringless bean, that are straight with great flavour. The 17-20" upright plant produces a heavy set of bright yellow beans resulting in easy picking and good yields. Matures in 55-60 days.

Maxibel #61660
A perfect, extra-long stringless filet. A dark green bush bean that produces fine, very straight, 7" long beans. Slender with a firm texture and excellent flavour. Beans hold well on plants. Matures in 45-55 days.

POLE BEANS

Carminat #61431
A superb purple pole bean. With its 7-8" long dark purple pods and lavender blossoms, this pole bean is best described as "Simply beautiful." Beans keep their tasty and juicy flavour even at a larger, fuller size. Grows to approximately 6'. High yielding and matures in 65-75 days.

Cobra #61424
Versatile. Cobra has been developed to grow in both field and greenhouse settings. Black seeded with striking purple flowers. Pod length is 6-8". Matures in 55-60 days.

Fortex #61410
Delicious at any size. This open-pollinated variety produces excellent tasting beans even when seeds start to show. Harvest at 6-7" for sweet, slender filet Beans. Fortex is a great choice for beginner and veteran gardeners alike. Matures in 60-70 days.

Kentucky Blue #61430
Great flavour. Developed from the well-known Kentucky Wonder and Blue Lake varieties. Combines an outstanding combination of quality characteristics. Plant growth is healthy and vigorous, producing an abundance of 6-7" green pods which are straight and sweet flavoured. Untreated seed only. Maturity in 60-70 days.

Monte Gusto

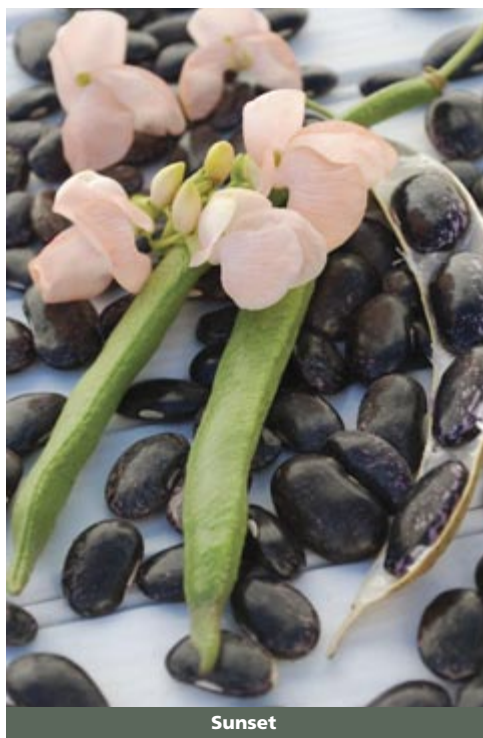

Rattlesnake

Scarlet Runner

Seychelles Organic

Sunset

Sunshine

Monte Gusto #61432
Perfect space saver for any home gardener.
 Delicious, uniform yellow wax pole bean with great texture is ideal in any garden when trellised. Bursting with flavour and beautiful colour, Monte Gusto will yield with harvests all through the season and is easy to pick. Maturity of 65-75 days.

Rattlesnake HEIRLOOM #61405
Striking purple and green pods. The beautiful purple blossoms match the unique purple markings on this vigorous heirloom stringless pole bean. Delicious and full of flavour. Rattlesnake is a very versatile bean and is just as good as a snap, shell, or even as a dried bean. 60-70 days to maturity.

Scarlet Runner HEIRLOOM #61420
An old-fashioned garden favourite. Scarlet Runner will climb vigorously on poles, fences or trellises. With its brilliant red flowers, Scarlet Runner is grown for its ornamental value as well as for its flavour and abundant yields. Resistant to Bean Common Mosaic Virus and Anthracnose. Height 6-8'. Matures in 60-70 days.

 **Seychelles Organic #40281**
VESEYS TOP PICK! Crisp, delicious pods. Seychelles produces uniform, straight, dark-green, and glossy stringless pods that are 5-6" long with excellent flavour. This early producing variety will reward the grower with multiple harvests. Seychelles grows 7-9' tall on vigorous, dark-green vines that need support in the garden or on the patio. AAS winner. Matures in 50-60 days.

Sunset HEIRLOOM #61055
Great garden centerpiece. Sunset produces unique, beautiful peach-coloured flowers that are an excellent meal for many pollinators and hummingbirds. This wonderful heirloom variety grows well in cool weather, so even in autumn Sunset continues to grow pods. This bean was one of the most productive beans in our trials. Matures in 65-70 days.

Sunshine #61425
Climbing Yellow Bean. This pole bean produces beautiful 6-7" snap like beans. Sunshine produces pods throughout the season and is well adapted to both field and greenhouse planting. Matures in 65-70 days.

Bohan

Bresko

Detroit Dark Red Supreme

Merlin

Moneta

Red Ace

Rhonda Organic

BEETS

Beets come in all sorts of sizes and shapes. They are easy to grow and the entire plant including the tops, are edible. Beets are packed full of vitamins and minerals. Plant early in the season as they do best in cool conditions. Harvest when young for tender greens that are delicious in a salad or leave them to mature as roots that are ideal for fresh eating, pickling or canning.

ROUND RED VARIETIES

Bohan #12090
A vigorous, consistent producer. Bohan thrives in a wide range of growing conditions. Healthy upright tops produce 3" smooth, globe-shaped roots. Bohan shows strong tolerance to heat and soil-borne diseases. A great variety for both commercial growers and home gardeners. Matures in 55-60 days. Approx. 500 sds/pkg.

Bresko #12035
Excellent top health and seedling vigour. Bresko offers an extremely dependable beet with delicious flavour. They have clean shiny leaves and smooth globe shaped roots that are a perfect choice for storage beets that will maintain quality and flavour over time. Maturity in 75-80 days. Approx. 500 sds/pkg.

Growing Beets

Beta vulgaris

Can direct seed:	Yes
Days to germinate:	5-15, soil temperatures 15-20°C
Planting depth:	0.5-0.75"
Space between plants:	3-6"
Space between rows:	12-24"
Approx seeds for 50 ft row:	200-600 sds
Approx seeds per acre:	45-175m

Detroit Dark Red Supreme #12030
Long-time standard. This open-pollinated beet has globe shaped roots, dark red flesh, and excellent quality. Tops are medium-length (12-15") and green with a maroon tinge. Ideal for both summer and fall harvest, for fresh, canning or pickling. Medium early maturity at 65-70 days. Approx. 400 sds/pkg.

First Crop EXCLUSIVE #12020
Early and best for beet greens. Nicely globe-shaped, tender, and sweet, with an attractive deep red colour. This Veseys exclusive is ideal for the home garden or for bunching for early market. Excellent tops for beet greens with fine flavour and good colour. Extra early maturity at 50-60 days. Approx 400 sds/pkg.

Merlin VESEYS TOP PICK! #12270
Great colour, flavour and uniformity. One of the sweetest and darkest red beets we have found in our trials. This hybrid has very little zoning and keeps its shape better than other varieties in high-density plantings. 55-60 days to maturity. Approx. 500 sds/pkg

Moneta #12000
Mono-germ variety. An excellent selection providing both high yields and remarkably uniformly sized beets. This hybrid is sweet and full-flavoured with a deep, dark red interior colour. 13-14" tops allow for efficient harvest. Highly resistant to disease. Moneta's mono-germ seed (1 plant/seed) minimizes thinning and gives a more accurate planting density. Sized seed. 45-50 days to maturity.

Red Ace #12050
More uniform Detroit type. This outstanding, fast growing, sweet flavoured hybrid has smooth, medium sized roots of even red colour. The short, erect tops are bright, shiny green and free from red discolouration. 3" diameter. Excellent disease tolerance and uniformity. Early maturing and heavy yields. Matures in 50-55 days. Approx. 500 sds/pkg.

 **Rhonda Organic #40138**
One of the best storage beets. A superior variety that produces strong tops and consistent sizes with a nice round shape and a delicious, sweet taste. Quality is maintained throughout fall and winter, making Rhonda an excellent choice for a long-term storage beet. Matures in 65-70 days. Approx. 500 sds/pkg.

Bull's Blood

Chioggia Organic

Taurus

Robin

Fresh Pak

Zeppo RZ *NEW!* **#12002**
Baby or full size. Zeppo is the perfect beet for bunching. The roots are incredibly uniform, nearly hairless, and tops are short and strong. Zeppo creates the perfect opportunity for pickling and fresh beets in the same variety! 40-45 days for baby, 50-55 days for full size. Approx 500 sds/pkg.

Bull's Blood *HEIRLOOM* **#11980**
Dual-purpose heirloom. Deep red leaves are sweeter than radicchio and the young tops make an attractive addition to salad mixes. The scarlet roots are uniform with a sweet, wholesome flavour and best when harvested young. Maturity in 35-40 days for baby leaf, 55-60 days for roots. Approx 250 sds/pkg.

Taurus **#11995**
Our best beet for pickling. Taurus is an intense dark-red, cylindrical beet that is easy to slice. This hybrid produces smooth slim 6-7" roots that are ideal to use for canning, freezing, or pickling. Harvest at full size or baby fingerling beets leaving tops on for delicious greens. They have high resistance to cracking. Days to maturity 60-80 days. Approx 500 sds/pkg.

SPECIALTY VARIETIES

Avalanche **#12055**
Excellent raw or roasted eating quality. This is a white-fleshed variety with a well-rounded root, upright light-green leaves and excellent disease resistance. This hybrid variety is non-staining and pairs well with red and gold beets. AAS winner. Maturity in 55-60 days. Approx 500 sds/pkg.

 **Bull's Blood Organic** **#40140**
HEIRLOOM. Certified Organic Seed.

 **Chioggia Organic** **#40415**
Beautiful colour. Chioggia Beets are an heirloom variety from Italy with striking purple and white interior zoning and a sweet mild earthy flavour. They are an easy to grow gourmet beet, adding colour to roast vegetables, or salad, making them a home garden favourite. Matures in 55-65 days. Approx. 350 sds/pkg.

Boldor **#12015**
Unique golden colour. Bolder beets have a beautiful uniform golden yellow round root, with light green tops. They are sweet and delicious if juiced, shredded in salad or roasted. Maturity is 55-60 days. Approx. 500 sds/pkg.

BABY VARIETIES

Robin **#12041**
Perfect whole baby beets. Uniform top and root make picking easy. Dark-red stems and green leaves provide a great visual contrast for beet greens in 25-35 days. Deep, dark-red, 1-2" round beets are very sweet making this hybrid a great choice for both the home and market gardener. 50-60 days. Approx. 500 sds/pkg.

BEET GREENS

Fresh Pak **#12060**
Delicious beet greens. This hybrid beet produces large quantities of uniform, dark-green oval leaves with dark-red petioles, perfect for bunching or baby leaf production. Fresh Pak will not produce a usable beet root. They have resistance to Cercospora Leaf Spot, and Downy Mildew. Maturity in 30-40 days Approx. 500 sds/pkg.

BROCCOLI

A 'cool' veggie that is delicious eaten raw, steamed, or added to stir-fries. Broccoli is great for health and reputed in benefiting immune systems. Large, uniform, deep green heads have the best ability to grow when temperatures are cool and can even be planted again in mid-late summer for fall harvest. Choose from a selection of compact, heat tolerant and hardy types.

All Season Blend *EXCLUSIVE* #12170
Best choice for home gardeners. This blend is a mix of some of our most popular early, mid, and late varieties that will spread out your harvest for a longer period. Approx 100 sds/pkg.

Belstar Organic #40470
A widely adapted broccoli suitable for late summer and fall harvest. This hybrid has a 8-16" domed head with tight beads that are blue-green in colour. This broccoli will produce sideshoots well into the fall for multiple harvests. Matures in 65-75 days from transplant. Approx. 50 sds/pkg.

Growing Broccoli

Brassica oleracea var. italica

Weeks to start ahead:	4-6
Can direct seed:	Yes
Days to germinate:	5-10, soil temperatures 10-20°C
Planting depth:	0.25"
Space between plants:	14-20"
Space between rows:	24-36"
Approx seeds for 50 ft row:	30-45 sds
Approx seeds per acre (transplant):	8.5-18.5m
Approx seeds per acre (direct seeded):	17-37m

BROCCOLI SEED COUNTS:

Packages contain approximately 100 seeds unless otherwise noted.

Covina #12180
Vigorous and upright. A late-maturing broccoli that is well worth the wait! Covina offers vigorous upright plants that produce large, tightly beaded heads that are a nice green colour. Yields remain consistent and plentiful, even when faced with the most extreme weather conditions. Heads mature 6-8" in size. High resistance to Fusarium and moderate resistance to White Rust. Matures in 75-80 days from transplant. Approx 100 sds/pkg.

Green Magic #12120
Early and uniform. Green Magic is an attractive early broccoli that is much more uniform and forms a tighter head than other early varieties. This hybrid produces semi-domed heads with fine beads that are blue-green in colour. Maturity in approximately 55-60 days from transplant. Approx 100 sds/pkg.

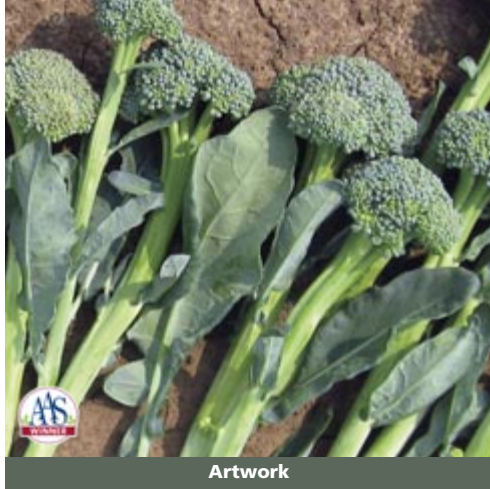

Gypsy *VESEYS TOP PICK!* #12140
Tolerates warm weather. One of the most heat-tolerant broccoli varieties, Gypsy can handle the warmer summer conditions better than other cultivars while still performing well in cool fall conditions. This hybrid is very uniform, with high quality dome-shaped heads. Ideal for bunching and crown cuts. Resistant to Downy Mildew. Matures approx. 60-65 days from transplanting. Approx. 100 sds/pkg.

Imperial #12210
Loves heat; stores well. Imperial is an excellent variety for gardeners who want broccoli that performs well in the longer, hotter days of summer. Heads are tight and dome-shaped with small, dark-green beads and superb post-harvest holding characteristics. This hybrid is ideal for bunching or processing. Matures in 65-70 days from transplant, but cooler days can result in a longer maturity. Approx. 100 sds/pkg.

Luna *STAFF TOP PICK!* #12135
Perfect for all Growers! Luna is the perfect choice for spring and fall production. The great crown for cutting followed by large multiple sideshoots make it the go to broccoli for market growers and roadside growers. Maturity in 70-75 days from transplant. Approx. 100 sds/pkg.

Patron #12130
Good summer variety. Patron produces tight 5-6" domed heads with small beads, ensuring top quality after harvest and handling. Sturdy plants yield heads with slender stalks which require minimal trimming and provide ease of harvest. Mid-season maturity. Suitable for fresh market, bunching and crown cut. Tolerant to Downy Mildew. Maturity 55-60 days from transplant. Approx 100 sds/pkg.

BROCCOLINI VARIETIES

Artwork *VESEYS TOP PICK!* #12114
Early season mini broccolini. This vigorous, early-maturing broccolini produces sweet, tender side shoots over a period of several weeks. The small main head should be harvested at 1-2" to encourage the production of side shoots. AAS winner. Maturity in 55-60 days from transplant. Approx. 50 sds/pkg.

Burgundy #12115
Colourful and strong. Burgundy is a royal purple broccolini that grows well in most temperatures. The tall, rigid plants display their colourful, tight floret heads that make a great addition to summer salads or steamed as a side dish! Matures in 60-70 days from transplant with continuous off-shoot production until frost. Approx 25 sds/pkg.

Montebello #12116
Long tender stems. Montebello is a versatile broccolini variety that boasts extreme stress tolerance even under less-than-ideal conditions. Cut the main head early and you will have side shoots until frost, making it a welcome addition to your garden. Maturity in 80-85 days. Approx. 25 sds/pkg.

BRUSSELS SPROUTS

The flavour of freshly picked brussels sprouts is second to none! They are loaded with miniature cabbage-like heads and are generally one of the last remaining crops to be harvested in late fall. They have outstanding tendencies to resist cold climates and these temperatures will actually improve their flavour. One plant can produce uniform and delicious 1" buds for four to six weeks.

Jade Cross #12310
Early maturing. Deep green sprouts are spaced closely on medium-sized plants that hold well in adverse weather. Firm, oval-shaped, medium-sized sprouts. AAS winner. Matures in 95-105 days from transplant. Approx. 100 sds/pkg.

Marte #12326
Tall, high yielding sprouts. Marte is very vigorous and produces tall plants with excellent sprout quality. Well-spaced, tight sprouts are flavourful and bright in colour. Matures in 105-110 days from transplant. Approx. 25 sds/pkg.

Nautic Organic #40021
Reliable and long-standing. Nautic Organic has excellent cold-tolerance and 1" tightly wrapped sprouts with superb flavour. Wide spacing between sprouts make harvest easy and allows plants to dry out quickly reducing the risk of disease. 115-120 days to maturity. Approx. 25 sds/pkg.

CABBAGE

One of the most cool hardy vegetables that can be successfully grown almost anywhere in fertile soil. Versatility is endless in the cabbage field! You can choose summer types for consuming fresh or winter varieties for cold storage. Many are ideal for fresh eating while others are perfect for making kraut, coleslaw or cabbage rolls.

ALL-SEASON VARIETIES

All Season Blend *EXCLUSIVE* #12520
A great choice for home gardeners. All Season Blend is a mix of our best early, mid, and late maturing cabbage varieties that will produce top quality heads over the entire growing period. We've improved our blend by adding some of the other types like red and savoy to make this blend even better. By using this blend, you can get a season's worth of cabbage from just one or two plantings! Approx. 100 sds/pkg.

SUMMER VARIETIES

Botran #12535
Good field holding. Botran provides tightly wrapped 4-5lb heads that are uniform and productive that will appeal to all growers alike. It has good resistance to Black Rot, Fusarium Yellows and tolerance to Thrips. Botran makes a great dual-purpose cabbage being good for both small and medium head production. Matures in 75-85 days from transplant. Approx 100 sds/pkg.

Bronco #12390
The standard for mid-season cabbage. This fresh market hybrid is a real performer in our trials. The attractive, firm 6-7" heads average 3-5 lb. Bronco's sweet and crunchy texture is very versatile in the kitchen. Resistant to Fusarium Yellows and tolerant to Black Rot and Tipburn. Matures in 85-95 days from transplant. Approx. 100 sds/pkg.

 **Farao Organic #40671**
Early and uniform. Early uniform heads are 3-4lb and dense with short cores that hold well in the summer heat, with few cracks. Leaves are thin and juicy with a hint of sweetness making them excellent in stir-fries or eggrolls. Matures in 45-50 days from transplant. Approx 50 sds/pkg.

Katarina #12545
The perfect cabbage for containers or small gardening plots. Katarina provides an early yield of cabbage and is also ideal for CSA's as you can turn this crop over quickly and it will keep generating cash flow for your operation. Katarina takes up only one square foot of space so is well-suited for planting in small gardens or even a large pot on the porch. The heads are small, round and perfectly formed with a small core. Excellent for both processing and eating fresh. AAS winner. Matures in 45-50 days from transplant. Approx 100 sds/pkg.

Stonehead #12420
An early summer hybrid variety. Stonehead, like its name implies is a hard round medium sized early cabbage for summer use. AAS winner. The 3-4lb heads mature in 45-55 days from transplant. Approx 100 sds/pkg.

Swingma RZ *NEW!* #12240
Perfect for fresh market or cutting. Swingma is the perfect cabbage for sale at the market or coleslaw and other cabbage processing. Heads can weigh upwards of 8-9lb., mixed with short cores and dense heads means little waste and more plant is used. These tough plants have strong vigour and are well wrapped. Matures in 75-80 days from transplant. Approx 100 sds/pkg.

Tiara #12395
Early and extra tender. Tiara is an improved very early cabbage with better uniformity and holding ability. Tiara supports a dense 4-5" head with a short internal core with green thin, tender leaves that would make a perfect addition to your coleslaw or salad. Matures in 40-50 days from transplant. Approx 100 sds/pkg.

Growing Cabbage

Brassica oleracea var. capitata

Weeks to start ahead:	4-6
Can direct seed:	Yes
Days to germinate:	5-10, soil temperatures 10-20°C

Bartolo

Expectation

Expect

Flexima RZ

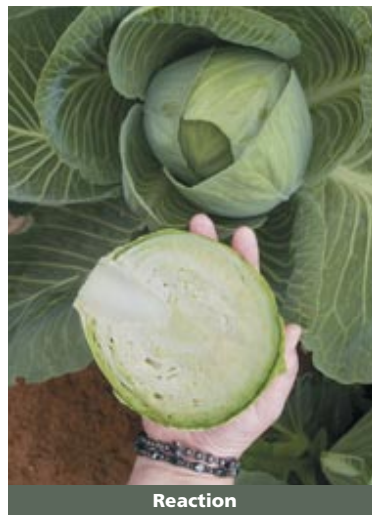

Lennox Organic

Loughton

Missourima RZ

Reaction

Zacapa

WINTER VARIETIES

Bartolo #12540
Great storage qualities. Known for uniformity and quality, Bartolo produces round, dense heads, with a short core, and a good number of outer leaves. Tolerant to Pepper Spot and Grey Speck. Treated seed available. Maturity in 110-120 days from transplant. Approx. 100 sds/pkg.

Expectation #12555
Improved Expect! All the same characteristics as Expect with better thrips tolerance and CMS. With a short core and a dense pale green interior, heads stay clean, and store well into late spring! Matures in 100-110 days from transplant. Approx. 100 sds/pkg.

Expect VESEYS TOP PICK! #12560
Our best winter cabbage. Short stemmed, medium white cabbage with waxy green leaves. This hybrid is very healthy and productive. The preferred storage cabbage of our commercial growers due to its excellent flavour, colour and quality when stored. Suitable for very long-term storage. Matures in 95-105 days from transplant. Approx. 100 sds/pkg.

Flexima RZ NEW! #12242
Perfect for personal or full-size production! Flexima, with its adaptable growing size, is perfect for personal use or grown to a larger size for processing or large batches of sauerkraut! Heads are very dense with a short to medium core weighing 3.5-9lb. Matures in 115-125 days from transplant. Approx. 100 sds/pkg.

Lennox Organic #40670
Productive and uniform. This hybrid is very versatile and can be used to fill several markets, from small boxing cabbage to large processing heads. Holds its green colour extremely well in storage. Matures in 100-110 days from transplant. Approx. 50 sds/pkg.

Loughton NEW! #12440
Strong storage. Loughton is one of the best in slot storage cabbages on the market. Heads are dense and hard, keeping for months under the right conditions. Heads can weigh upwards of 6.5lb and are well protected by wrapper leaves. Matures in 105-115 days from transplant. Approx. 100 sds/pkg.

Missourima RZ NEW! #12244
Excellent choice for all uses. Missourima is perfect for all growers as it offers 6.5-13 lb. of dense foliage with a short core, good for storage or eating fresh. Incredibly adaptable, heads remain round at any size. Matures in 110-120 days from transplant. Approx. 100 sds/pkg.

Reaction #12290
Best small winter cabbage. Our Trials Staff has found Reaction to be an ideal cabbage variety when a smaller-sized, higher count is desired. It yields a 6" very dense cabbage with less core than other varieties with long term storage potential. Fusarium Yellows resistant. Matures in 105-115 days from transplant. Approx. 100 sds/pkg.

Zacapa VESEYS TOP PICK! #12565
Long storage. The most green out of storage. Short stemmed, medium white cabbage with waxy green leaves. This hybrid is very healthy and productive. Preferred by growers for its excellent colour and flavour out of storage. Suitable for very long-term storage. Matures in 95-105 days from transplant. Approx. 100 sds/pkg.

Buscaro Organic

Caraflex

Klimaro

Omero

Wirosa

Adana

Bolero

SPECIALTY VARIETIES

Buscaro Organic #40672

Best tasting. Buscaro cabbage produce a vibrant red 4-5lb head with a short core and sweet flavour excellent for salads and coleslaw. This mid storage cabbage is ideal for processing. Matures in 90-100 days from transplant. Approx 25 sds/pkg.

Caraflex #14050

Best tasting cabbage. It is the sweetest, most tender cabbage that we have ever had in our trials, perfect for coleslaw, stir-fries, and salads. This hybrid produces compact plants, allowing for dense planting for summer and fall production. If mature, it will store up to 10 weeks from harvest. Matures in 45-55 days from transplant. Approx 50 sds/pkg.

Klimaro #12550

Excellent for storage. Red Klimaro is a versatile, round-headed storage cabbage that holds well in the field. The interior is brilliant red with a small core and dense structure. Our Trials Staff highly recommends this high-yielding variety. Matures in 115-125 days from transplant. Approx. 50 sds/pkg.

Omero NEW! #12572

An early red cabbage with good field holding ability. Omero produces 2-3 lb round heads with a short core and brilliant red-purple colour. Matures in 70-75 days from transplant. Approx. 100 seeds/pkg.

Wirosa #12510

Late season savoy. This hybrid savoy cabbage is popular for fresh market and storage because of its uniform round, matte blueish-green heads, that are closely wrapped with crinkled leaves. Wirosa has good field standing ability and frost tolerance. Matures in 110-120 days from transplant. Approx 100 sds/pkg.

CARROTS

Carrots can be planted as soon as the ground can be worked in the spring. Multiple plantings allow for extended production, baby carrots can be picked at 50 days. To store carrots, dig roots after frost but before ground is frozen. Most carrots have a long storage life if kept at near freezing temperatures with high humidity. Some varieties are offered in a pelleted form, which makes them much easier to plant.

NANTES VARIETIES

Adana #12712

Early Bunching. An early maturing hybrid Nantes carrot with nice colour and great taste. Excellent eaten raw. Roots are cylindrical with strong tops that are good for bunching with very uniform size. Maturity is 55-60 days. Approx. 1000 sds/pkg.

Bolero #12930

Excellent flavour out of storage. Bolero is suited to bunching, slicing and baby carrot market. This Nantes variety has strong, sturdy tops with a medium orange 7-8" root. Uniform in size with blunt ends and great for fall harvesting. Maintains its superior flavour after months of storage. Maturity in 75 days. Approx. 1000 sds/pkg.

Goldfinger

Miami Organic

Napoli

Naval

Narvik

Navedo

Goldfinger #12720
Excellent bunching carrot with strong tops.
 This early Nantes hybrid produces uniform roots with a sweet flavour, crisp texture and attractive colour. Maturity is 65-70 days. Approx. 1000 sds/pkg.

 **Miami Organic #40580**
Sweetness holds up well in storage.
 Miami is well-adapted for early or main season plantings. The bright orange roots have a sweet flavour which is retained during long-term storage. Maturity in 90-95 days. Approx. 500 sds/pkg.

Napoli VESEYS TOP PICK! #12710
Extra early hybrid. Napoli is an early full sized Nantes type carrot with dark green tops attached to 7-8" slightly tapered roots. While these are fantastic for early bunching carrots, if planted later they produce very sweet tasting storage carrots. Also available as treated or pelleted with treatment. Maturity is 50-60 days for baby and 95-105 days for full size. Approx 1000 sds/pkg.

 **Napoli Organic #40530**
 Certified organic seed. Also available with organic pelleting. 500 sds/pkg.

Naval #12735
Sweet flavour. Naval is a mid-late Nantes type with strong tops and 7-9" roots that store well throughout the winter. The upright tops that allow for ease of harvest and are compact enough for bunching. These sweet crisp carrots are highly adaptable to a range of climates including hot dry weather conditions. They have moderate resistance to cracking, Alternaria and Powdery Mildew. Matures in 75-80 days. Approx. 1000 sds/pkg.

Narvik NEW! #12741
Great storage Nantes. Narvik produces 8" roots with a typical Nantes, blunt tip, with potential for roots to grow bigger without cracking. Tops are strong and stand upright well. Roots are fantastic fresh or out of storage. Matures in 100 days. Approx. 1000 sds/pkg.

Navedo #12737
Early bunching and storage. This cylindrical smooth dual-purpose carrot can grow up to 8-10". Harvest at 60-70 days for early, fresh market bunching or, if left longer to mature, becomes a great storage variety when harvested at 95-105 days. Approx. 1000 sds/pkg.

Negovia Organic

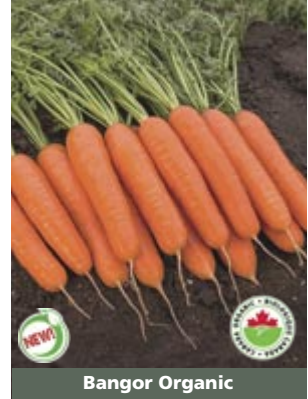

Touchon

Volcano

Neptune

Bangor Organic

Chantenay Red Cored

Oxheart

Adelaide

Mokum

Yaya Organic

Negovia Organic #40575
Organic pelleting available. This sweet Nantes carrot has a nice crunch excellent for fresh market or storage. They grow to a uniform 7.5-8" with a blunt end in 70-75 days. Approx. 500 sds/pkg

Touchon HEIRLOOM #12620
Old time favourite. A popular improved core-less Nantes variety with great flavour that are 7-8" long and carry their size right down to the blunt tip. Good for bunching and winter storage, remaining sweet throughout storage season. Sow early for summer use and follow with a second planting for winter storage or freezing. Maturity in 65-70 days. Approx 2000 sds/pkg.

Volcano #12731
Good storage with strong disease resistance. This main season Nantes hybrid produces 8-9" cylindrical roots with good internal and external colour. Tops are upright and strongly attached to roots that are resistant to breakage and store well. They have high resistance to Alternaria. Maturity is 130-140 days. Approx. 1000 sds/pkg.

IMPERATOR VARIETIES

Neptune #12730
Long term storage. Neptune is an early maturing, big yielder with flexibility in the field and long-term storage capabilities. The superior medium orange 8-10" roots with an indistinct core are tasty and crisp. Maturity in about 65 days. Approx. 1000 sds/pkg.

BERLICUM VARIETIES

Bangor Organic NEW! #40532
Extra-large with great storage. This high yielding and long storage type of carrot is like Nantes types but is slightly bigger at 7-9", perfect for juicing or slice and dice market. Organic pellet only. Matures in 80-85 days.

CHANTENAY VARIETIES

Chantenay Red Cored HEIRLOOM #12610
Best for shallow soils. A premium all-purpose carrot with good interior colour. Grows well in heavy, shallow soil. Roots are 5-6" long and 2.25" thick at the shoulder. Flavourful and excellent for dicing. Maturity in 65-70 days. Approx. 1250 sds/pkg.

Oxheart HEIRLOOM #12680
Robust and full. Oxheart grows a short but wide root, great for growing in containers and compacted soils. The 3-6" roots that can weigh up to a pound and are tasty when eaten fresh or juiced. Stores well. 90 days to maturity. Approx 750 sds/pkg.

BABY/MINI VARIETIES

Adelaide #12725
A true baby carrot. This hybrid Nantes variety matures early, producing a blunt tip. The 3-4" dark orange roots are crunchy and rich in flavour. Ideal for growing in containers and small spaces. Great for early market sales. Maturity in 50-60 days. Approx. 1000 sds/pkg.

Mokum VESEYS TOP PICK #12711
Great flavour at early stage. Mokum is an Amsterdam forcing type with great flavour making beautiful bunches of baby carrots. Delicious for snacking raw or when cooked whole at any stage. It is well-suited for gardeners wanting to grow carrots in deep pots or containers. 50-55 days. Approx. 1000 sds/pkg.

Yaya Organic #40420
Excellent flavour early. A versatile Nantes carrot that packs a powerful punch! Yaya continues to stand out in our trials with its great flavour early in the season. This hybrid is extra smooth and uniform, making it very easy to clean and bunch. Maturity in 70 days but is also excellent picked as baby carrots at around 55 days. Approx. 500 sds/pkg.

Deep Purple

Rainbow

Red Sun

White Satin

Adona Organic

All Season Blend

SPECIALTY VARIETIES

Deep Purple #12650
Solid purple colour. Long roots that can reach up to 10-12". Strong tops with great uniformity. This hybrid carrot is great roasted, grated in a salad, or juiced for extra colour. Maturity in 70-75 days. Approx. 500 sds/pkg.

Rainbow #12770
Great taste and unique colours. An exceptionally crisp and tasty carrot in four bright colours that range from white, yellow, coral and orange, perfect for a dipping tray or light up your plate when cooked. Since this is a single hybrid and not a mixture of varieties, the carrots are uniform in size and appearance. Maturity in 75 days. Approx. 500 sds/pkg.

Red Sun #12765
Distinctive red colour. Consistent, medium-sized 7" Cello roots with a stunning, deep-red interior and exterior colour. Red carrots boast equivalent flavour and crunchy texture to orange carrots. Incorporate both their gorgeous colour and healthful benefits by baking, braising or in carrot-ginger soup. Mid-season maturity at 70 days. Approx. 500 sds/pkg.

White Satin #12775
White carrots that are extra crisp. White Satin is a very productive carrot, producing long 8-9" roots. Very mild flavour but extra sweet and crisp, that store well. They have strong tops and tapered roots. Maturity in 65-70 days. Approx. 500 sds/pkg.

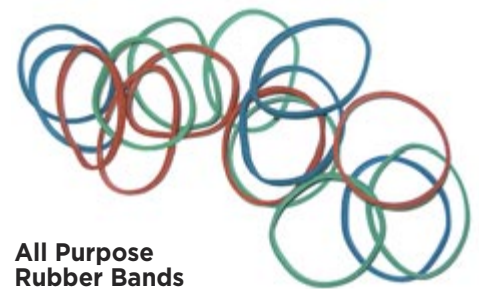

CAULIFLOWER

Cauliflower is available not only as a typical round, bright white type but can come in multiple colours and even heads that form beads that resemble shells. No matter which variety you choose, they all equally boast the same sweet flavour and are full of vitamins and minerals as well as being a great alternative for wheat-based carbs.

WHITE VARIETIES

Adona Organic #40477
Superior quality. Both home gardeners and commercial growers can benefit from Adona's tightly wrapped heads, making banding easy. Adona heads have white curds that are attractive, tight growing, and sweet, perfect for steaming or cauliflower bites. Maturity 80-85 days from transplant. Approx. 25sds/pkg.

All Season Blend EXCLUSIVE #12840
Great choice for the home gardener. All Season Blend is the perfect solution for home gardeners having problems with their cauliflower all maturing at the same time. All Season Blend is a mix of early, midseason and late maturing hybrid that will produce top quality heads over the entire growing period. Approx. 50 sds/pkg.

Freedom

Minuteman

Steady

Tressaury Organic

Cheddar

Depurple

Veronica

Freedom VESEYS TOP PICK! #12875
Our best performing cauliflower. This hybrid is very uniform under both summer and fall growing conditions. Excellent weight, density and colour. This main season variety has dense foliage are easy to tie to keep curds looking bright and white. Maturity 65 days from transplant. Approx. 50 sds/pkg.

Minuteman #12850
Early hybrid cauliflower. Vigorous for an early variety, Minuteman is very consistent and produces a well-wrapped head. Our best high quality, early cauliflower. High domed heads are very white with good weight. Maturity in 45-50 days from transplant. Approx. 50 sds/pkg.

Steady #12890
Vigorous summer variety. This hybrid early cauliflower variety is a consistent performer in many environments. Steady exhibits an excellent internal wrap and produces heavy, dense, dome-shaped heads. Maturity in 70 days from transplant. Approx. 50 sds/pkg.

Growing Cauliflower

Brassica oleracea var. botrytis

Weeks to start ahead:	4-6
Can direct seed:	Yes
Days to germinate: 5-10, soil temperature 10-20°C	
Planting depth:	0.25"
Space between plants:	12-24"
Space between rows:	24-36"
Approx seeds for 50 ft row:	25-50
Approx seeds per acre (direct seeded):	15-43m
Approx seeds per acre (transplant):	7.5-21.5m

Tressaury Organic NEW! #40712
Bright white colour. Tressaury is a great main season cauliflower! Plants are compact with nice wrapper leaves. Plants handle summer growing well and because of the wrapper leaves, heads are better protected from the sun and will stay white. Matures in 65-70 days from transplant. Approx. 25 sds/pkg.

Cheddar #12910
Eye-catching orange colour. A great tasting cauliflower with a beautiful and distinctive colour - and it's good for you, too! Cheddar's orange colour comes from high levels of the health-promoting compound beta-carotene. This fall cauliflower produces medium-sized heads that do not require covering. Maturity 75-80 days from transplant. Approx. 25 sds/pkg.

Depurple #12905
Intense colour! Change up your normal white cauliflower with the decorative, yet tasty, Depurple! They produce dense, uniform, lavender/pink 7-8" domed heads to add a splash of colour to your next veggie tray. Like most purple vegetables the colour will fade with cooking, but a bit of acid will help revive the colour. 65-70 days to maturity from transplant. Approx. 25 sds/pkg.

Veronica #12880
A Romanesco type with a unique appearance. An out-of-the-ordinary cauliflower bound to catch anyone's attention that is perfect raw or cooked. This hybrid is a vigorous grower with beautiful, lime green heads comprised of small, pointed florets with a mild, sweet nutty flavour that stay green when cooked. They are best eaten when the heads are small. Ideal for a fall harvest. Maturity is 85 days from transplant. Approx. 25 sds/pkg.

CELERY

Hudson #13992
Tall and strong. Hudson produces 12-14", dark green stems on a tight plant with deep ridging, perfect for dipping or filling! Plants hold in the soil until ready for harvest and produce higher yields than other varieties. Maturity 105-110 days from transplant. Approx. 100 sds/pkg. Pelleted seed.

(A) Pkg for \$4.55 (M1) 1,000 sds for \$18.30
(M5) 5,000 sds for \$55.05

Tango #13990
Reliable and vigorous. Tango is an improved celery, it is more tolerant of less-than-ideal conditions. This open-pollinated variety produces dark green, thick stalks with lots of crunch and great flavour that is tender and almost stringless. Maturity 85-90 days from transplant. Approx. 250 sds/pkg.

(A) Pkg for \$4.55 (M1) 1,000 sds for \$12.20
(M5) 5,000 sds for \$26.90 (M25) 25,000 sds for \$86.80

CELERIAC

Brilliant #13980
Root celery. Looking for a unique addition to your fall soup or stew? This nutty-flavoured celery relative will top it off! Celeriac is grown the same as celery, but the root is used instead of the stalks. Brilliant forms uniform 3-5" roots with very few fibres. Stores well and easy to grow. Maturity in 110 days. Approx. 100 sds/pkg.

(A) Pkg for \$5.15 (X5) 500 sds for \$14.50
(M2) 2,000 sds for \$30.30 (M10) 10,000 sds for \$93.95

COLLARDS

Flash #12581
Slow to bolt. Grown for its large, dark-coloured, flavourful, smooth leaves that have excellent storage capability, lasting in the refrigerator up to 10 days. Collard greens can be picked from the bottom of the plant when they are 10" tall and continue picking until they are frozen. Use these leaves as wraps, in any Southern cuisine or Portuguese Caldo Verde. Maturity is 55 days. Approx. 100 sds/pkg.

(A) Pkg for \$3.70 (F) 5 g for \$18.75
(H) 25 g for \$43.00 (J) 125 g for \$144.65

CORN

It is true that corn lovers will 'get the water boiling' just before they pick cobs fresh straight from their own garden, as this is possibly the best way to enjoy the sweetness of the many types of corn varieties. Whether it's an early yellow type or a supersweet bicolor that is preferred, corn is something you will definitely want to have growing in your garden!

SUPERSWEET VARIETIES (SH2)

Awaken *Bi-colour NEW!* #13228
The season awakes with this corn! Awaken is an early, bicolor type with good tip fill and great husk protection. Ears are constantly 8" long and produce 14-16 rows of sugary kernels. Matures in 65-70 days.

Candice *Yellow* #13402
Excellent field holding and yield. This yellow variety has very high eating quality. The 7.5-8" ears exhibit nearly perfect tip fill. 16-18 rows of sweet, juicy, yellow kernels. Great yield on strong, 74" plants with excellent field holding ability. Maturity in 75 days.

Kate *Bi-colour* #13225
Great flavour, big yields. This hybrid produces high yields with excellent eating quality. 16-18 rows of glossy, tender, bi-colour kernels are contained within 7" ears, set on 72" tall plants. Very good field holding ability and very attractive husks round out Kate's long list of strong features. Resistant to Common Rust. Matures in 75-80 days.

Raquel *Bi-colour VESEYS TOP PICK!* #13401
One of the sweetest. Raquel is hands down one of the sweetest corns we have tried! Very large 8-8.5" ears are produced on 70", robust plants. This mid-season bi-colour corn has well-filled cobs with 16-20 rows of delicious kernels. Attractive husks with good tip coverage, long shanks, and dark flag leaves. Maturity in 70-75 days.

Rosie

SUPERSWEET (CONT'D)

Rosie Bi-colour #63235/13235
Superior eating! The ears of Rosie are 8", well-refined, and fill into an attractive blunt tip. Filled with 16-18 rows of glossy yellow and cream kernels, Rosie is strong with superb field holding ability. Maturity in 75 days.

Reflection White #63415/13415
NEW! Incredibly sweet! Reflection was a standout in our white corn trials for its high sugar content and great taste! Plants stand 67" tall and produce 7.5" ears, filling a nice blunt tip. Expect 16 rows of plump, sugar-filled, kernels! Matures in 80 days.

Summer Celebration Yellow #13405
NEW! A taste worth Celebrating! Growers and gardeners are sure to appreciate this beautiful, great tasting corn! Shiny, deep yellow kernels arrange in rows of 18 on 7.5" ears. Plants stand at 72" and resist lodging. Matures in 70-75 days.

Vision MXR Yellow #63065/13065
VESEYS TOP PICK! Superior eating quality and sweetness. Vision yields 72" plants with 7-8" blunt ears filled with 16-20 rows of kernels. Cobs are easily snapped off plants, allowing for a quick and easy harvest. The mouthwatering, sweet taste of Vision is out of this world - try it and you will 'see!' Maturity in 75 days.

NORMAL SUGARY VARIETIES (SU)

Peaches & Cream Bi-colour #63050/13050
Sweet and early! This Normal Sugary hybrid variety is tolerant of cold temperatures. Well-filled 7.5-8" ears with 14 rows of sweet bi-colour kernels are produced on strong, 72" stalks. This sweet and tender variety is packed with flavour and is extremely popular with home gardeners across Canada. Matures in 70 days.

SUGARY ENHANCED VARIETIES (SE)

Luscious Bi-colour #13260
The name says it all! Our Trials Staff always raves when Luscious is harvested. A hybrid producing attractive, blunt, 8" ears bursting with 16 rows of rich-tasting bi-colour kernels. Tall, 78" plants with a high ear set make picking easy. Maturity in 75 days. Treated seed.

My Fair Lady Organic Bi-colour #40378
Short but mighty! My Fair Lady Organic produces single-stalked plants that grow 60" tall. Delicate ears are 7-8" and filled with tender, sweet kernels. Low-input cultivation and high quality, My Fair Lady makes a great side dish for any summer meal! Maturity in 75-80 days.

SYNERGISTIC VARIETIES (SY)

Allure Bi-colour #13222
VESEYS TOP PICK! Crisp and juicy. The sweet 'allure' of freshly picked corn will make you want to eat more than just one cob! Allure has 7-8" cobs with 16 rows of delicious flavour. It is quick and easy to pick as it stands high on a strong stalk and will supply you with a great yield. Grows to 82" tall. Maturity in 70 days.

Allure Organic Bi-colour #40375
 Certified Organic Seed.

Café Yellow #63300/13300
Early and bright with exceptional flavour. This early, Synergistic hybrid has excellent cold soil emergence. Produces 7.5-8", 14 row count cobs that are sweet, tender and juicy. The sweet flavour rivals that of main season varieties. Maturity in 65-70 days.

Espresso

Honey Select

Montauk

Sweetness

Temptress

Fiesta

Minor Sweet Baby

Robust 997

Espresso *Bi-colour* #63360/13360
Excellent cold soil vigour. Espresso continues to impress us with its early-season vigour, even under tough conditions. This Synergistic hybrid also produces very large ears for an early variety. Delicious 9" cobs with 16 rows have tapered ends and good tip coverage. In good conditions Espresso will produce two cobs per stalk. Grows to 72" tall. Maturity in 65-70 days.

Honey Select *Yellow* #63270/13270
Best tasting yellow. This AAS Winner is one of the best tasting yellow corn varieties. We've received a lot of rave reviews about this award-winning yellow corn. The flavour, size and appearance make Honey Select simply outstanding. Under good conditions, this variety consistently produces 2 nice cobs per plant. 18-20 rows of crisp, juicy kernels fill very well-covered 8-9" cobs. Maturity in 75-80 days.

Montauk *Bi-colour* #63340/13340
VESEYS TOP PICK! Excellent eating quality. Big cobs and even bigger flavour makes Montauk a real winner. Up to 18 rows of fine, juicy kernels are filled with exceptional sweetness. Large 8-8.5" cobs fill right up to their blunt tips. This hybrid produces tall, strong plants that pick easily. Maturity in 80 days.

Sweetness *Bi-colour* #63410/13410
Exceptional flavour and cold soil vigour. This synergistic hybrid is 72" tall, has an 8" cob, 18 rows and solid tip fill. Excellent emergence and growth throughout the season. Sweetness has a strong and sturdy stalk and a great protective husk. Maturity in 70 days.

Temptress *Bi-colour* #13031
A delicious experience! Temptress combines the quality of flavour and texture from an SE type, with the sweetness from a SH2. Temptress produces 16 rows of translucent kernels on 8" long, blocky, thick ears set high on 77" plants. Treated seed. Maturity in 70 days.

SPECIALTY VARIETIES

Fiesta #13200
Showstopping! Fiesta Corn is a beautiful corn that is not only ornamental but if dried can be ground for cormmeal or popped for colourful popcorn. The ears range from 7-10" of glossy multi-coloured corn that is reminiscent of stained glass. This corn should be isolated from sweet corn to prevent cross pollination. Maturity in 100-105 days.

(H) 25g for \$6.95 (J) 125g for \$10.55
 (L) 500g for \$28.70

Minor Sweet Baby #13280
Baby corn. Minor Sweet Corn is best grown at high density and harvested before cobs are pollinated. They will produce 5-6 cobs on 5-6" stalks. Normally harvest starts after 65 days. Cobs can also be left to mature and dry for popcorn. Approx 50 sds/pkg.

(A) Pkg for \$6.95 (X2) 200 sds for \$12.90
 (X5) 500 sds for \$24.90

Robust 997 POPCORN! #63355
Grow your own popcorn! Robust 997 is a great early yellow popcorn. Vigorous, tall plants form 7.5-8" cobs. Maturity in 110 days.

Tasty Green

CUCUMBERS

When selecting a cucumber variety, choices may seem unlimited. From a wide range of slicing, pickling, fresh eating, large, small or even bite size varieties, all types have that same crisp and delicious flavour no matter what you crave. Cucumbers are also great for growing in greenhouses and are particularly easy to grow in any garden.

BEIT-ALPHA VARIETIES

Beit Alpha #14060
Open pollinated and nearly spineless. This variety is one of the most disease-resistant on the market! A Middle Eastern type, Beit Alpha produces 6-8" fruit that is sweet, crunchy, bitter-free and burpless. The fruit can be harvested at 5-6" for pickling and salads. Maturity 55 days from transplant. Approx. 50 sds/pkg.

Manny Organic #40385
Spineless and burpless! Manny Organic stands out as one of the best yielding, tasting and most versatile varieties of its type. Developed specifically for greenhouse production, it is ideal for those growing in tunnels but also shows excellent results in the open field. This parthenocarpic hybrid sets fruit without pollination. Maturity in 50 days. Approx. 15 sds/pkg.

Growing Cucumbers

Cucumis sativus

Weeks to start ahead:	3-4
Can also direct seed:	Yes
Days to germinate: 5-10, soil temperatures at 18°C+	
Planting depth:	0.5-0.75"
Space between plants:	12-24"
Space between rows:	36-60"
Approx seeds for 50 ft row:	25-50sds
Approx seeds per acre (transplant):	7-15m
Approx seeds per acre (direct seeded) 2x seeding:	15-30m

Martini #14670
High yielding and excellent flavour. An early, continuous producer of 5-6" straight, white-skinned fruit. Martini produces white flesh that is bitter-free, very sweet and crunchy. This hybrid is Powdery Mildew resistant. Maturity in 55 days. Approx. 15 sds/pkg.

BURPLESS VARIETIES

Garden Sweet #14005
Extra sweet, burpless cucumber. Garden Sweet F1 is burpless and offers a delicious, sweet taste. Strong and vigorous plants produce high yields of consistent, 10-12" cylindrical, smooth, thin-skinned, dark green cucumbers. Good resistance to Downy Mildew and Powdery Mildew. Maturity 55-60 days from direct sow. Approx. 60 sds/pkg.

Summer Dance VESEYS TOP PICK! #14040
Very long and thin-skinned. We were very impressed with these early, incredibly crisp, smooth cucumbers. Summer Dance is one of the best-tasting fresh eating cucumbers that we have ever had in our trials. This Japanese burpless cucumber produces heavy yields of long, straight dark green cucumbers that are almost totally spine-free. This cucumber should be trellised. Maturity in 45 days. Approx. 25 sds/pkg.

Tasty Green #14010
Long, sweet cucumbers. Tasty Green is an early, heavy-yielding F1 hybrid Japanese slicing cucumber with good eating quality that is easily digested. Plants benefit from trellising, so the long fruit stays straight. Maturity in 50-55 days until frost. Approx. 50 sds/pkg.

Regal

GREENHOUSE VARIETIES

Carmen **VESEYS TOP PICK!** #14030
European greenhouse cucumber. This parthenocarpic hybrid produces numerous long, shiny, dark green 14-16" fruit with short necks and slight ribbing. Bitter-free. Keep separate from other varieties to avoid cross-pollination. Maturity 65-75 days from direct sow. 5 sds/pkg.

Lisboa #14036
Performance plus. Performs in the greenhouse, high tunnel or in the field. We are really excited about this multi-purpose parthenocarpic slicer cucumber, meaning it will set fruit without pollination. Sets extra early in the field. Dark green 7.5" fruit. Maturity 45-50 days from direct sow. Approx. 5 sds/pkg.

Mini Munch #14038
Super snackable. Mini Munch is crisp and delicious with tender skin and a seedless, juicy interior. The fruit are best harvested when 3-4" long, just right for a tasty single serving. This variety has long vines with minimal branching which makes it excellent for trellising. The vigorous and parthenocarpic plants are very productive, even in cool conditions. Powdery Mildew resistant. Maturity in 50-55 days. Approx. 5 sds/pkg.

Calypso #14310
Exceptional cropping abilities. Calypso is still one of the heaviest producers we've tested. Strong disease resistance to Mildews, Cucumber Mosaic Virus, Anthracnose, Angular Leaf Spot and Cucumber Scab. Calypso produces mostly female blossoms. Maturity in 50-55 days. Approx. 100 sds/pkg.

Corentine #14110
Extra early. European gherkin type. This seedless, burpless hybrid is a heavy producer of pickling-sized 4-6" fruit with dark green skins, short spines and tasty crisp flesh. This parthenocarpic variety needs no cross-pollination and can be grown under row covers right up until harvest for even earlier yields. Exceptional disease resistance. Maturity in 45-50 days. Approx. 25 sds/pkg.

PICKLING VARIETIES

Avenger #14025
Impressive yields with few plants. This gherkin cucumber impressed our Trials staff with its extended and heavy yields. You will find 2-3" fruit being produced at every leaf attachment. Pick 12-24 hours after being pollinated for best flavour and continue pickling to promote a longer harvest window. Maturity 30-40 days from transplant. Approx. 25 sds/pkg.

Regal **VESEYS TOP PICK!** #14320
Hybrid pickler with excellent cropping abilities. This cucumber's attractive appearance and strong disease resistance package make Regal a highly recommended variety for both the home gardener and commercial grower. Slightly longer and slimmer than Calypso. Intermediate resistance to Angular Leaf Spot, Anthracnose, Cucumber Mosaic Virus, Powdery Mildew and Scab. Good brining quality. Maturity in 45-50 days. Approx. 60 sds/pkg.

SLICING VARIETIES

Convoy *NEW!* #14170
Impressive yields. Convoy, while producing a vigorous vine, was one of the best yielding American slicer types in our field trials. Convoy lasted longer and continued to produce more new growth later into the season when other plants were slowing down. Be prepared for plentiful, dark green, 8" fruit! Matures in 40-45 days from transplant. Approx 50 sds/pkg.

Gateway *VESEYS TOP PICK!* #14370
Outstanding fruit quality and Downy Mildew resistance. A very vigorous plant produces beautiful, dark green, high-quality 8.5-9" fruit. This hybrid has intermediate resistance to Downy Mildew and an all-round excellent disease resistance. These plants stay healthy for a long time. Maturity in 55 days. Approx. 30 sds/pkg.

Marketmore - 76 #14610
Standard for late season. Open-pollinated and highly disease resistant. Marketmore produces 8-9" good tasting, crisp, dark green cucumbers. Excellent for late crop when direct seeded outdoors. Maturity in 65-70 days. Approx. 150 sds/pkg.

Marketmore - 76 Organic #40290
 Certified Organic Seed.
 Approx. 60 sds/pkg.

Patio Snacker #14651
American Slicer for containers. A continuous producer, this hybrid is a vigorous yet controlled plant with short branches and high yields. Fruit is 6-8" long, moderately spined and crunchy with a bitter-free peel. Maturity in 55 days. Approx. 15 sds/pkg.

Raider #14630
This is a long time standard that continues to perform well year after year. Raider has excellent flavour and is extremely straight with smooth, deep green skin. This top-quality hybrid cucumber with mostly female blossoms is a high producer, for both home and commercial growers. It is Scab-resistant and tolerant to Mosaic Virus. Maturity in 50-55 days. Approx 50 sds/pkg.

Stonewall #14180
Heavy yielding. This hybrid holds its appearance better than others, stays dark green and does not become oversized. Prolific yields of 8" cucumbers on a vigorous vine. Resistant to Powdery Mildew, Anthracnose, Cucumber Mosaic Virus and Angular Leaf Spot. Maturity in 55-60 days. Approx. 50 sds/pkg.

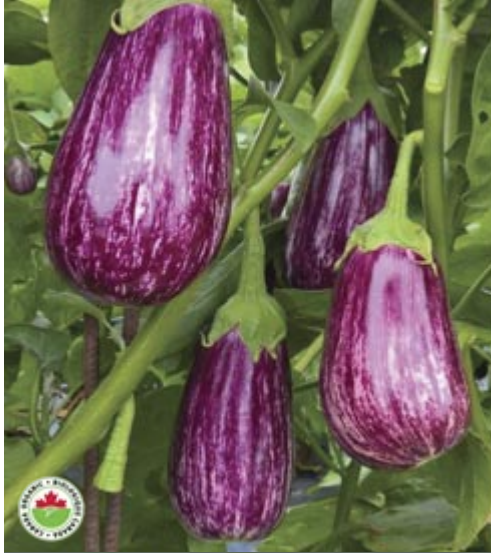

Straight Eight Organic #40040
Vigorous. A very popular variety producing smooth, straight, 8" long, dark green fruit. Continual yield. Excellent fresh eating and pickling. AAS winner. Maturity in 65 days. Approx. 75 sds/pkg.

SPECIALTY VARIETIES

Cucamelon #13995
A novel addition for CSA or market stand. This vining plant also known as Mexican Sour Gherkin is a vigorous climber. Like melons, Cucamelons should be planted indoors 3-4 weeks before last frost and then transplanted out. They produce plenty of 1" miniature, green-striped melon shaped fruit. The crisp fruit has a sweet, almost salty flavour great for snacking, using in salads, stir fries or pickled. Maturity in 65-70 days. Approx. 70 sds/pkg.

EGGPLANTS

Eggplants are commonly used in the famous Mediterranean stew called Ratatouille. Eggplants love the heat and are grown in a similar way as peppers and tomatoes. They are chock-full of nutrition and are extremely versatile. Chop or slice in place of noodles in lasagna or simply add as a new addition to your favourite stir-fry.

Annina F1 Organic #40715

STAFF TOP PICK! Eye catching! Annina has a unique 5-7" uniform, glossy white and purple striped fruit. This early, high-yielding eggplant grows well in both greenhouse and field environment. Annina has proven to be a top choice in a specialty eggplant. Maturity is 75-80 days from transplant. Approx. 15 sds/pkg.

(A) Pkg for \$9.10 (W) 50 sds for \$26.90
(X2) 200 sds for \$75.60 (M1) 1,000 sds for \$294.65

Classic #13918

True to its name! Classic produces 8" typical glossy purple fruit on strong 3' tall plants that produce tremendous yields until frost. This standard will add colour to any barbecue or stir-fry. Maturity is 75-80 days from transplant. Approx. 25 sds/pkg.

(A) Pkg for \$4.55 (X2) 200 sds for \$15.50
(M1) 1,000 sds for \$56.20

Michal Organic #40055

Shiny and firm. This black, shiny, classically shaped seedless variety grows on a vigorous plant which is very productive and easy to harvest. The fruit is uniform in size and is very tasty when stewed, fried or baked. Maturity in 60-70 days from transplant. Approx. 15 sds/pkg.

(A) Pkg for \$6.85 (W) 50 sds for \$19.55
(X2) 200 sds for \$48.75 (M1) 1,000 sds for \$149.55

Miro #13916

Great for pickling! Miro is early producing with 3-4 white fruit per node with calyxes that are nearly spineless. Expect a high yield with production until frost. Maturity is 50-55 days from transplant. Approx. 25 sds/pkg.

(A) Pkg for \$4.55 (X2) 200 sds for \$20.20
(M1) 1,000 sds for \$67.45

Shikou #13917

Dark and glossy. Produces fruit 6-8" long by 1.5" wide, with a thin dark purple glossy skin and bright white interior. These medium-sized plants produce fruit with very few seeds and are easy to prepare - no peeling or salting needed! Great in a stir-fry or sautéed. Maturity is from 70-80 days from transplant. Approx. 20 sds/pkg.

(A) Pkg for \$4.55 (X2) 200 sds for \$20.20
(M1) 1,000 sds for \$67.45

GARDEN HUCKLEBERRIES

Garden Huckleberries #11680

Highly productive. A member of the nightshade family - not a true wild huckleberry. They produce high yields of berries that are great cooked and sweetened. When ripe, berries on these 3' plants will turn from glossy to dull black and begin to soften. Maturity 75-80 days from transplant. Approx. 50 sds/pkg.

(A) Pkg for \$3.40 (X2) 200 sds for \$5.90
(M1) 1,000 sds for \$10.05

GOURDS

Gourds come in all sorts of shapes, sizes, bumps, and humps that are covered with stunning, cheery, bright colours and interesting markings. Which mix to choose? Grow a different variety each season to add interest to your harvest display. Early maturing and long lasting ornamental gourds will bring a smile to anyone's face and are so fun and easy to grow.

Autumn Wings #15790

Wild, winged shapes. Sure to stand out in any autumn display! This unique gourd blend has warts, wings and a curved neck with colours ranging from white to yellow and green, as well as bi-colours. Ranges from 4-12" in length. Maturity in 110-115 days. 25 sds/pkg.

(A) Pkg for \$5.45 (X1) 100 sds for \$10.80
(X5) 500 sds for \$37.00 (M2) 2,000 sds for \$99.25

Beetlejuice Mix #15945

It's Showtime! A wonderful assortment of shapes, sizes, colours and warts that's sure to be a customer favourite. Beetlejuice also has a long shelf life due to its hard shell as well as a strong resistance to Powdery Mildew. Weight of fruit range from 5-15lb. Maturity in 100-105 days. Approx. 15 sds/pkg.

(A) Pkg for \$7.40 (X1) 100 sds for \$27.55
(X5) 500 sds for \$83.80

Growing Kale

Brassica oleracea var. acephala

Weeks to start ahead:	2-4
Can also direct seed:	Yes
Days to germinate: 5-10, soil temperatures at 18°C+	
Planting depth:	0.25"
Space between plants:	6-12"
Space between rows:	20-24"
Approx seeds for 50 ft row:	50-100 sds

Birdhouse #15970

Grow your own birdhouse! A useful, durable gourd which is fun to grow. Harvest when the smooth, greenish rind turns white or starts to brown. Average size 10-12". Maturity in 125-130 days. Approx. 25 sds/pkg.

(A) Pkg for \$5.15 (G) 10 g for \$7.15
(H) 25 g for \$16.80

Caveman's Club #15948

Truly different! This 12-16" gourd produces dark green, ridged, alien-like bulbous fruit that are unlike anything we have seen before! Growing them on a trellis ensures a straight neck. Plant early for best results. Maturity in 120-125 days. Approx. 15 sds/pkg.

(A) Pkg for \$5.65 (G) 10 g for \$12.00
(H) 25 g for \$18.65 (J) 125 g for \$52.20

Galaxy of Stars Mix #15940

The sky's the limit! A unique mixture of gourds that are both smooth and warted, our Galaxy of Stars mix is ideal for your fall display. The 5-pointed fruit are cream, gold, green and orange, ensuring many fall colours for decorations. Maturity in 95-100 days. Approx. 15 sds/pkg.

(A) Pkg for \$6.35 (X1) 100 sds for \$24.00
(X5) 500 sds for \$64.35

Lunch Lady #15971

Pumpkin-sized gourds. Huge 10-20 lb gourds are always the talk of our trials. Lunch Lady's mix of colours and warty appearance will add character to your fall display. All have hard shells and grow on large vigorous vines. Maturity in 110-115 days. Approx. 10-15 sds/pkg.

(A) Pkg for \$5.65 (G) 10 g for \$15.60
(H) 25 g for \$29.15 (J) 125 g for \$79.45

KALE

Kale has really grown in popularity as a healthy green alternative when making salads, smoothies or homemade chips. Long gone are the days when kale was only used for feeding livestock! It is one of the oldest cultivated vegetables as well as among the most nutritious. It is easy to grow, cold hardy and even sweetens in flavour with a touch of frost.

Black Magic #13795

Rich dark colour. New leaves will keep appearing just like magic throughout the growing season, providing you with a continuous harvest. The savoyed leaves can be picked either as a baby leaf or left to fully mature. Sweetens with frost. Excellent cold and bolt tolerance makes Black Magic a favourite. Maturity in 45-50 days. Approx. 200 sds/pkg.

(A) Pkg for \$4.00 (M1) 1,000 sds for \$9.15
(M5) 5,000 sds for \$24.45 (M20) 20,000 sds for \$77.20

Blue Curled Scotch #13780

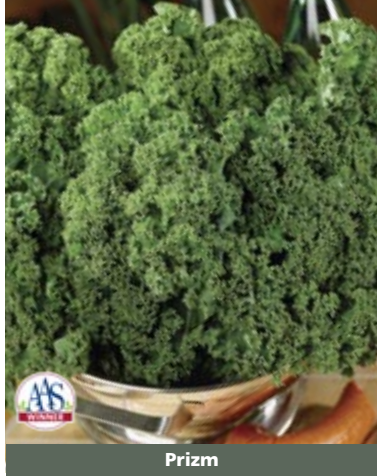

Highly Decorative. Relished by many for boiling or sautéing as greens or chopped fresh like lettuce for salads when young. Maturity in 80-85 days. Approx. 700 sds/pkg.

(A) Pkg for \$3.05 (H) 25 g for \$7.95
(J) 125 g for \$24.45 (L) 500 g for \$51.80

Darkibor Organic #40046

Easy to grow. The darkest of the blue-green kales. Tall, upright plants have finely curled leaves with excellent flavour. Its dark leaves make very nice garnishes. This hybrid variety is well suited for multiple harvests in late summer and fall. Maturity in 75-80 days. Approx. 50 sds/pkg.

(A) Pkg for \$6.30 (X3) 300 sds for \$20.90
(M1) 1,000 sds for \$59.00 (M5) 5,000 sds for \$173.55

Prizm

Redbor

Winterbor

Konstance

Kossak

Giant Musselburgh

Lancelot

Rally

Prizm #13770

Compact growth. Harvest early and often! Compact and performs equally well whether grown in a container or in the garden. The tender, green, tightly ruffled, almost stemless leaves have a distinctive nutty flavour. This hybrid will re-leaf quickly if harvested when young leaves are as small as 4" long, or it can be left to produce full-size leaves. AAS winner. Maturity in 55-60 days. Approx. 50 sds/pkg.

(A) Pkg for \$5.15 (M1) 1,000 sds for \$45.80
(M5) 5,000 sds for \$155.90
(M20) 20,000 sds for \$496.45

Redbor #13690

Stunning colour! The beautiful dark red colour of this hybrid will make a lasting impression in any garden whether grown as a green or as a centerpiece. Adds a crisp texture to salads and is ideal for making kale chips. Cool weather will bring out colour and flavour. Maturity in 55-60 days. Approx. 50 sds/pkg.

(A) Pkg for \$7.65 (X3) 300 sds for \$27.10
(M1) 1,000 sds for \$80.20 (M5) 5,000 sds for \$278.40

Winterbor #13790

Tall, dark green hybrid that is very easy to strip. Excellent frost tolerant characteristics. A high-yielding proven performer. Maturity in 80-85 days. Approx. 100 sds/pkg.

(A) Pkg for \$5.65 (M1) 1,000 sds for \$34.30
(M5) 5,000 sds for \$126.80
(M20) 20,000 sds for \$419.25

KOHLRABI

Both gorgeous green and purple coloured varieties will intrigue your tastebuds. Similar in sweet flavour to turnips but also complimented with a slight peppery taste which, in addition to its unique shape, sets it apart from all other vegetables. Easy to grow, crisp and delicious when eaten raw or cooked.

Konstance #13805

Great for snacking. Konstance is an improved variety of Kolibri with better uniformity, more upright foliage and strong tops. The leaves have a purple hue that creates a beautiful display. Cut into thin strips like carrot sticks and you can have a tasty and healthy snack for your kids lunch! Resistant to Fusarium Yellows. Maturity in 50-55 days. Approx. 50 sds/pkg.

(A) Pkg for \$6.50 (X2) 200 sds for \$16.95
(M1) 1,000 sds for \$55.05 (M5) 5,000 sds for \$178.40

Kossak #13802

Huge but crisp. This large, white-skinned hybrid will definitely inspire your tastebuds whether used in coleslaw, sliced fresh on a veggie tray or cooked in soups and stews. As it continues to grow it will remain tender without getting pithy or hollow. Kossak also has excellent storage capabilities and is easy to grow as an early or late planting. Maturity in 65-70 days. Approx. 50 sds/pkg.

(A) Pkg for \$6.65 (X2) 200 sds for \$18.05
(M1) 1,000 sds for \$58.40 (M5) 5,000 sds for \$186.85

LEEKS

Like onions, leeks are considered a root vegetable and have great flavour that can give your homemade soup recipe a special touch. Leeks have a unique root that forms a large, straight shank, unlike onions that form a bulb. Due to its mild flavour, people who don't like onions tend to like leeks.

Giant Musselburgh HEIRLOOM #13820

Old time favourite. Delicious and mild-flavoured. Thick stems are used as an autumn or winter alternative to green onions. Maturity in 100-105 days. Approx. 500 sds/pkg.

(A) Pkg for \$3.05 (F) 5 g for \$5.20
(H) 25 g for \$14.85 (J) 125 g for \$36.70

Lancelot #13960

Upright blue-green leek. Lancelot produces white stalks up to 12-14" long. This autumn-type, open pollinated variety is very uniform, has good virus tolerance, bolt-resistance and is winter hardy. Maturity in 100-105 days. Approx. 300 sds/pkg.

Unpelleted

(A) Pkg for \$5.65 (M1) 1,000 sds for \$11.40
(M5) 5,000 sds for \$41.15

Pelleted

(P1) 1,000 sds for \$9.95 (P5) 5,000 sds for \$38.45
(P20) 20,000 sds for \$111.80

Rally #13830

Vigorous hybrid leek. Early and productive hybrid. Long, heavy blue-green shanks have excellent uniformity. Hybrid leeks are much more uniform and vigorous than open-pollinated varieties. This summer variety is very easy to peel. Maturity in 80-85 days. Approx. 25 sds/pkg.

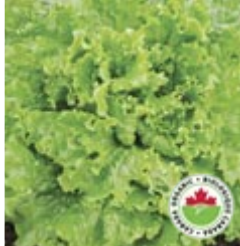

(A) Pkg for \$5.45 (X2) 200 sds for \$17.95
(M1) 1,000 sds for \$68.75 (M5) 5,000 sds for \$222.75

LETTUCE & GREENS CRISPHEAD VARIETY

Tombstone #15237
Perfect for packing! Tombstone is the perfect iceberg for shipping due to its uniform head size and smooth ribbing which leads to less damage. Tombstone's early maturity leaves potential for succession planting. This medium sized crisp lettuce matures in 65-70 days. Pelleted seed. Approx. 500 sds/pkg.

(A) Pkg for \$5.15 (M5) 5,000 sds for \$25.60
(M20) 20,000 sds for \$87.95
(M40) 40,000 sds for \$143.90
(M80) 80,000 sds for \$241.55

Yucaipa VESEYS TOP PICK! #15240
Attractive, large, firm iceberg. Uniform, compact heads are non-bitter and slow bolting with a nice, crisp texture. Yucaipa has a strong tolerance to both Tipburn and rib discolouration. Highly suitable for commercial production. Maturity in 70-75 days. Approx. 600 sds/pkg. Available as pelleted seed only.

(A) Pkg for \$5.15 (M5) 5,000 sds for \$47.85
(M20) 20,000 sds for \$99.50
(M40) 40,000 sds for \$167.15
(M80) 80,000 sds for \$284.05

LEAF VARIETY

Bergam's Green Organic #40072
Slow to bolt. This traditional full sized Greenleaf lettuce has dark green savoyed leaves and sweet flavour even in hot weather. They are very uniform in size and mature in 45-50 days. Approx. 100 sds/pkg. Pelleted Seed.

(A) Pkg for \$5.65 (M3) 3,000 sds for \$21.55
(M20) 20,000 sds for \$108.40

Black Seeded Simpson HEIRLOOM #15410
Our earliest leaf lettuce. Loose, light green crinkly leaves retain their crisp, tender eating qualities longer than other leaf lettuce varieties. Extra early maturity at 27-32 days for baby leaf, 45-60 days for full size. Approx. 1600 sds/pkg.

(A) Pkg for \$2.60 (H) 25 g for \$4.10
(J) 125 g for \$8.85 (L) 500 g for \$20.45

Black Seeded Simpson Organic #40050
Certified organic seed. Approx. 1,600 sds/pkg.

(A) Pkg for \$3.70 (H) 25 g for \$17.50
(J) 125 g for \$51.05

Canagio NEW! #15244
Best of both worlds! Canagio produces a rosette head, made up of green and white leaves. The leaves have a buttery texture with a nice crunch, with a sweet flavour, bringing the best qualities of leaf lettuce and butterheads together! Leaves easily separate from the head and are instantly the perfect size for salad mixes, burgers, or sandwiches. Matures in 45-50 days from transplant. Approx. 50 pellets/pkg.

New Red Fire #15231
The standard for red leaf lettuce. New Red Fire is a dark red ruffled leaf lettuce, that can stand heat and cold. This early maturing uniform lettuce is slow to bolt so has a long harvest window. The full-sized plants have crisp sweet leaves ready in 55-60 days. Pelleted seed. Approx. 500 pellets/pkg.

(A) Pkg for \$5.45 (M5) 5,000 sds for \$25.60
(M20) 20,000 sds for \$74.50

Tango #15820
Highly fringed leaves. Tango is a curled leaf lettuce with a crisp texture. An excellent choice for home gardeners, commercial growers and specialty fresh markets. Great in custom mixes. Maturity 50-55 days from direct sow. Approx. 500 sds/pkg.

(A) Pkg for \$2.60 (G) 10 g for \$4.75
(H) 25 g for \$8.10 (J) 125 g for \$22.65
(L) 500 g for \$55.10

EZ-LEAF/ONE CUT

Brentwood Organic #40626
Simplify and speed up baby leaf production with our One-Cut Lettuce! This bright red Tango-type is a perfect complement to EZtron. Striking contrast between Brentwood's red tips and bright green heart. Wonderfully soft texture and finely rippled leaf edges. Pelleted seed. Approx. 50 pellets/pkg.

EZtron Organic #40628
A green tango-type with wispy, serrated leaves. Medium to large size with superior texture and crunch. Adds lofty volume and texture to salads. Pelleted seeds. Approx. 50 pellets/pkg.

Muir Organic NEW! #40618
Your sandwich needs this lettuce! Trials staff were blown away by the sweet taste of Muir, and its crunchy texture, adding more and more to sandwiches and wraps. Not only is it good tasting, the heads hold well in field and keep well in the fridge. Matures in 40-45 days from transplant. Approx. 50 pellets/pkg.

One-Cut Organic Mix #40624
Delicious and functional. Simplify and speed up baby leaf production with our One-Cut Lettuce! These Organic varieties combine all the benefits of growing head lettuce into baby leaf growing. Once the heads have reached maturity, a single cut produces a mass of beautiful, deeply textured leaves. The increased weight improves yield and the leaves hold up much longer after harvest than traditional baby leaf varieties. All varieties below are matched for leaf size and maturity to give you the edge on your market sales. Pelleted seed. Approx. 50 pellets/pkg.

Rhone Organic NEW! #40629
Delicious and functional. Rhone is the lettuce with a perfect balance of flavour, and ornamental and growing properties. Flavour is sweet, crunchy, and is slow to bitter. The leaves are red at the tips with a blanched green colour towards the centre. And plants are bolt tolerant while also being resistant to most Downy Mildew races. Matures in 50-55 days. Approx. 50 pellets/pkg.

Lolla Rossa Organic

Edox

Little Gem Pearl

Boronda

Green Forest

Parris Island Cos

Pomegranate Crunch Organic

Speckles Organic

Valley Heart

RED LOLLO

Lolla Rossa Organic #40610

This cut-and-come-again lettuce adds lots of visual interest and volume to salads. Lolla Rossa is a delicately flavoured lettuce that can be picked at the baby leaf stage and right through to maturity at 60-65 days. Approx. 2000 sds/pkg.

(A) Pkg for \$4.55 (G) 10 g for \$22.80
(H) 25 g for \$35.00

BUTTERHEAD

Edox **STAFF TOP PICK!**

#15241

Crisp and subtle flavour. Edox has clear burgundy and bright green colours with a full tight head of soft thick leaves. This lettuce is reliable and consistent as an early and late harvest. Resistant to Downy Mildew and Lettuce Mosaic Virus. Maturity in 55-60 days. Approx. 250 sds/pkg.

(A) Pkg for \$4.05 (D) 2 g for \$17.05
(G) 10 g for \$80.00

ROMAINE

Boronda **NEW!**

#15315

Strong performer. Boronda is one the best romaine that fits everyone's needs. 7" Hearts are strong, dense, and store well, while also tasting exceptional. Plants also grow well during periods of cool weather, perfect for romaine lovers looking to plant 7-10 days earlier. Available as pelleted seed only. Matures in 50-60 days from transplant. Approx. 250 pellets/pkg.

(A) Pkg for \$6.50 (M5) 5,000 sds for \$54.90
(M20) 20,000 sds for \$121.50

Green Forest

#15270

Unbelievable yield and performance. Partially savoyed leaves are tender and mild with a crisp and juicy midrib. Green Forest is suited to many growing conditions and has a strong tolerance to Tipburn and bolting. Very upright plants. Maturity in 70-75 days. Pelleted seed. Approx. 250 pellets/pkg.

(A) Pkg for \$4.90 (M5) 5,000 sds for \$46.65
(M20) 20,000 sds for \$98.35
(M40) 40,000 sds for \$163.85
(M80) 80,000 sds for \$280.15

Little Gem Pearl

#15520

Makes a perfect salad for two. Little gem is known for its sweet flavour. The early, compact heads with medium green, glossy, semi-savoyed leaves are best harvested when 6" tall but can be left until 10". They look like a baby romaine, but the excellent flavour and crunchy texture are butterhead. Maturity is 70-75 days. Approx. 1000 sds/pkg.

(A) Pkg for \$2.90 (G) 10 g for \$8.35
(H) 25 g for \$11.10

Parris Island Cos

#15320

Long time favourite. Especially noted for its crisp leaves and sweet flavour. Attractive, uniform heads are large with deep green outer leaves protecting the creamy white heart. Maturity in 70-75 days. Approx. 1600 sds/pkg.

(A) Pkg for \$2.90 (G) 10 g for \$5.70
(H) 25 g for \$8.10 (J) 125 g for \$22.65
(L) 500 g for \$49.60

Parris Island Cos Organic

#40070

Certified organic seed. Approx. 1600 sds/pkg.

(A) Pkg for \$3.40 (H) 25 g for \$17.50
(J) 125 g for \$55.60

Pomegranate Crunch Organic

#43415

Great looks and taste. These miniature Romaine heads have deep burgundy leaves with a speckled green-red interior and are sure to add pleasing colour to any salad or burger. Good disease resistance package. Matures in 50-55 days. Approx. 50 pellets/pkg.

(A) Pkg for \$4.25 (X5) 500 sds for \$10.80
(M3) 3,000 sds for \$34.95

Speckles Organic

#40435

Eye catching. Rounded, green leaves mottled with burgundy, Speckles is far from your ordinary salad lettuce! This open pollinated looseleaf lettuce is good for container gardening. Maturity in 45-50 days. Approx. 1000 sds/pkg.

(A) Pkg for \$3.15 (G) 10 g for \$13.15
(H) 25 g for \$29.15 (J) 125 g for \$81.70

Valley Heart **STAFF TOP PICK!**

#15310

Multi-use Romaine. This medium dark green romaine lettuce has large slightly savoyed leaves, well suited for home gardeners or commercial production. It has good tolerance to cold, heat and bolting. Valley heart has good uniformity maturing in 75-80 days. Approx. 250 pellets/pkg.

(A) Pkg for \$5.45 (M5) 5,000 sds for \$49.00
(M20) 20,000 sds for \$115.70
(M40) 40,000 sds for \$218.50
(M80) 80,000 sds for \$327.75

MICROGREENS & SHOOTS

Microgreens and shoots are tiny, delicate, incredibly flavourful salad greens, that are an easy and economical way to grow your very own vitamin packed fresh food all year round! Grow microgreens and shoots in a shallow soil-filled tray and place in as much light as possible. The microgreens are then allowed to grow until they have between one and two true sets of leaves. For shoots, allow them to grow 3" tall and then harvest. Harvesting is quick and easy by simply snipping off the seedlings with scissors just above the soil surface.

SALAD VARIETIES

Arugula Organic #40075

Cold tolerant. A pungent, peppery tasting green that has a wide range of uses. There is always room for arugula in salads, pizza, and other Mediterranean dishes. Be sure to add arugula to your next meal for an added touch! Matures in 40-50 days. Approx. 500 sds/pkg.

Astro Arugula #13750

The king of gourmet salad greens. Astro Arugula is a hardy plant with a crisp, succulent texture. The nutty flavour grows more peppery in hot weather. Maturity in 35-40 days for baby, and 50-55 days to full size. Approx. 2000 sds/pkg.

Asian Stir-Fry Mix EXCLUSIVE #15461

Hardy with a fine peppery flavour. This Vesey's exclusive is an attractive blend of greens sure to add great flavour to stir-fries, sautés or salads with its abundance of flavours, textures and colours. It includes a variety of Asian greens, mustards and kale that will re-grow after being harvested. Ready in just 35 days for baby leaf size, 45 days for full leaf size. Approx. 400 sds/pkg.

Bull's Blood HEIRLOOM #11980

Dual-purpose heirloom. Deep red leaves are sweeter than radicchio and the young tops make an attractive addition to salad mixes. The scarlet roots are uniform with a sweet, wholesome flavour and best when harvested young. Maturity in 35-40 days for baby leaf, 55-60 days for roots. Approx. 250 seeds/pkg.

Corn Salad/Mache #13730

A popular miniature gourmet salad green. Dark green, round leaves form delicately nutty-flavoured fancy rosettes. Early, very productive and bolt resistant. Maturity of 45-60 days. Approximately 350-400 seeds/pkg.

Indigo Radicchio #13930

Very reliable producer. Crisp, dark-red leaves on 4-5" heads add sophistication to a salad. Indigo is a strong performing radicchio in both hot and cool weather but likes cool weather best. Maturity is 65-70 days. Approx. 50 sds/pkg.

Mizuna #13710

A slender leafed and mild-flavoured salad green. Will re-grow when cut. Approx. 1000 sds/pkg.

Red Giant Mustard Organic #40635

An attractive zesty mustard with reddish-purple leaves and green midribs. This hardy mustard is ideal for baby leaf salads and stir-fries. Maturity for baby leaf is 21 days, full leaf is 45 days. Approx. 450 sds/pkg.

Ruby Streaks Mustard #13650

Attractive mustard with fern-like leaves ranging in colour from dark green to burgundy. Very similar to Mizuna with a nice mild flavour this open-pollinated variety is slow to bolt. Harvest at 20-25 days for baby leaf and 40-45 days for full size. Approx. 1000 sds/pkg.

Tatsoi #13640

Popular and versatile. A popular oriental green with thick, spoon shaped leaves. Tender and flavourful. Approx. 800 sds/pkg.

Tokyo Bekana Mustard NEW! #13655

Amazing raw or cooked. This is an Asian green in the mustard family, but often referred to as non heading Chinese cabbage, that can be used as baby green at 18 days or full size at 45 days. It is similar to lettuce in texture with light green frilly leaves. Approx. 450 seeds/pkg.

Wasabi Mustard NEW! #13652

Quick growing. Wasabi Mustard Greens are a nice addition to any greens mix. Leaves are spicy with a little kick. 20-25 days to maturity for baby leaf, 40-45 days for full size. Approx. 750 sds/pkg.

MELONS

Richly packed with vitamin C, Melons are actually part of the gourd family, however melons are edible and deliciously sweet. Early maturing varieties of musk, galia and watermelon types can even be grown in cooler climates when started indoors. There is nothing more refreshing on a warm summer day than melon picked fresh from the garden!

CANTALOUPE

Goddess #15631
Early and big. This early hybrid has exceptionally sweet, juicy flavour. It has medium-orange flesh with a small seed cavity, surrounded by a firm outer coating. These 4-6 lb oval fruit are sure to be a success in your garden. The strong foliage has resistance to Powdery Mildew and Fusarium Wilt. Maturity 75-80 days from transplant. Approx. 20 sds/pkg.

Halona VESEYS TOP PICK! #15950
Exceptional flavour. This hybrid produces heavy yields of early maturing 4-5 lb fruit with sweet flesh and aroma. Halona has intermediate resistance to Fusarium Wilt and Powdery Mildew. Maturity is 75 days from transplant. Approx. 30 sds/pkg.

Pixie #15635
Personal sized melon. This personal sized 1.5-2 lb melon is the perfect solution for a sweet juicy snack. The melon has thick orange walls around a small seed cavity. Packed with great flavour, Pixie is ideal for shorter growing seasons as it matures in 70-75 days from transplant. Approx. 15 sds/pkg.

Sarah's Choice #15650
Extra sweet. This medium sized melon was one of the sweetest and most flavourful in our trials. Sarah's Choice is a hybrid variety with vigorous vines producing numerous juicy, 3 lb oval fruit. It has intermediate resistance to Fusarium Wilt and Powdery Mildew. Matures in 70-80 days from transplant. Approx. 20 sds/pkg.

Summer of Melons EXCLUSIVE #15632
Best for the home gardener. This blend is the ideal solution to stretch out these beautiful summer flavours. It begins with sweet, early maturing hybrid varieties then keeps going through summer and into early fall. Maturity ranges from 75-85 days from transplant. Approx. 20 sds/pkg.

GALIA MELONS

Mini Mist #15642
Small, dense and sweet. Mini Mist is a mini, hybrid Galia melon with round, dense 1.5-2 lb fruit that are green fleshed and very sweet. The exterior has fine netting with a green background which turns golden at maturity. It has tolerance to Powdery Mildew. Matures in 70 days from transplants. Approx 20 sds/pkg.

WATERMELON

Mini Love NEW! #15751
AAS Winner. Excellent flavour. An early personal sized watermelon with bright red flesh. This hybrid is compact making it great for small space gardening and is capable of producing up to 6 fruit per plant. Powdery Mildew resistant. 7-9 lb fruit. Matures 70 days from transplant. Approx 10 sds/pkg. Plus pollinator seed.

Ruby #15890
Red seedless, with crisp flesh. This hybrid produces superb tasting seedless sweet crisp, deep red 10-14 lb melons on vigorous vines. Ruby, like all seedless varieties need a pollinator. Maturity of approximately 80 days after transplant. Treated seed only. Approx. 5 sds/pkg. Plus pollinator seed.

Sugar Baby VESEYS TOP PICK! #15720
An early, small-fruited 'ice-box' type. This picnic melon with bright orange-red sweet, crisp flesh has a thin, dark green rind that is hard and not easily damaged. Fruit is round, 6-8" in diameter, weighing from 5-8 lb making it ideal to take anywhere for a snack. Maturity is 75-80 days from transplant. Approx. 85 sds/pkg.
(A) Pkg for \$2.60 (H) 25g for \$5.60
(J) 125g for \$14.85

Sunsugar #15725
Widely Adaptable. Like the name says these watermelons are a summertime sugary treat. This vigorous vined melon grows 15-18lb elongated blocky fruit, of excellent eating quality. Intermediate resistance to Fusarium Wilt. Matures in 80-90 days from transplant. Approx. 20 sds/pkg.
(A) Pkg for \$5.35 (F) 5g for \$13.75
(H) 25g for \$35.95

Tom Organic #40745
Extra crisp organic watermelon. This beautiful light green melon with dark green striping has a crisp, sweet flavour and is dense, with a fine-grained texture. Tom is an organic seed watermelon that produces lots of 5-10 lb fruit, perfect sized for a picnic. This watermelon matures in 80-85 days from transplant. Approx. 10 sds/pkg.

Tropical Sunshine RZ NEW! #15735
Sweetness that'll sweep you away! Tropical Sunrise is a high-sugar-content watermelon with lovely yellow flesh! The 11-13 lb, seedless fruit are sure to be a hit at any picnic or roadside stand. Matures in 80-85 days from transplant. Approx. 5 sds/pkg. Plus pollinator seed.

Yellow Doll STAFF TOP PICK! #15730
Sweet yellow flesh. Yellow Doll is a bright lemon-yellow, with a dense, crisp texture. Yellow Doll proves watermelon do not have to be red to be delicious. Average fruit of 3-5 lb matures in 75-80 days from transplant. Approx. 15 sds/pkg.

OKRA

Jambalaya #13902
An early maturing hybrid that is adaptable for a northern climate. Jambalaya grows on a compact plant that provides high yields of shiny, dark green pods. Okra is easy to grow and delicious in Cajun stews. For best flavour, pick pods when they are 3-4" long. Days to maturity 50-60 days from transplant. Approx. 20 sds/pkg.
 (A) Pkg for \$4.00 (F) 5 g for \$9.20
 (H) 25 g for \$25.90

ONIONS

Whether harvested as green onions to add to your salad or grown as mature storage onions, this superior vegetable is found in most gardens. Get a jump-start on growing by choosing easy-to-plant onion sets or start from seed indoors. Onions of all types add that extra flavour in any recipe you choose and can also be used as a garnish or eaten raw in a salad.

BUNCHING VARIETIES (Seed)

Long White Tokyo #16550
Long-time standard for green onions. Long upright single stalks with dark blue-green tops with little or no bulb. Very tender and tasty stalks of 16-18" perform well even in warmer weather. Well suited for summer or fall bunching. 75 days to maturity. Approx. 900 sds/pkg.
 (A) Pkg for \$3.15 (H) 25 g for \$10.90
 (J) 125 g for \$20.30 (L) 500 g for \$62.95

Red Baron #16650
An attractive truly red bunching onion. For scallions harvest at 12-15" before bulbs begin to form at 65-70 days. If left, they will form round red bulbs with stronger flavour than many red onions. Red baron is well adapted to high density planting. This bunching onion is a great addition for market growers. Approx. 300 sds/pkg.
 (A) Pkg for \$5.30 (M1) 1,000 sds for \$10.45
 (M5) 5,000 sds for \$37.80

Parade #16580
Excellent hybrid variety with vigorous growth. Parade has dark green tops and little or no bulb. Stalks have good green-to-white ratio. Hilling soil up around the plants will encourage the growth of longer, whiter 12-18" stalks. Maturity about 70 days. Approx. 500 sds/pkg.
 (A) Pkg for \$3.30 (M5) 5,000 sds for \$7.90
 (M20) 20,000 sds for \$20.40
 (M100) 100,000 sds for \$66.15
 (M250) 250,000 sds for \$109.15

Parade Organic #40920
 Certified Organic Seed. Approx. 500 sds/pkg.
 (A) Pkg for \$3.70 (M5) 5,000 sds for \$11.95
 (M20) 20,000 sds for \$29.50
 (M100) 100,000 sds for \$110.25

GIANT VARIETIES (Seed)

Globo *STAFF TOP PICK!* #16695
Huge onions! This large straw-coloured hybrid is oval shaped, with excellent flavour. It is very tasty when added raw in salads or cooked in stir-fries or salsa. Days to Maturity 120 days from transplant. Approx. 400 sds/pkg.
 (A) Pkg for \$3.40 (H) 25 g for \$16.95
 (J) 125 g for \$39.55

STORAGE VARIETIES (Seed)

Blush #16691
Jumbo red storage onion. Blush is a unique hybrid variety with brownish-pink skins with light purple rings. These long day onions are sweet with a bit of bite with excellent storage. They are 115 days to maturity after transplant. Approx. 200 sds/pkg.

Cortland Organic #40940
Large onions with nice skin colour. Cortland produces large uniform onions of 3-4" with a nice thick, rich brown skin, which store well into the spring. This hybrid has Fusarium tolerance and matures in 85 days from transplant or 110 days if direct seeded. Approx. 200 sds/pkg.

Expression #16520
Large, mild tasting Spanish onion. This attractive, large, slightly flattened, light brown hybrid stores up to 4 months. Intermediate resistance to Fusarium Basal Rot. Matures in 105 days. Approx. 200 sds/pkg.

Frontier #16542
STAFF TOP PICK! Incredibly strong necks and consistent size. Frontier is a standout variety with our trial staff. Bulbs are golden, large and uniform with small necks that cure quickly. Ideal for fresh and storage markets, Frontier is long day hybrid onion with superb disease resistance. Matures in 100 days from transplant. Also available as treated seed. Approx. 200 sds/pkg.

Oneida

Red Carpet Organic

Red Spring

Talon

Super Star

Ambition

Conservor Organic

Creme Brulee

Oneida VESEYS TOP PICK! #16530
Early yellow storage type. Oneida is an early yellow uniform storage onion that combines excellent yields with intermediate storage potential. This new, early maturing variety has a thin neck, bright golden skin and vigorous tops. Oneida will produce a medium to large round onion. Maturity 100-110 days from transplant. Also available as treated and pelleted treated seed. Approx. 200 sds/pkg.

Red Carpet Organic #40935
Beautiful red onions with good storage potential. Red Carpet is a beautiful globe shaped red onion with good storage potential. This hybrid has good yields and matures in 115 days from transplant. Approx. 200 sds/pkg.

Red Spring #16510
This early maturing globe shaped variety has a fine neck. Nice dark red colour, and medium strong skin. Short to medium storage capabilities. Good resistance to Fusarium and intermediate resistance to Pink Rot. Plant early as transplants to get maximum bulb size and yields. Matures in 90-100 days from transplant. Also available as pelleted seed. Approx. 200 sds/pkg.

Talon VESEYS TOP PICK! #16680
Long term storage onion. Talon is a large hybrid long-term storage dark skinned onion with, a strong root system that helps this variety perform well in dry conditions. Matures in 85 days if transplanted or in 110 days if direct seeded. Approx. 200 sds/pkg.

WHITE VARIETIES

Super Star #16620
Mild, crisp white onions. Super Star is a mild, crisp white, sweet flavoured onion that is the first hybrid onion to ever win an AAS award! This day-length neutral variety produces very attractive globe shaped white bulbs. Not recommended for long term storage. Maturity 100 days from transplant. Approx. 250 sds/pkg.

SHALLOT VARIETIES (Seed)

Ambition #16670
Excellent true shallot from seed. Ambition will produce beautiful 2" round, red/brown skinned shallots with white flesh, and mild flavour. This 'Rose of the Onion Family' is easy to grow. Will store well if kept in cool dry conditions. Maturity is 100 days from transplant. Approx. 150 sds/pkg.
 (A) Pkg for \$6.85 (M1) 1,000 sds for \$16.70
 (M5) 5,000 sds for \$85.60 (M20) 20,000 sds for \$275.90

Conservor Organic #40950
Ideal for storing. This organic French shallot is full of flavour with great yield potential, that is easy to grow and ideal for storage. Elongated 2-3" tear drop easy to peel red-brown bulb with pale pink flesh. Matures in 105 days after transplant. Approx. 100 sds/pkg.

ONION SETS

Gourmet Shallot Onion Sets *NEW!* #19880
Flavourful and sweet. Gourmet Shallot is the perfect way to introduce onion flavour without overpowering the rest of the meal. The pink/purple hue also adds a splash of colour. Best sautéed or used fresh in dishes. Approx. 90 sets/pkg.

(X) pkg for \$6.80 (O) 2.5 kg for \$31.90
(R) 5 kg for \$51.70

Multiplier Onion Sets #19860
Versatile. Each Multiplier bulb produces 6-8 daughter bulbs that grow in a cluster. These can be harvested early for green onions or left to mature into shallot sized storage onions. If stored for the winter they can be replanted next spring to continue to multiply. Approx 10 bulbs/pkg.

(X) pkg for \$6.80 2 pkgs for \$5.85 per pkg
4 pkgs for \$4.95 per pkg

Red Karmen Onion Sets #19840
Red onions from sets. Red Karmen produces high globe shaped onions dark red skin, perfect for salads or sliced on top of burgers. They are earlier maturing and easier to grow than onions from seed with mid term storage. Approx. 90 sets/pkg.

(X) Pkg for \$6.40 (O) 2.5 kg for \$28.90
(R) 5 kg for \$43.35 (S) 10 kg for \$69.95*
(T) 20 kg for \$119.65*

*10kg and 20kg bags are only available for shipping within the Maritime provinces.

Sturon Onion Sets #19850
Earlier and easier than from seed. Sturon is a dual-purpose early onion, it can be harvested for green onions, or left to mature in 80-100 days and cured for long winter storage. They produce a round sweet yellow onion with a bronze-coloured skin. Approx. 90 sets/pkg.

(X) Pkg for \$6.40 (O) 2.5 kg for \$28.90
(R) 5 kg for \$43.35 (S) 10 kg for \$69.95*
(T) 20 kg for \$119.65*

*10kg and 20kg bags are only available for shipping within the Maritime provinces.

Stuttgarter Onion Sets *NEW!* #19875
Favourite of European home gardeners. Stuttgarter produces a yellow fleshed, flattened, globe shaped onion about 2-3" in diameter. Mild flavour. Can be used as green onion or allowed to mature for storage onions. Harvest in August through September. Approx. 90 sets/pkg.

(X) pkg for \$6.40 (O) 2.5 kg for \$28.90
(R) 5 kg for \$43.35 (S) 10 kg for \$69.95*

*10kg bags are only available for shipping within the Maritime provinces.

Purple Stripe, Kuduk #36004
Intense flavour and colour. Purple colour carries through to the cloves. Fiery flavour with a smooth aftertaste. 8-12 cloves/head. Also available as certified organic.

(L) 1 lb for \$32.50 3 lbs for \$83.70
5 lbs for \$121.25 30 lbs for \$619.50

Purple Stripe Organic #36008
Certified organic sets.

(L) 1 lb for \$38.50 3 lbs for \$101.70
5 lbs for \$151.25

Marbled Purple Stripe, Purple Glazer #36003
Best for roasting. This marbled purple stripe holds its flavour and texture when roasted. Sweet and spicy. 5-9 cloves/head.

(L) 1 lb for \$32.50 3 lbs for \$83.70
5 lbs for \$121.25 30 lbs for \$619.50

GARLIC

We offer both spring and fall garlic sets. Fall garlic is planted in September or October, around the same time you would plant tulips. Fall garlic starts to root in the fall and is ready to grow as soon as weather permits in the spring. Fall garlic is much more reliable and productive than spring planted garlic in cooler climates. Shipped in the fall. Your credit card will not be billed until shipping time.

FALL GARLIC SETS

Music, Porcelain #36001
VESEY'S TOP PICK! Big cloves with bold flavour. A hardneck, porcelain garlic with white parchment skin and a slight blush of pink. 4-6 large cloves/head. Hardy and stores well.

(L) 1 lb for \$26.95 3 lbs for \$70.05
5 lbs for \$98.50 30 lbs for \$540.00

Music Organic #36005
VESEY'S TOP PICK! Certified organic sets.

(L) 1 lb for \$38.50 3 lbs for \$101.70 5 lbs for \$151.25

Rocambole, German Red #36002
Rich flavour. A Rocambole garlic with spicy flavour that was brought over by German immigrants. 7-12 cloves/head with a purple and brown skin.

(L) 1 lb for \$32.50 3 lbs for \$83.70
5 lbs for \$121.25 30 lbs for \$619.50

SPRING GARLIC SETS

Spring Garlic #19900
Can be planted in spring. Spring planting garlic is widely used as a healthy and flavourful culinary ingredient. All parts of the young plant can be used like green onions, leaves will turn brown like fall garlic when mature, but will likely only produce one round bulb. Since garlic is a natural pest repellent, it is useful to interplant throughout your garden. Maturity from 60-80 days.

(X) pkg for \$7.75 (L) 500 g for \$18.35
(O) 2.5 kg for \$77.10 (R) 5 kg for \$117.90
(S) 10 kg for \$205.45

Onion Set Information

Our onion sets are graded and stored at proper temperatures until time of shipping to maintain top quality. Onions in 90-100 set packs will be shipped along with other ordered items, weather and supply permitting. Bulk sets (10 & 20kg sizes) will be backordered and shipped separately in time for early spring planting unless we are instructed otherwise. There is no GST or HST on Onion or Garlic Sets.

Arat

Albion

Harris Model

Javelin

Panorama

ROOT PARSLEY

Arat #14835
Super parsley flavour. Arat root parsley grows similar to parsnips with a delicious, nutty, parsley/celery flavour to enhance your soups or stews. Tops can be used for cooking, with a stronger flavour than traditional parsley, 5-8" roots can be stored for several months in cool conditions. Days to maturity 80-90. Approx. 500 sds/pkg.

(A) Pkg for \$3.40 (F) 5 g for \$16.25
 (H) 25 g for \$39.25 (J) 125 g for \$115.50

PARSNIPS

Albion #16740
STAFF TOP PICK!
Among the whitest parsnips we've seen. Albion is a vigorous hybrid with better emergence and canker resistance than older varieties. This sweet tasting parsnip is one of the whitest, it stores well and does not yellow quickly. Maturity is 100-120 days. Approx. 750 sds/pkg.

Harris Model #16810
Long-time favourite. Harris Model is a well established long-time favorite variety, known to most gardeners as the standard by which other parsnip varieties are judged. Smooth, sweet flavoured white 12" roots with fine grained flesh. Maturity approximately 110 - 120 days. Approx. 1000 seeds/pkg.

(A) Pkg for \$2.95 (H) 25 g for \$6.55
 (J) 125 g for \$13.85 (L) 500 g for \$33.70

Javelin #16741
Tasty and sweet. Javelin Parsnip has ivory coloured flesh that is creamy, tasty and sweet. This high yielding hybrid variety produces long, slender roots with shallow crowns. They have good resistance to canker making them excellent for overwintering for spring harvest. Matures in 110 days. Approx. 750 sds/pkg.

Panorama #16904
Fills any market slot. Panorama starts bulky and slowly comes to a taper creating a wedge-shape root with consistent size. Vigorous, 9-10" roots are clean and emerge with a defining white colour that even PEI red soil can't stain. Panorama's multipurpose qualities make it perfect for processing or cello packs. Matures in 110-120 days. Available in untreated pelleted.

Spring

Stanhope

PEAS

Homegrown peas fresh from the garden whether eaten, cooked or raw, always taste best! Plant in early spring as peas grow better when the weather is cool. Taller varieties of both shelling and edible pod types (otherwise known as snap or snow peas), benefit from a fence or string to support the vines, Dwarf varieties are ideal for smaller gardens and don't require support. No garden should be without peas!

SHELL PEA VARIETIES

Dalvaly VESEYS TOP PICK! #67045/17045
Long pods and fast to pick. Dalvaly is a Veseys exclusive with extra long pods filled with at least 10 uniform peas packed full of sweet flavour. Long pods are held upright on a strong stem making for a fast and easy harvest. This mid season grows 28-32" tall and matures in 60-65 days.

 **Dalvaly Organic**
 Certified Organic Seed.

#40450

Growing Peas

Pisum sativum

Can direct seed: Yes
 Days to germinate: 7-10, soil temperatures at 15-18°C
 Planting depth: 0.5-0.75"
 Space between plants: 1-3"
 Space between rows: 24-36"
 Approx seeds for 50 ft row: 125g

Legacy

Good disease resistance for summer growing.

Legacy is able to handle the warm summer temperatures so it is great for summer growing. This productive 24-26" high plant has 3-3.5" pods in groups of 2 or 3 holding 8 peas each making it is easy to pick. It has good disease resistance to Fusarium Wilt, Powdery Mildew and Yellow Bean Mosaic. 65-70 days to maturity.

M-14 Organic NEW!

Strong yielding. M-14 is a main season shelling pea with great yield potential. 3" pods can be found in groups of 2-3 per node and each filled with 8 peas. Pods are light green in colour with a blue/green foliage making harvest a breeze. Matures in 55-60 days.

#67001/17001

Spring

Extra early. Spring is a sweet flavoured pea that is fast growing with good yields and excellent table quality. Dark green 3" pods are filled with 6-7 medium sized dark green peas on 20" vigorous, determinate and very productive vines. Maturity is 50-55 days.

#67210/17210

Stanhope

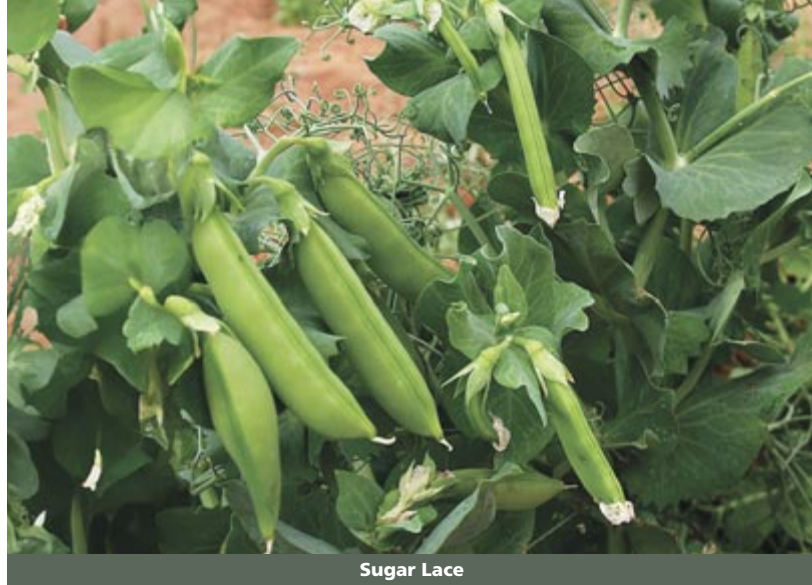

Continuous and high yielding. Stanhope provided one of the highest yields in our pea trials. You can expect 3.5" pods, 2 pods/node, tightly packed with 7-10 peas. Stanhope continues growing flowers and producing pods well into spring and early summer on 24" plants. Matures in 60-65 days.

SNAP PEA VARIETIES

Sugar Magnolia #67185
Tasty and Gorgeous! This beautiful purple snap pea makes an excellent addition to a salad, adding unusual colour and sweet crunch. Harvest pods when they are 2-3" for best eating experience. The plants make excellent living walls, growing to 6-7'. Vines will need support. Pods vary from purple to green. Maturity 70-75 days.

Sugar Lace #67070/17070
STAFF TOP PICK! Fall or spring harvest. Sugar Lace is a strong plant of 30" with 3.5" plump stringless pods on semi leafless plants. These high yielding plants are easy to pick, with 2 pods per node. This variety sets well in either spring or fall and has good disease resistance. Days to maturity 65-70.

Super Sugar Snap #67055/17055
Great flavour and extended harvest. Super Sugar Snap is a sweet snap pea with 4" plump pods that are crunchy with excellent flavour. These 5 - 6' heat tolerance plants require support to produce to potential. Maturity is 60-65 days.

PEPPERS

Choices are endless when it comes to finding just the right pepper (or two or three) for your garden! Sweet peppers and hot peppers come in a variety of different colours, shapes and sizes, and can be added to almost any entrée, or simply just cut up for snacking. They are packed with nutrition, delicious crunchy textures and can easily be grown in a greenhouse, outdoors in your garden or in containers on your patio.

GREENHOUSE VARIETIES

Chesapeake #17375
Greenhouse performer. Chesapeake is an indeterminate sweet blocky pepper, with quick colour changes from green to bright red. Ideal for growing in a greenhouse or high tunnel as it yields over a long period of time. Produces tall plants and should be staked or trellised. Matures in 70-75 days from transplant. Approx. 10 sds/pkg.

 **Sprinter Organic #40126**
Green to red organic. Sprinter is a vigorous hybrid variety producing high yields of green to red organic peppers. Suitable for heated and unheated high tunnels. Blocky, large red fruit with excellent flavour. Matures in 60 days to green and 80 days to red. Approx. 10 sds/pkg.

Growing Peppers

Capsicum spp.

Weeks to start ahead: 6-8

Can direct seed: No

Days to germinate: 7-14, soil temperatures at 18°C+

Planting depth: 0.25"

Space between plants: 18-24"

Space between rows: 30"

Approx seeds for 50 ft row: 18-25 sds

Approx seed per acre: 8-11m

SWEET VARIETIES

Aristotle VESEYS TOP PICK! #17385
Dependable. Aristotle is dependable for production of high yields of large thick-walled blocky fruit, that can weigh up to half a pound. The plant height is between 20-24" and has good resistance to Bacterial Leaf Spot as well as Potato Virus Y. You can expect mature fruit in 70-75 days from transplant. Approx. 10 sds/pkg.

Candy Cane #17410
Ornamental and edible. As ornamental as it is edible with variegated foliage and striped fruit, this unique sweet, thin walled, crispy variety will stand out in containers and gardens. The elongated, 3.5" x 1.75" fruit ripen from green with creamy white stripes to solid red. Matures in 60 to 65 days from transplant. Approx. 10 sds/pkg.

Carmen VESEYS TOP PICK! #17680
First to turn red! Carmen is a sweet Italian frying pepper with excellent flavour perfect for use in salads, grilled, or roasted. This heavy yielding hybrid is an AAS winner developed to set fruit under cooler conditions, so it is a great choice for short season areas. Maturity is 65 days to green and 80 days to red from transplanting. Approx. 20 sds/pkg.

Dragonfly STAFF TOP PICK! #17325
Sweet and colourful. Dragonfly's early production was a standout for our trial staff. Fruit emerges green before turning deep purple. Dragonfly continues to produce fruit into the fall even after temperatures have dropped. Matures in 60-65 days from transplant. AAS winner. Approx. 20 sds/pkg.

Early Summer #17422
Elite, Early, and Extra-Large! Early Summer is an early maturing, yellow bell pepper at 75 days from transplant. The fruit are large at 5" and an elite disease resistance package give Early Summer a winning combination! Approx. 20 seeds/pkg.

Early Sunsatation #17370
Bright yellow and big. Early Sunsatation has thick, juicy walls that stay nice and crisp even when fully yellow. This heavy yielding pepper is highly resistant to Bacterial Leaf Spot. Maturity is 65 days to green, 80 days to yellow from transplanting. Approx. 20 sds/pkg.

 **Escamillo Organic #40390**
Attractive and prolific. A partner for Carmen with the same sweetness, earliness and yield, but with yellow flesh. This hybrid is very productive on medium sized plants, fruit are 6" long by 2.5" wide with similar lobed shoulders. Perfect for salads and roasting. AAS winner. Matures in 60 days to green and 80 days to yellow. Approx. 10 sds/pkg.

New Ace

Orange Blaze

Red Knight XR3

Right On Red

Sweetie Snack Mix

Sweet Sunrise Organic

Fat 'n Sassy *STAFF TOP PICK!* #17540
A customer favourite. Fat 'n Sassy is a customer favourite for its heavy yields of 4.5" thick walled 4 lobed bell peppers with excellent flavour. This hybrid is great for that stuffed pepper recipe, use as green or red. Matures 65 days after transplanting. Approx. 20 sds/pkg.

 **Flavourburst Organic** #40123
NEW! Bursting with colour and flavour! Flavourburst was a standout bell pepper in our trials for its vigour and production into cooler temperatures. 3 lobed Fruit start out lime green but mature into 3-4" elongated bells, turning to deep yellow with hints of orange. Flavour was consistently a favourite of employees. Matures in 65-70 days for green, 85-90 days for yellow. Approx 10 sds/pkg.

New Ace #17430
Extra early. New Ace is an extra early bell pepper that will set fruit in cool weather. The fruit are dark green and medium dark sized with 3-4 lobes, that turn red when ripened. New Ace has vigorous growth and is a heavy feeder. Maturity 60-65 days after transplanting. Approx. 40 sds/pkg.

Orange Blaze #17355
Excellent orange colour and flavour. This bell pepper amazed us in our trials with how early it turned bright orange. A medium-sized hybrid that is high yielding and has a delicious, sweet flavour with a crisp, juicy texture. This compact plant grows 12-14" tall and is ideal for growing in containers. Resistant to Bacterial Leaf Spot, TMV. AAS winner. Maturity of 65 days to green, 80 days to orange. Approx. 10 sds/pkg.

Red Knight XR3 #17555
Red Knight is an improved King Arthur type with big yield potential. This sweet, crimson red, early maturing, blocky bell is delicious with every bite. This compact hybrid has Bacterial Leaf Spot tolerance and wide adaptability. 65-70 days to green and 85 days to red. Approx. 20 sds/pkg.

Right On Red #17420
Perfect for any situation. Right On Red is a crispy, sweet pepper with a flat round shape growing on 18-24" plants. This hybrid pepper is suitable for garden or container growing, and suited for dipping, stuffing, or pickling. You will see Right On Red mature from a beautiful dark green into a brilliant red. You can expect them to start producing fruit earlier than other peppers, maturing at 65-70 days. Approx. 20 sds/pkg.

Sweetie Snack Mix #17330
Sweet-n-Ready! Sweetie Snack Mix offers red, orange, and yellow snacking peppers! This colourful mix is a sweet way to enjoy veggies on the go or while sitting on your patio. Continuous harvest will encourage more production. Matures in 70-75 days from transplant. Approx. 20 seeds/pkg.

 **Sweet Sunrise Organic** #40125
Green to yellow organic. Sweet Sunrise is a stunning dark yellow medium to large slightly elongated bell. This hybrid sweet and fruity flavoured pepper keeps its crispness when fully mature, going from green at 65 days to ripe in 75-80 days. Approx. 10 sds/pkg.

Hot Varieties

Bastan Organic #40401

Poblano Ancho type. Bastan is known as a poblano when used green and an ancho when dried. This dark green, mildly hot pepper is used in chili pepper spice mixes, sauces and for stuffing. Sturdy plants hold abundant 5" fruit well off the ground. Matures in 65 days (green) and 85 days (chocolate brown) from transplant. Averages 1,750 SHU. Approx. 20 sds/pkg.

Cheyenne #17745

Early, prolific, cayenne pepper. Cheyenne is a hybrid medium-hot cayenne pepper producing masses of bright red fruit that are early to mature. Compact plant is ideal to grow in any container and takes up little space in your garden. Excellent addition to spicy salsa. Matures 65 days to green, 80 days to red from transplant. Averages 3,000 SHU. Approx. 20 sds/pkg.

Early Jalapeno Organic #40510

Hot and early. Early Jalapeno produces dark green thick-walled cone shaped 2" jalapeno peppers with a nice amount of heat. Maturity 65 days to green, 85 days to red. Averages 2,500 SHU. Approx. 190 sds/pkg.

Flaming Flare #17391

Spicy and sweet. Flaming Flare is a Fresno pepper that is spicy and sweet perfect for chili. This productive and vigorous plant produces tapered fruit measuring 3.5" long by 1" at the shoulder. They can be picked green, but grow hotter as they ripen. AAS winner. Harvest from transplant is approximately 75-80 days. Averages 800 SHU. Approx. 20 sds/pkg.

Hungarian Hot Wax Organic #40520

Big yields. This classic Hungarian Hot Wax Pepper is an eye-catching hot pepper with a range of lime green to orange and red fruit. The 5" long x 1" thick fleshed fruits are perfect for making pickled hot peppers, frying or adding a spicy kick to your favourite sauce. Maturity 60 days pale yellow to 85 days red. Averages 7,750 SHU. Approximately 50 seeds/pkg.

Mad Hatter #17560

Unique flavour and shape. Mad hatter is a unique pepper in flavour and shape. The mild fruit has a delicate floral scent, with a rich flavour that intensifies and sweetens as it matures. Novel three-sided shape peppers are produced on vigorous, bushy, 48" plants, with up to 40-50 peppers on each plant. AAS winner. Matures in 65-70 days for green, 85-90 days to ripe from transplant. Averages 500 SHU. Approx. 10 sds/pkg.

Pathfinder #17320

Strong plants for cool climates. Pathfinder was a trial staff standout for its strong, heavy yielding plants. Harvest lasted well into the fall with fruit averaging 30g when picked at 5". There were no complaints when growing this serrano pepper! Great disease package against Bacterial Leaf Spot. Matures in 60-65 from transplant. Averages 21,000 SHU. Approx. 20 seeds/pkg.

Primero Red #17371

Earliest ripening habanero type. Primero Red is one of the earliest ripening habanero type with fruit ready as early as bell peppers. Large 2.5-3.5" fruit have about 1/3rd the heat of standard habaneros. Great flavour for fresh salsas and cooking. This field production pepper is also ideal for containers. Maturity from transplanting is 60-65 days to green, 75-80 days to ripe. Averages 50,000 SHU. Approx. 10 sds/pkg.

Ring of Fire Organic #40525

Prolific yields. Ring of Fire is a cayenne chili type pepper with explosive hot flavour in this 4 inch fruit right from the tip, a great addition to any dip. This prolific plant is loaded with glossy peppers that matures as early as 45 days to green and 65 days to red from transplanting. Averages 50,000 SHU. Approx. 20 sds/pkg.

Time Bomb #17392

Great for pickling. Time Bomb is a hot 1.5" red cherry pepper great for pickling, it has a light smoky flavour, and mild heat. This vigorous plant produces a heavy yield of fruit that go from dark green to bright red in 65 days from transplant. Averages 1,000 SHU. Approx. 20 sds/pkg.

Irish Cobbler

Norland

Russet Burbank

French Fingerlings

La Ratte Fingerlings

Purple Peruvian Fingerlings

Red Thumb Fingerlings

Russian Banana Fingerlings

POTATOES

What more can we say? We are from Prince Edward Island and simply love potatoes! Whether you choose white, yellow or blue varieties, potatoes are a 'must-have' in your garden. Many varieties are proven reliable, filled with delicious flavour and offer great disease resistance.

Orders of seed potatoes are **SUBJECT to AVAILABILITY** due to the ongoing restrictions imposed by CFIA. Vesev's Seeds will make every effort possible to supply PEI seed potatoes to our customers and fulfill orders for Spring 2025. Seed potatoes will ship after April 1, 2025.

CONVENTIONAL

Irish Cobbler HEIRLOOM #19960
Excellent flavour in an early potato. Irish Cobbler is the traditional favourite early potato for home gardeners. Very popular for its distinctive taste and dry, creamy, white flesh that boils and bakes exceptionally well. Medium sized, round potatoes with shallow to deep eyes.
(K) 3 lb bag for \$15.50 2 or more bags \$14.25 ea.

Norland #19970
Beautiful red skin. An attractive, medium oblong potato with shallow eyes, smooth red skin and white flesh. Norland is an early to mid season variety which is quite versatile for both boiling and baking. Plants are medium large, spreading with purple flowers. Good disease resistance. Norland is a good storage potato.
(K) 3 lb bag for \$15.50 2 or more bags \$14.25 ea.

Russet Burbank #19950
Best for baking and long storage. Developed by Luther Burbank in 1874 and still regarded among the best. This oblong shaped tuber, sometimes known as 'Netted Gem', has russeted, heavily netted skin. Features shallow eyes and white flesh. Superb baking characteristics and unmatched french fry quality. This is our best storage variety.
(K) 3 lb bag for \$15.50 2 or more bags \$14.25 ea.

Red Thumb Fingerlings #19987
Sweet and unique! These thumb-shaped fingerlings have bright red skin with shallow eyes and unique reddish-pink flesh. The flavour is absolutely delicious! Perfect for roasting topped with your favourite spices but equally tasty just boiled and sprinkled with butter and parsley. Tubers measure approximately 1" diameter by 2-3" long. Mid-season.
(Y) 2 lb bag for \$13.95 2 or more bags \$12.60 ea.

Russian Banana Fingerlings #19980
A specialty potato with culinary quality. Russian Banana produces slender, banana-shaped tubers that are great tasting and ideal for roasting, boiling or baking. The flesh is creamy-yellow, firm and has a mild, somewhat nutty flavour. Moderate resistance to common Scab. Susceptible to Late Blight. This late-season heirloom matures in 105-135 days.
(Y) 2 lb bag for \$13.95 2 or more bags \$12.60 ea.

FINGERLING

French Fingerlings #19977
A popular variety. French Fingerlings are one of the most popular varieties as it is not only attractive with its red skin and yellow flesh, but is also easy to grow and very productive. Great boiled or roasted. Resistant to Scab. Late maturing.
(Y) 2 lb bag for \$13.95 2 or more bags \$12.60 ea.

La Ratte Fingerlings #19978
A specialty potato prized by chefs. La Ratte Fingerlings are a french specialty with a light yellow flesh and a creamy, nutty flavour. Ideal when baked, boiled or in a potato salad. This mid-late season potato matures in 100-120 days.
(Y) 2 lb bag for \$13.95 2 or more bags \$12.60 ea.

Purple Peruvian Fingerlings #19979
Unique qualities. Purple Peruvian Fingerlings have a beautiful deep purple skin and flesh with an earthy, nutty flavour. Medium-large sized fingerling with a fine skin which rarely needs to be peeled. Add a dash of vinegar to retain the bright purple colouring when cooking. Late season variety.
(Y) 2 lb bag for \$13.95 2 or more bags \$12.60 ea.

Captain Jack

Early Giant

Howden

Kratos

Magic Lantern

Neon

PUMPKINS

Pumpkins are fun and easy to grow in both home and commercial gardens. Most commonly grown to be consumed in pies or ornamentally grown to become Jack-O-Lanterns. Pumpkins are available in many different sizes, shapes and colours that makes fall decorating complete. Why not try the fun challenge of growing a giant pumpkin next season? We also have seeds for Jack-O-Lanterns, pie pumpkins, baby pumpkins, novelty pumpkins and white pumpkins.

BABY VARIETIES

Jack Sprat #17935
Jack Sprat is a hybrid, 2-3 lb, deep orange, pie size pumpkin. Remarkable uniformity and high yielding with dark green handles make them ideal for decorating or using in any display. Maturity is 90-100 days. Approx. 20 sds/pkg.

Veseys Baby Jack Mix EXCLUSIVE #17800
A spooktacular blend of mini pumpkins. These white, orange and black pumpkins make a great addition to any fall display or roadside stand. Maturity 90-100 days. Approx. 25-30 sds/pkg.

Growing Pumpkins

Curcubita Pepo

Weeks to start ahead:	3-4
Can direct seed:	Yes
Days to germinate:	7-12, soil temperatures at 18°C+
Planting depth:	1"
Space between plants:	30-36"
Space between rows:	72-84"
Approx seeds for 50 ft row:	15-20 sds
Approx seeds per acre (transplants):	2-3m
Approx seed per acre (direct seeded) double seeding:	4-6m

FIELD VARIETIES

Captain Jack #17730
Extra large! Captain Jack is a tall barrel-shaped pumpkin with large well attached handles. Its flat bottom allows it to easily stand on its own without toppling over. Vigorous, large vines produce superior yields of fruit that weigh 35-45 lb. Intermediate resistance to Powdery Mildew. Maturity of 100-110 days. Approx. 15 sds/pkg.

Early Giant #17947
Early and large! One of the first pumpkins to ripen in our trials! Elongated and blocky, medium-dark orange fruits are uniform in shape and size. Fruit average 25 lb. Stocky handles, light ribs, and long vine habit. Easy to grow and reliable for such a large-fruited type. Powdery Mildew resistant. Matures in 85-95 days. Approx. 15 sds/pkg.

Howden #17880
One of North America's best-selling pumpkins! Howden is high yielding and commonly grown for the Halloween trade due to its deep orange colour and uniform, deep round shape. Weighs from 20-25 lb. Matures in approximately 115 days. Approx. 15-20 sds/pkg.

Howden Organic
Certified Organic Seed.

#40760

Kratos #17941
Large semi-vined pumpkin. Kratos is a large semi-vined pumpkin producing 20-30 lb., medium-dark orange fruit that has a flat-round shape with medium ribbing and large handles. This pumpkin has intermediate resistance to Powdery Mildew. Matures in 95-105 days. Approx. 15 sds/pkg.

Magic Lantern #17940
Powdery Mildew resistant. Magic Lantern is a classy looking pumpkin that grows on a space saving semi-vine plant. It is upright medium sized, brilliant orange with a sturdy dark green handle, weighing 16-24 lb. This hybrid has excellent vigour and uniformity. Intermediate resistance to Powdery mildew. Maturity 115-120 days. Approx. 15 sds/pkg.

Neon #17970
Be the first gardener around with orange pumpkins! Beautifully shaped medium orange pumpkins have a strong dark green handle. This hybrid forms semi-bush plants which don't take up as much space and allows for higher density plantings. Can weigh up to 8 lb with a dark yellow to light orange interior. Maturity ranges from 60-80 days. Approx. 25 sds/pkg.

Show Entries

New Rocket *EXCLUSIVE!* **#17990**
Our best Jack O'Lantern pumpkin for short seasons. New Rocket is our best Jack O'Lantern pumpkin for short seasons with deep orange colour, upright shape and strong handle. This hybrid is a vigorous vine plant with medium to large pumpkins weigh 14-22 lb. Early maturity in about 85-90 days. Approx. 20 sds/pkg.

Orange Sunrise **#17942**
Early field pumpkin. Orange Sunrise is known for being early and perfect for binning. The fruit are 10" tall x 12" in diameter and weigh 12-18 lb. They are bright yellow, maturing into a festive orange, perfect for both home gardeners and commercial growers. Intermediate resistance to Powdery Mildew. Matures in 85-95 days. Approx. 10 sds/pkg.

Racer Plus **#17981**
Early maturing. Racer plus is one of the earliest to mature, with heavy yields of beautiful, 12-17 lb round pumpkins with deep ribs, strong handles and dark orange colour. One of the best pumpkins available for short season growing. Maturity in 85-90 days. Approx. 15 sds/pkg.

Renegade **#17820**
Highly uniform. This hybrid variety produces 2-3 medium large fruit per plant. The highly uniform 14-18 lb fruit are medium veined, thick walled with strong handles. Blocky round, striking rich orange fruit are excellent for the wholesale and roadside markets. Intermediate resistance to Powdery Mildew. Matures in 90-100 days. Approx. 15 sds/pkg.

GIANT FIELD VARIETIES

Atlantic Giant **#18820**
The 'King of all Giants'! These Giant Pumpkins are recording stupendous weights in pumpkin weigh-offs across the U.S. and Canada. The sport of pumpkin growing can be enjoyed by gardeners of all ages. Plant Atlantic Giant and perhaps you could be the next "King of the Pumpkin Patch". Maturity 105-110 days. Approx. 10-12 sds/pkg.

Dilly of a Jack **#18845**
Giant field pumpkin. Dilly of a Jack is a monster field pumpkin that is highly variable in shape and size. Huge dark green handle and a fantastic orange colour. Weighs up to 85 lb. Has good Powdery Mildew resistance. Maturity of 100-110 days. Approx. 10 sds/pkg.

Show Entries **#18840**
Grow a champion! Our famous seed collected from Show Entries of Atlantic Canada weighing 500 - 1000 lb. This seed has the potential to produce the 'big one'. Limited supply... order early! Maturity 105-110 days. Approx. 5 sds/pkg.

PIE VARIETIES

Touch of Autumn #17721

Tremendous pounds per acre. High yielding, Touch of Autumn produces consistent 3 lb fruit with long, strong handles. Fruit is ideal for baking pies or decorating a front porch! Intermediate resistance to Powdery Mildew. Matures in 90-100 days. Approx 30 sds/pkg.

Vendetta **NEW!** #17723

High yielding pie. Vendetta is a wonderful vining, pie type. Fruit weigh 3-5lbs, plentiful, and have a strong handle. A nice pie or tart awaits this dark orange pumpkin! Matures in 100-105 days from transplant. Approx. 15 sds/pkg.

Cider **NEW! #17782**
The perfect pumpkin for fall displays! Cider is a trial staff favourite for its unique colour and consistent size. This vining, jack-o-lantern type weighs 20-30lb with shallow ribs that are evenly spaced, all attached to a thick green stem. Cider has gotten many compliments when paired with other orange, white, and yellow pumpkins. Matures in 85-95 days from transplant. Approx 10 sds/pkg.

Lemonade **STAFF TOP PICK!** #17944

Standout colour! Lemonade was a standout colour to our trial staff with its beautiful golden colour and high yields. The 18 lb fruit firmly attaches to a solid, dark green handle on vining plants. Lemonade formed a striking contrast with oranges and whites in our fall displays! Matures in 95-100 days. Approx. 10 sds/pkg.

New Moon #17710

Big whites! New Moon is a vigorous white pumpkin producing large pumpkins, mostly in the 25 to 35 lb range. This hybrid has thick white flesh. Like other white pumpkins, rind will yellow slightly if left in the sun. Matures in 95-105 days. Approx. 10 sds/pkg.

Popcorn #17785

Just like its name! Popcorn is a yellow/white, elongated pumpkin, covered in warts. The skin starts creamy yellow while the warts turn from white to yellow. Once fully mature the whole pumpkin is creamy yellow, reminiscent of cinema popcorn! This 20 lb fruit fit perfectly into fall displays and add extra interest to market gardens and roadside stand offerings. Matures in 95-100 days from transplant. Approx. 10 sds/pkg.

Porcelain Doll #17750

Unique shape and colour! Porcelain Doll is a unique pumpkin with deep ribbing, a blocky shape and striking pink colour. Its orange flesh is sweet and can be used for pies or soup. Large vines produce excellent yields of 20-25 lb fruit. Intermediate resistance to Powdery Mildew. Maturity is 110-115 days Approx. 15 sds/pkg.

Red & White Mix #17766

Eye catching colour. Red and White mix is an eye-catching combination of beautiful deep orange-red and bright white decorative Cinderella pumpkins. There is something magical about true colour, uniform size and high yields. These flat pumpkins will add a unique accent to any fall display. Days to maturity 105-115. Approx. 15 sds/pkg.

(A) Pkg for \$4.55 (H) 25 g for \$15.15
(J) 125 g for \$51.05 (L) 500 g for \$155.55

Specter **STAFF TOP PICK!** #17795

Truly unique! Specter is a truly unique pumpkin with medium round fruit that are off white and sprinkled with warts. This 15-20 lb decorative pumpkin with a solid shell lasts well into the fall. Intermediate resistance to Powdery Mildew. Matures in 90-100 days. Approx. 10 sds/pkg.

Warty Gnome #17755

Small and Warty. Warty Gnome is a small 4-5 lb, flat-round orange pumpkin with yellow stripes that is sure to stand out in any fall display or market stand. It has Powdery Mildew resistance. Maturity: 90-100 days. Approx. 15 sds/pkg.

SPECIALTY VARIETIES

Blanco #17790

True white coloured mini. Blanco is a mini true white coloured 4-6 lb pumpkin, with shallow ribs, uniform shape, size, and long handles. Unlike others, it shows moderate resistance to colour change when exposed to sun and light frosts. Matures in 90-100 days. Approx. 15 sds/pkg.

April Cross

Red Meat Watermelon

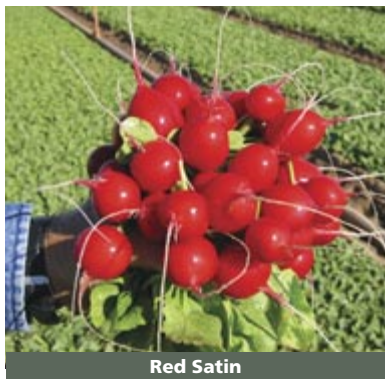

French Breakfast

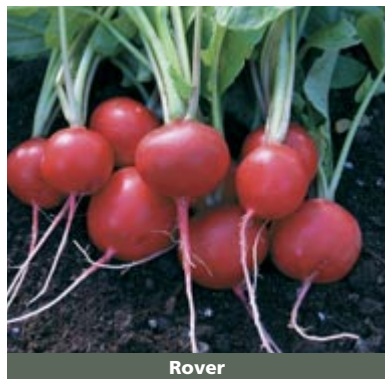

Easter Egg

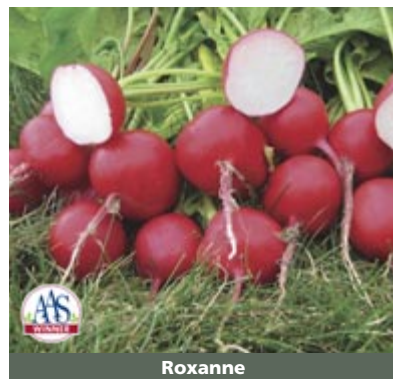

Pearl Organic

Red Satin

Rover

Roxanne

RADISHES

Radishes are amazingly quick to germinate and grow. Their sharp, peppery flavour and crisp, crunchy texture add the perfect finishing taste in any salad. Radish varieties have evolved over the years from a typical round, bright red root vegetable to several different sizes and colours. If you plant the seed early, it will be one of the first vegetables to harvest each season and can also be planted again in late summer.

DAIKON RADISH

April Cross #13590
White, crisp and very productive. April Cross is a hybrid daikon that can reach 12-14" long with a crisp and subtle sweetness excellent for stir-fries or pickles. This beautiful long 2.5" in diameter white root can be stored over winter. Matures in 55-65 days. Approx. 100 sds/pkg.

Red Meat Watermelon #13610
Bright pink interior, sweet mild flavour. Red Meat is an open pollinated radish often called watermelon radish. The unique white skin with attractive green shoulders and amazing dark pink smooth textured flesh is exceptionally mild with a touch of sweetness. Best sown in late summer to avoid bolting, for fall harvest of 2-4" ball shaped radish. Matures in 45-55 days. Approx. 350 sds/pkg

FRENCH VARIETIES

French Breakfast #18280
Unique colouring. French Breakfast has 2-3" long scarlet roots with white tips. The mild delicate flavour make this a favourite for home gardeners. Maturity 28-30 days. Approx. 270 sds/pkg.

Red Satin #18211
Multi-purpose. Red Satin is a hybrid radish that produces uniform, round roots with a bright red colour, extremely white interiors and refined taproots. Excellent holding ability without getting pithy. The medium-sized tops have a strong attachment. A great variety for bunching, cello packs and slicing. Matures in 25-30 days. Approx. 500 sds/pkg.

Rover STAFF TOP PICK! #18201
Performs even under warm summer weather conditions. Rover has a smooth, dark red, uniform root with a crisp white interior that is tasty and mild. Matures in 28-32 days. Approx. 500 sds/pkg.

Roxanne #18250
AAS winner. Roxanne is a great tasting radish that holds well and stays solid even at larger sizes with no pithiness or bleeding. Consistently displays a bright red colour with a creamy white interior. Our trials staff highly recommends Roxanne for its shape, size and uniformity. It matures in 25-28 days. Also available as treated seed. Approx. 500 sds/pkg.

ROUND VARIETIES

Easter Egg #18260
Bright colours. Easter Egg has bright coloured globe-shaped roots in a delightful array of pink, red, lavender, scarlet and white. The interior flesh is crispy and mild. Matures in 28-32 days. Easy and fun for any age to grow. Approx. 400 sds/pkg.

 **Pearl Organic #40100**
Jewel of the soil! Pearl was a standout variety to our Trials Staff. The white skin is durable and not easily cracked, even our red soil could not stain this root! The 1" mild roots have a unique contrast when paired with red radishes. Matures in 35-40 days. Approx. 200 sds/pkg.

RUTABAGA/TURNIPS

There is a difference when it comes to Rutabagas and Turnips. Turnips are bred as a small rooted vegetable that is best in flavour when harvested at about a 2 inch diameter and eaten fresh. Leaves of turnips are also edible and full of nutrition.

Rutabagas may taste similar when compared to turnips, however they are planted in late spring and left to size up and sweeten with cooler temperatures of the fall. Rutabagas have great storing capabilities and are excellent when added to that yummy winter stew.

HAKUREI TURNIP VARIETIES

Fuku Komachi #19610
Slow to bolt. Fuku Komachi, defined as beauty and fortune, perfectly describes this pure white summer hybrid turnip. Thin skinned, globe shaped roots are quickly formed in cool temperatures, with best flavour when harvested at 2" diameter. No peeling required. Larger size roots can also be harvested at later maturity for cooking as it is slow to bolt and roots tend to lack pithiness. Matures in 40-45 days, Approx. 350 sds/pkg.

Growing Rutabaga

Brassica napus var. napobrassica

Weeks to start ahead:	4
Can direct seed:	Yes
Days to germinate: 5-7, soil temperatures at 16-20°C	
Planting depth:	0.25-0.5"
Space between plants:	6"
Space between rows:	24-30"
Approx seeds for 50 ft row:	100 sds
Approx Seeds for acre (transplants):	100-175g
Approx seeds per acre (direct seeded):	150-200g

Tokyo Silky Sweet #19620
Early and sweet. Silky, snow-white roots with a mild sweet delicate texture can even be eaten raw. Uniform roots are best when harvested at 2" are complimented with dark green delicious tops, both taste amazing steamed or eaten raw in a salad. Matures in 35-40 days Approx 350 sds/pkg.

SUMMER TURNIP VARIETIES

Purple Prince #19345
Fast maturing summer turnip. This globe shaped summer hybrid has beautiful bright purple shoulders and white bottom roots. Its smooth, tasty flavour and crispy texture are sure to delight your tastebuds. It has vigorous dark green foliage, which is also suitable for greens. Purple Prince is high yielding and is best to harvest when the roots are 3-6". 55-65 days to maturity. Approx. 650 sds/pkg.

RUTABAGA VARIETIES

Laurentian #19340
Excellent for winter storage. Smooth globe shaped roots have deep purple shoulders and fine-grained yellow flesh. Popular commercial and home garden variety. Not clubroot resistant. Maturity 115-125 days. Approx. 900 sds/pkg. Regular and sized seeds. Treated seed available.

#19350 1/14 Sized Seed:

SPINACH

"Tender, vitamin-rich and simply delicious" basically describes all Spinach varieties. These cool season, leafy greens can be harvested early as a flat baby leaf or you can wait a little longer and harvest any smooth, semi-savory large leaf type as they mature. Spinach can be eaten cooked or raw and is full of vitamins and minerals especially iron and calcium.

Lakeside #18350
One of the best for flavour. Lakeside has thick dark green oval shaped leaves that can reach 6" long x 3" wide. Their upright habit makes it easy to harvest, can be used for baby, bunch or clip production. This mild flavoured spinach has strong resistance to Downy Mildew. Approx. 500 sds/pkg.

Seaside VESEYS TOP PICK! #18320
High volume production. This early season hybrid produces a high volume of spade shaped leaves, a perfect choice for baby leaf growers. These plants produce smooth, upright dark leaves which are thick and succulent. Our trials have proven Seaside to be our best variety for dependable, bolt-resistant production. Medium to high resistance to Downy Mildew. Approx. 500 sds/pkg.

Space #18340
Dependable smooth leaf variety. Space is a dependable medium green, smooth leaf variety. The upright habit makes it easy to clean and fast to harvest. This slow to bolt variety has Downy Mildew resistance. Approx. 500 sds/pkg.

SUMMER SQUASH

Squash is typically separated into winter or summer types. Summer Squash, known as bush types or commonly referred to as 'zucchini', are harvested during the earlier summer months and come in a multitude of shapes, sizes, and colours. Commonly used in stir-fries and even chocolate cake!

SPECIALTY VARIETIES

Cocozelle HEIRLOOM #18605

A tasty and unique open pollinated variety.

Cocozelle is an Italian Heirloom or Romanesco squash that has unique dark and light green stripes. It is flavourful, tender and great for cooking, best harvested at 12-16" long. This open bush type plant produces good yields in 55-60 days. Approx. 30 sds/pkg.

G Star Organic #40556

Green pattypan. G-Star is a green Pattypan type squash with an attractive saucer shape with scalloped edges. Highly productive compact plants produce glossy, dark green fruit. Great sautéed or stir-fried. Best harvested at 2-4". Maturity 55 days. Approx. 15 sds/pkg.

(A) Pkg for \$8.00 (X1) 100 sds for \$36.00
(X5) 500 sds for \$105.10 (M2) 2,000 sds for \$283.85

SPROUTS

Sprouts are truly the ultimate food! Packed full of enzymes, protein, fiber and vitamins, they are an extremely healthy addition to your diet. Growing your own sprouts is also a great way to get your gardening fix throughout the cold days of winter. Easy to grow in mason jars or in one of our handy sprouting kits. Best of all, all of our sprouting seeds are certified organic!

Goldy Organic

Magda #18510
Light green coloured Cousa type. Magda is early yielding, very productive, and produces all season long. Beautiful, uniform 4" fruit with a creamy green colour and succulent, nutty, white flesh can be picked for stuffing or any summer squash recipe. Matures in 45-55 days. Approx. 25 sds/pkg.

Sunburst STAFF TOP PICK! #18570
Yellow patty pan. Sunburst is a hybrid patty pan type squash in a bright yellow colour with a dark green sunburst pattern on both ends. This space-saving bush-type plant will produce tasty baby or full-sized fruit in as little as 45-55 days. Interior flesh is creamy white and tender with a mild, buttery flavour. AAS winner. Approx. 20 sds/pkg.

Summer Surprise Mix #18525
A colour for everyone. A great variety of compact zucchini in one convenient mix. A great mix of colour and mild, nutty flavours ready for eating in 45-50 days. Approx. 15 sds/pkg.

Vegetable Spaghetti #18530
Grow your own spaghetti! This classic Vegetable Spaghetti squash is delicious served with your favorite sauce. When cooked, flesh comes out in long strings that look just like spaghetti. Fruit is cylindrical, 8-10" long, weighing about 3-5 lb. with hard, pale yellow, smooth rind. Maturity 85-95 days. Approx. 30-35 sds/pkg.

Endeavor #18555
Small spined and easy to pick! Endeavor is a vigorous-growing hybrid variety that has the largest yield of small spined medium dark green, glossy fruit. Plants have a nice open habit resulting in an easy harvest of early and steady fruit production. This variety is suitable for many growing areas. Matures in 45-50 days. Approx. 15 sds/pkg.

Golden Delight #18580
VESEYS TOP PICK! Disease resistance and higher yields. Golden Delight Zucchini is a hybrid that produces very uniform golden-yellow fruit with little to no greening. The semi-spineless upright plants are vigorous allowing for easy harvest, ideal for home and market gardeners. They offer an excellent disease package with improved productivity, ready to eat in just 45-50 days. Approx. 15 sds/pkg.

ZUCCHINI VARIETIES

Bossa Nova STAFF TOP PICK! #18560
Superior, sweet taste! Bossa Nova produces beautiful fruit with dark and light green mottled skin, on compact plants. The 6-8" fruit are ready in 50-60 days. This AAS winner has intermediate resistance to Zucchini Yellow and Watermelon Mosaic virus. They also make great fall decorations if left to mature. Approx. 15 sds/pkg.

 **Cash Machine Organic #40545**
Compact plant. Cash Machine is an early hybrid compact upright plant with a semi-open habit resulting in easy picking. They produce large quantities of 7-8" medium-dark green fruit with light flecking. The excellent disease package any early maturing of 40-45 days delivers high yields. Approx. 15 sds/pkg.

 **Goldy Organic #40555**
Organic golden zucchini. Goldy is a compact vigorous plant, with shiny golden skinned fruit ready in 50-55 days. The open growth habit of these almost spineless plants offers easy picking of these uniform delicious fruit. Approx. 15 sds/pkg.

SPAGHETTI VARIETIES

Pinnacle #18185
Perfect size for fresh market and CSA's. Pinnacle is a spaghetti squash with perfect size 3 lb fruit for home gardener, fresh market or CSA's. They ripen to a bright-yellow colour with excellent internal quality. The spaghetti-like strands are fine and have a nice nutty flavour. Semi-bush habit allows for greater yields. Maturity of 80-90 days. Approx. 15 sds/pkg.

WINTER SQUASH

Winter squash are harvested in the fall and store well during the winter months. Whether you use them in soup, baked, roasted, boiled, pureed, steamed or sautéed, you will always find good reason to have several winter squash in your kitchen garden.

ACORN VARIETIES

Baked Potatoes #18672

Warm up the oven! Baked Potatoes is an acorn type squash that has high yields of 6-8 fruit on a compact bush plant. They mature into beige coloured 1-1.5 lb fruit with creamy white flesh in 100-110 days. Approx. 15 sds/pkg.

Celebration VESEYS TOP PICK! #18270

Highly decorative with excellent flavour. Celebration is a highly decorative acorn in beautiful gold with yellow striping and green speckling. It has fine-grained light-yellow flesh that is very sweet. Compact bush plants produce 1.5 lb fruit and do not take over your garden. Powdery Mildew tolerant. 80-90 days to maturity. Approx. 20 sds/pkg.

Mashed Potatoes #18671

A new take on a traditional favourite. Switch up your next holiday meal to include Mashed Potatoes acorn squash! The white exterior and interior closely resembles traditional mashed potato texture and colour when baked and mashed. This compact plant produces 3-4 fruit approximately 1.5 lb maturing in 90-95 days. Approx. 15 sds/pkg.

Heart of Gold #18730

Green and white stripes. Heart of Gold is a semi-bush plant producing heart shaped 3 lb fruit with green and white mottled striping. The sweet tasting flesh is thick, orange and fine grained. This hybrid has high yields and fruit that store well. Maturity in 85-95 days. Approx. 20 sds/pkg.

Table Sugar Organic #40565

Mini acorn squash with higher than average yields. This acorn squash produces glossy dark green ribbed mini squash that weigh 0.5-1 lb. The deep orange-yellow sweet flesh is ideal for an individual serving. Table Sugar is a compact high yielding bush with resistance to Powdery Mildew. Days to maturity 75-80. Approx. 15 sds/pkg.

Taybelle PM #18780

A hybrid heart-shaped winter acorn. Taybelle is a high-quality acorn squash that matures from dark green to jet black colour very early after pollination, permitting an early harvest. The semi bush plant allows for higher density planting and increased yield potential of 2-3 lb fruit. This hybrid has intermediate resistance to Powdery Mildew, stores well, and matures in 70-75 days. Approx. 20 sds/pkg.

BUTTERCUP VARIETIES

Burgess Buttercup #18660
Our most popular winter squash. Dark green fruit weigh 3-4 lb each and have a distinct “cup” on the blossom end. Dry, sweet, rich flavoured, golden flesh make this squash a favourite. Excellent for winter storage and freezing. Maturity is approximately 95-105 days. Approx. 50 sds/pkg.

Burgess Buttercup Organic #40240
 Certified organic seed. Approx. 35-45 sds/pkg.

Delica #18690
Complimentary edible skin. Delica is a full vine kabocha type that is high yielding and uniform in size. Fruit produce flesh that is dry and smooth with a thin edible, dark green, skin. Medium, 3-4 lb fruit store well into late winter. Matures in 90-95 days. Treated seed only.

Sunshine #18601
Bright orange. Sunshine is a bright orange Kabocha type squash that really stands out. It has eye-catching bright red-orange rinds, and the sweet orange flesh is smooth ideal for baking or mashing. The vines are vigorous and produce a great yield of 3-4 lb round squash with a flattened top. AAS winner. Matures in 95-100 days. Approx. 10 sds/pkg.

Sweet Mama STAFF TOP PICK! #18680
Excellent storage kabocha type squash. Sweet Mama is a bush type hybrid squash with excellent winter storage. At maturity fruit will be dark green, with thick, yellow and sweet flavoured flesh that weigh 3-4 lb each. AAS winner. Maturity is approximately 85-90 days. Approx. 15-20 sds/pkg.

Winter Sweet Organic #40566
Fantastic eating quality. Winter Sweet is a Kabocha type squash with fantastic eating quality. This hybrid produces a light grey fruit averaging 4-5 lb. This squash is excellent for storage, flavour is best 2-5 months after harvest. Maturity is 95-100 days. Approx. 15 sds/pkg.

BUTTERNUT VARIETIES

Ceres NEW! #18770
Short season lover. Ceres is one of the earliest butternuts on the market, producing consistent 4 lb fruit with uniform shape and size. Full vining plants are tolerant of Powdery Mildew. Maturity in 90-95 days. Can be directly seeded or transplanted. Approx. 15 sds/pkg.

Prism #18740
Uniform shape and size. Prism is an early classic squash with uniform shape and size. The tan coloured fruit have smooth skin, with fine textured, deep orange, with a sweet rich flavour. They mature to approximately 4.5 lb in 90-95 days. Approx. 15 sds/pkg.

Spellcast NEW! #18755
Something different! Spellcast is a new butternut hybrid squash. Internal flesh resembles that of a butternut, perfect for soups. While great tasting, Spellcast is perfect for decorating. Its flat top and bottom allow for easy stacking on the front deck until ready to consume. Plants are highly productive. Approx. 15 sds/pkg.

Special Export NEW! #18678
High Quality. Special Export is a high-quality squash with many great characteristics. This strong Kabocha type has vigorous vines allowing for high yield potential. The 5lb fruit are slightly flattened at the poles and have strong storage. Treated Seed Only. Matures in 90-95 days.

Tiana Organic #40568
Excellent storage qualities. Tiana consistently produces high yields of 2-2.5 lb blocky fruit, with dark tan coloured skin. The bright orange flesh is sweet with a creamy smooth texture. This hybrid variety keeps for months in storage and has excellent disease resistance. Matures in 95-100 days. Approx. 15 sds/pkg.

Waltham Butternut Organic #40560
Sweet dark yellow flesh fills this heirloom squash. Uniform 3-6 lb fruit are borne on a vigorous vine. Fruit is buff in colour and can store well into the winter. AAS winner. Maturity is from 90-95 days. Approx. 40 sds/pkg.

DUMPLING VARIETIES

Delicata #18602
Unique dumpling variety. Delicata, unlike most winter squash, does not need to be cured, it is ready to use right out of the garden. Each plant produces 5-7 very sweet 1-2 lb fruit each a perfect single serving size to bake or stuff. The skin is cream coloured with dark green longitudinal stripes or specks. 95-105 days to maturity. Approx. 20-25 sds/pkg.

Honeyboat Delicata #18604
Delightfully Delicious! Honeyboat is a delicious high yielding, great storage delicata. The 6-7" fruit cures from yellow to a candy, tan colour. Remove seeds, quarter pieces, toss in oil, and roast, for a sweet tasting, french fry alternative! Matures in 95-105 days. Approx. 20 sds/pkg.

Sweet Dumpling #18700
Excellent flavour. Sweet Dumpling squash are globe-shaped 1 lb fruit (4-5" across) just the right size for a one-person serving. Golden coloured interior flesh is sweet and tasty. Makes wonderful autumn decorations too. Stores well. Maturity is approximately 90-95 days. Approx. 50 sds/pkg.

HUBBARD VARIETIES

Red Kuri (Little Gem) #18610
Deep red colour. This is a very popular and flavourful miniature Hubbard type squash, with vigorous vines that set numerous 8" round, 3-5 lb fruit. The creamy yellow flesh is excellent for pies or vegetable use. They mature in 80-100 days, and have good storage capabilities. Approx. 20 sds/pkg.

Warty Green Hubbard #18620
Huge, dark green squash. Warty Hubbard Squash has a bumpy dark green rind with rich, fine-grained, golden-yellow flesh. These large squash weighing 14-24 lb are late maturing 115-120 days, keep well in storage. Approx. 35 sds/pkg.

ROASTER VARIETIES

Georgia Candy Roaster #18625
HEIRLOOM A totally unique squash. This heirloom banana squash produces large 8-12 lb, 18-24" tan coloured fruit. The orange flesh is delicious when served stuffed, roasted or in a pie. Great storage quality. Matures in 90-100 days. Approx. 15 sds/pkg.

STRAWBERRY SEED

Delizz #18856
Vigorous and tasty! This AAS Winner is one of the best flavoured strawberries from seed. This day-neutral hybrid is very upright with a spread of only 12" per plant making it perfect for containers or small gardens. Each vigorous plant will produce up to 45 bright red, 1-1.5" conical fruit over a three month period. Approx. 10 sds/pkg.

Rainbow Treasure #18855
Very showy! Rainbow Treasure is an ornamental edible strawberry with beautiful spring blooms of white, pink and rose, all on the same plant, followed by juicy, sweet berries. The creeping habit makes a great ground cover but also looks beautiful when grown in containers on your deck. Seeds take 3-4 weeks to germinate. Approx. 15 sds/pkg.

SWISS CHARD

Swiss Chard is well known to provide your diet with essential minerals. Beautiful bright colours of the rainbow can decorate your plate whether you simply bring the chard to a boil or get creative by adding it to lasagna, omelettes or stir-fries. Easy to grow!

Fire Fresh #18405
Good disease resistance. This hybrid variety produces long, oval, medium dark green leaves with bright red stems on moderate to fast growing upright plants. They have high resistance to Leaf Spot and medium resistance to Downy Mildew. Fire Fresh matures in 25-35 days for baby leaf and 50-60 days for greens. Approx. 300 sds/pkg.

Intense #18460
Striking red stems! Intense is a vigorous variety with savoyed dark green leaves, with intense red veins and long bright red stems. Excellent for baby leaf production as well as bunching. Matures in 55-60 days. Approx 350 sds/pkg.

Kaleidoscope EXCLUSIVE! #18450
A rainbow of colours. This superb exclusive mix gives you a rainbow of colours from orange, pink, and yellow to softer greens, whites and bold red. This heavy producer grows back after being harvested for a long season production. Approx. 300-350 sds/pkg.

Lucullus HEIRLOOM #18410
Light green stalks. An old favourite for many customers with its fine quality, light green, deeply savoyed leaves on thick, white, long, smooth stems. Keep cutting regularly and this chard will remain in prime condition over a long period. Maturity is 60 days. Approx. 400 sds/pkg.

Peppermint STAFF TOP PICK! #18425
Great contrast. This tasty swiss chard can be grown for a colourful babyleaf mix or to full maturity in 60 days. Peppermint is slow to bolt. Approx. 200 sds/pkg.

Ruby Red Organic #40311
Very versatile. Ruby Red is a hybrid variety equally suitable for baby leaf, spring mixes and mature greens production. Upright plants produce thick round to oval, medium dark leaves with bright red stems. 25-35 days for baby leaf; 50-60 days for mature greens. Approx. 250 sds/pkg.

Silverado #18440
Slow to bolt white chard. Silverado is a slow bolting green chard with broad white stems that support heavily savoyed, glossy dark green flavourful leaves. Plant height approximately 14-16". Maturity 60-65 days. Approx. 500 sds/pkg.

TOMATOES

Without a doubt, tomatoes are the most popular choice in many gardens no matter where you live. New hybrid varieties have excellent late blight disease resistance which makes growing tomatoes even in humid climates much easier and more productive. Ever popular cherry or grape tomatoes are a fabulous addition to salads, large types for topping tasty burgers or plum types for sauces or salsa. Determinates are ideal for smaller gardens, do not require staking and produce heavy yields for gardeners who want a lot at one time for preserving. Indeterminate or staking types require support and produce tasty fruit all season long.

BEEFSTEAK VARIETIES

Big Beef Plus **STAFF TOP PICK!** #18980
Indeterminate. Big tomatoes - big customer favourite. Everyone will appreciate the old-time tomato flavour of this deep red fleshed 200-250g tomato. This indeterminate hybrid produces a heavy yield of fruit over an extended period. It has an excellent disease resistance package. Maturity 75-80 days from transplanting. Approx. 30 sds/pkg.

Bobcat #19300
Determinate. Excellent main season beefsteak. Bobcat is a hybrid main season determinate beefsteak tomato producing juicy red fruit up to 275-350g in as little as 65-70 days from transplant. Approx. 25 sds/pkg.

Brandywine Organic **HEIRLOOM** #40130
Indeterminate. The standard for heirloom tomato flavour. Brandywine is the standard for heirloom tomato flavour. This open pollinated heirloom tomato is well known for its size, 625g, and exotic, sweet flavour. Large pinkish red fruit are produced on indeterminate potato leaf plants. Maturity 75-80 days from transplant. Approx. 50 sds/pkg.

Big Brandy #18867
Indeterminate. Flavourful pink beefsteak. This flavourful pink indeterminate beefsteak can produce up to 450g fruit. Big Brandy is a cross of two heirlooms (Big Dwarf and Brandywine) resulting in an improved tomato variety loaded with great flavour and improved appearance, also considered a marriage heirloom. Slice and enjoy on your favourite sandwich or use for a colourful tomato salad. Matures in 75-80 days from transplant. Approx. 15 sds/pkg.

Buffalo Steak #19295
Indeterminate. Meaty fruit and great flavour. This hybrid indeterminate beef steak tomato has good disease resistance. This fruit is 170-200g with beautiful red thick flesh, few seeds and great flavour. Maturity 70-75 days from transplant. Approx 10 sds/pkg.

Mountain Merit #19305
Determinate. Large size with excellent late blight resistance. The round, deep red fruit will delight you with its juicy mild flavour, with just the right firmness of texture. The good disease resistance of this tomato makes it ideal for home gardeners and organic growers as well. AAS winner. Days to maturity 65-75 from transplant. Approx. 15 sds/pkg.

Pink Wonder #18868
Indeterminate. Excellent Late Blight resistance. One stop shop beefsteak. Pink Wonder produces fruit upwards of 350g, in clusters of 4-5 with shallow, smooth ribbing. The pink colour is consistent throughout the skin and flesh, making for a truly pleasing display. What impressed our staff most is the heirloom-like flavour mixed with a huge disease resistance package typical of modern hybrids. Matures in 75-80 days from transplant. Approx. 15 sds/pkg.

Primo Red #18861
Determinate. Best early beefsteak. Primo Red is one of the best beefsteak tomatoes with smooth large, firm, deep red, mild flavoured fruit. This determinate hybrid grows on a compact open plant and will supply you with numerous uniformly sized tomatoes that make for an easy harvest. Resistance to Verticillium Wilt, Fusarium Wilt and Tobacco Mosaic Virus. Matures in 65-70 days from transplant. Approx. 15 sds/pkg.

Pruden's Purple Organic #40355
HEIRLOOM Indeterminate. Early heirloom beefsteak. This early heirloom indeterminate beefsteak tomato that can reach up to 450g has meaty purple-pink flesh. It has a flattened top with smooth slightly ribbed skin that resists cracks and a unique potato leaf shape that sets it apart from other varieties. Matures in 80-85 days from transplant. Approx. 50 sds/pkg.

SLICING VARIETIES

Lemon Boy #19060
Indeterminate. Bright yellow tomato. This indeterminate lemon-yellow tomato produces globe shaped, 170-250g fruit that feature a mild, low acid flavour. The fruit are about 3.5" in diameter. Maturity is 65-75 days from transplanting. Approx. 20 sds/pkg.

Manitoba HEIRLOOM #19048
Determinate. Perfect for Salad or Jars! Manitoba is a Canadian bred variety specific for short growing seasons. The 80-90g fruit are smooth skinned, and tangy in taste. Close cousin of Scotia tomatoes. Matures in 60-65 days from transplant. Approx. 50 sds/pkg.

Mountain Gem #19382
Determinate. Excellent Late Blight resistance. Mountain Gem produces glossy red, flattened globe-shaped, fruit with a great sugar to acid ratio averaging 250g. Along with its high flavour quality, Mountain Gem is a determinate with an impressive disease resistance package which includes resistance to Late Blight. Matures in 75-80 days from transplant. Approx. 15 sds/pkg.

Premio #19185
Indeterminate. An outstanding medium red round hybrid. This indeterminate tomato produces nice clusters of 6-8 fruit that are consistent in size making them easy to pick. Premio fruit weigh about 115g and have good shelf life after being harvested. They have a good disease resistance package. Maturity 65-70 days from transplant. Approx. 15 sds/pkg.

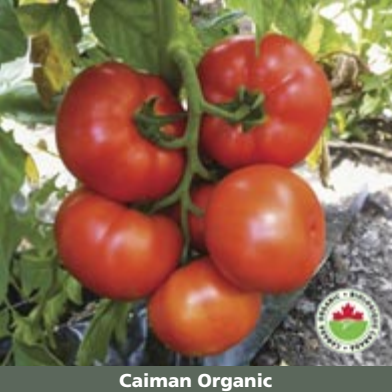

Scotia HEIRLOOM #19045
Determinate. Maritime favourite. This Maritime favourite is most popular and well known for green tomato relish. This open pollinated determinate plant is early maturing and reliable. Scotia has a dwarf plant habit, with medium sized, globe shaped fruit. Fruit weigh 70-80g and have slightly green shoulders. Maturity is early at 60-65 days from transplanting. Approx. 50 sds/pkg.

Stellar #19190
Determinate. Blight resistant, all around useful tomato. Stellar produces high yields of medium sized 100-150g round red slicing tomatoes perfect for all your tomato uses. Although categorized as a determinate, this tall hybrid variety will benefit from support. This tomato has a great disease resistance package including blight. Matures in 70-75 days from transplant. Approx. 10 sds/pkg.

Tasti-Lee #19565
Determinate. Staff favourite vine ripened determinate. This determinate medium sized round hybrid has deep red colour inside and out. Tasti-Lee has a firm texture with a juicy centre that is excellent for slicing, salads, sauces or for salsa. Maturity 70-75 days from transplanting. Approx. 10 sds/pkg.

Tough Boy Gold #18870
Indeterminate. Consistent beautiful fruit! Tough Boy Gold produces great yields of golden fruit with low acidity and great flavour, weighing about 170g. This indeterminate slicer is crack resistant and stores well short term. Tough Boy Gold will brighten any sandwich! Matures in 75-80 days from transplant. Approx. 10 sds/pkg.

Red Torch

Tomayo

CHERRY/GRAPE VARIETIES (cont'd)

Sun Dipper #19462

Indeterminate. Sure to win any gardener's heart. Prep the veggie tray! The elongated and hourglass, 2.5" fruit have been bred specifically for dipping and veggie trays. The fruit are sweet by themselves, so dips and sauces only add to an already great eating experience. The plants grow up to 7' high, so lots of room is needed to produce to capacity. They also have great disease resistance to Fusarium, and Tobacco Mosaic Virus. Staking is recommended. Matures in 60-65 days from transplant. Approx 10 sds/pkg.

Sweet Million #18960

Indeterminate. Bright red cherry tomatoes. Early maturing clusters of tiny bright red cherry tomatoes are well rounded, and delicious. Tall indeterminate plants have tolerance from cracking. Maturity 60-65 days from transplanting. Approx. 20 sds/pkg.

Tropical Sunset Organic #40132

Indeterminate. Tastes like a treat on the beach! This unanimous Trials Staff favourite was a standout variety for its colour, yield, and of course, flavour! 1.5" fruit are golden yellow with streaks of pink. Eating handfuls of this tomato will keep you wanting more! Matures in 65-70 days from transplant. Approx 15 sds/pkg.

GROUND CHERRY VARIETIES

Aunt Molly's Organic #40800

Delicious tropical taste in an attractive paper wrapper. Ground cherries are very sweet treat that taste a bit like pineapples that can be used in preserves, pies or over ice-cream, but here at Veseys we love to eat them fresh off the plant. The fruit from these prolific plants will store in a cool dry place for 3-4 weeks after harvest. Matures in 75-80 days after transplanting. Approx. 25 sds/pkg.

CURRENT VARIETIES

Candyland Red #19460

Indeterminate. Early ripening currant tomato. Candyland Red is the first currant tomato to win an AAS award. This hybrid indeterminate plant produces a very high yield, of 0.5" red super sweet fruit with concentrated flavour on long exterior fruit clusters resulting in easy picking. The fruit ripens earlier, and the plant is more compact than older currant types so won't take over your garden. Matures in 55 - 60 days from transplant. Approx. 25 sds/pkg.

SALADETTE VARIETY

Red Torch #18970

Indeterminate. Unique, beautiful colour. Red Torch is known for its unique yellow striping. This salad-type tomato continues to be a top producer making it a very popular choice for its excellent flavour, ideal texture, and high yields even when faced with challenging growing conditions. Maturity is 65-70 day from transplant. Approx. 20 sds/pkg.

TOMATILLO VARIETIES

Tomayo #18901

Tomayo is a super sized tomatillo. This tall, vigorous hybrid produces high yields of firm, green uniform 2.5-3" fruit. The fruit are semi-tart, juicy and crunchy with above average shelf life when refrigerated. A staple ingredient in green salsas and Mexican cooking. This variety is suitable for a wide range of growing conditions. Matures in 65-70 days from transplant. Approx. 15 sds/pkg.

BASIL

Annual. Basil is a very tender annual, for best results start inside and transplant outdoors after temperature is reliably above 15 degrees. The leaves can be used fresh or dried and saved for the winter.

Aroma 2 Organic #40221

An improved Genovese hybrid that has intermediate resistance to Fusarium Wilt. It has dark green glossy 3" foliage on 15-18" vigorous plants. Aroma 2 has a consistent sweet flavour and a great fragrance. It is slow bolting and will hold well in the field. Approx. 600 sds/pkg.

(A) Pkg for \$3.50 (F) 5 g for \$8.45
(H) 25 g for \$21.85 (J) 125 g for \$72.85
(L) 500 g for \$269.00

Bonsai NEW! #14895

Bonsai basil blew Trials Staff away with all its unique characteristics! This Greek basil is low maintenance, keeping itself neat and grows into a near perfect sphere, no trimming required! Apart from the endless list of ornamental possibilities, Bonsai also has small leaves that don't require cutting before being added to a recipe. Grows 6-12" tall and will easily fill a 4-6" pot on its own. Part of the Kitchen Minis series. Approx 100 sds/pkg.

(A) Pkg for \$4.95 (X5) 500 sds for \$17.90
(M2) 2,000 sds for \$39.85

Crimson King #14855

Crimson King' is a purple-leaved Genovese variety, bred for its uniform leaves and greater vigour than other purple varieties. Harvest leaves regularly and remove flowers to concentrate the plant's energy on leaf production. These 18" plants are also a great addition to planters. Approx 500 sds/pkg.

(A) Pkg for \$3.50 (M2) 2,000 sds for \$9.95
(M10) 10,000 sds for \$35.40
(M50) 50,000 sds for \$134.20

Dolce Fresca #14891

Dolce Fresca is an AAS winning large leafed, bushy Genovese basil. The plant is a compact 12-14" and very upright. Flat green leaves are strongly scented and flavourful. This plant is at home in the garden, on the patio or sunny windowsill. Approx. 500 sds/pkg.

(A) Pkg for \$5.15 (M2) 2,000 sds for \$13.85
(M10) 10,000 sds for \$43.80
(M50) 50,000 sds for \$140.55

Dolly Organic #42505

Dolly is a fast growing and particularly nice Genovese type basil with large, up to 4" long, highly aromatic leaves. Dolly is 18-20" tall and has some cool weather tolerance making it suitable for both field and container gardening. Approx 500 sds/pkg.

(A) Pkg for \$3.50 (M2) 2,000 sds for \$9.95
(M10) 10,000 sds for \$35.40

Lemon Basil #14882

Lemon Basil can grow to 20" tall, it has small leaves with a citrus scent, that can be used fresh in summer dishes, or dried to enjoy all winter. Approx 700 sds/pkg.

(A) Pkg for \$2.95 (F) 5 g for \$7.45

Patio Prospera #42510

This medium-compact Genovese basil has smaller leaves and is ideal for containers as well as fresh market bunching. The plant is 18-20" tall with dark leaves and are Downy Mildew resistant. Approx. 500 sds/pkg.

(A) Pkg for \$3.50 (M2) 2,000 sds for \$9.95

Prospera Organic #40484

Prospera is a Genovese type of Basil that has high resistance to Downy Mildew. The leaves are dark green with a delectable basil scent on 20-24" plants. This hybrid is well suited for both home garden or greenhouse production. Approx 700 sds/pkg.

(A) Pkg for \$3.40 (F) 5 g for \$10.95
(H) 25 g for \$34.50

Veseys Basil Blend EXCLUSIVE #14660

Our custom blend of green, purple, sweet and spicy varieties is very ornamental and tasty! Makes for a beautiful and slightly different pesto. We have chosen productive and easy to grow varieties. Approx. 400 sds/pkg.

(A) Pkg for \$3.30 (F) 5 g for \$11.85
(H) 25 g for \$33.50

Siam Queen #15120

Siam Queen is a sweet basil often known as Thai basil. The sweet and spicy leaves have a licorice aroma and flavour when crushed. Its attractive 24-30" purple stems and pink-violet flowers make for a decorative touch to your garden or patio planter. AAS winner. Approx. 400 sds/pkg.

(A) Pkg for \$3.80 (F) 5 g for \$10.85

Sweet Basil #14880

The most widely known and commonly used basil. Great in tomato, egg and cheese dishes. Also used in sauces, soups and stews. Height 1-2'. Approx. 785 sds/pkg.

(A) Pkg for \$2.90 (H) 25 g for \$8.25
(J) 125 g for \$20.25 (L) 500 g for \$56.65

BEE BALM

Perennial • *Monarda didyma*

Panorama #15130

Also known as Bergamot. This perennial has a citrusy fragrance and brilliant blooms. Prefers sun or partial shade. Plants will flower second year and spread quickly. Harvest leaves for tea just before blooming and dry for best flavour. Height 3-4'. Approx. 100 sds/pkg. Zone 4.

(A) Pkg for \$5.15 (X5) 500 sds for \$18.50

BORAGE

Annual • *Borago officinalis*

Borage #14700

Borage is an easy to grow large sprawling annual that loves full sun. Leaves and clear blue flowers are both edible with a crisp cucumber flavour. Bees love the nectar of this self seeding annual. Approx 200 sds/pkg.

(A) Pkg for \$2.90 (H) 25 g for \$5.90

CATNIP

Perennial • *Nepeta cataria*

Catnip #14740

Although catnip is most widely used in toys for kitty, it can also be used in salads as a green or for a relaxing tea. Height 3'. Approx. 850 sds/pkg. Zone 3.

(A) Pkg for \$2.70 (G) 10 g for \$7.25

CHAMOMILE

Annual • *Matricaria chamomilla*

German Chamomile #14990

Chamomile produces small, sweetly aromatic, daisy-like flowers on top of 2-3' plants. It is mainly used in teas and in hair products but because of its lovely scent it is also great in potpourri. Approx. 3000 sds/pkg.

(A) Pkg for \$2.85 (G) 10 g for \$9.65

CHIVES

Perennial • *Allium schoenoprasum*

Chives #14800

This long-lasting, perennial herb in the onion family, grows to 18". It produces edible lavender, pom-pom shaped flowers in early summer that are attractive to bees. The mild onion flavour of chives is great in salads or herbal vinegars. This zone 3 herb will continue to grow if trimmed regularly. Approx. 1200 sds/pkg.

(A) Pkg for \$2.90 (F) 5 g for \$6.05
(H) 25 g for \$11.85 (J) 125 g for \$34.65

CILANTRO

Annual • *Coriandrum sativum*

Calypso #14474

Be sure to grow this "cut and come again" annual herb near your kitchen. Calypso is by far the slowest bolting cilantro we have had in our trials. Direct seed throughout the growing season. Delicious when added to salads, curries and soups. 50-55 days to maturity. Approx 200 sds/pkg.

(A) Pkg for \$2.90 (H) 25 g for \$7.10
(J) 125 g for \$11.50 (L) 500 g for \$32.35

Santo

Cilantro leaves have a sharp citrus/nutty flavour that is used in many different dishes. No summer salsa is complete without fresh cilantro. Santo grow from 2-3'. Approx. 200 sds/pkg.

(A) Pkg for \$2.90 (H) 25 g for \$8.05
(J) 125 g for \$12.20 (L) 500 g for \$38.15

DILL

Annual • *Anethum graveoleus*

Bouquet

Dill boasts a variety of culinary uses from sauces to pickles. Great in fish dishes. Height 2-3' for leaf harvest and up to 6' for bloom heads. Approx. 1500 sds/pkg.

(A) Pkg for \$3.15 (H) 25 g for \$6.25
(J) 125 g for \$15.00 (L) 500 g for \$39.45

Bouquet Organic #40230

Certified Organic seed. Approx. 1,000 sds/pkg.

(A) Pkg for \$3.15 (H) 25 g for \$7.10
(J) 125 g for \$16.90 (L) 500 g for \$42.70

Fernleaf

Late flowering allows for a long harvest of the Fernleaf Dill for fresh bunches. This compact 12-18" plant is perfect for planters or can be grown in-ground. AAS winner. Approx 300 sds/pkg.

(A) Pkg for \$4.90 (M2) 2,000 sds for \$15.00
(M10) 10,000 sds for \$46.05
(M50) 50,000 sds for \$145.90

Hera

Excellent bunching and slower to bolt than Bouquet. Hera has a wider harvest window for dark green ferny leaves. Plants grow up to 30" tall. Approx. 500 sds/pkg.

(A) Pkg for \$3.15 (H) 25 g for \$8.25
(J) 125 g for \$17.80 (L) 500 g for \$46.25

FENNEL

Annual • *Florence vulgare azoricum*

Orion Organic NEW! #43970

Approx 50 sds/pkg.

(M1) 1,000 sds for \$27.70

#14750

Orion

Fennel is most often used for its crisp sweet licorice flavoured bulb, but the fonds are used for garnish, and stalks are great in a broth. Delicious chopped and served raw with some olive oil, steamed with butter or added to your stirfry. The seed is also used in baking. This hybrid matures in 80-85 days. Approx. 50 sds/pkg.

(A) Pkg for \$4.55 (X2) 200 sds for \$10.65
(M1) 1,000 sds for \$27.70 (M5) 5,000 sds for \$92.55

#13970

LAVENDER

Perennial • *Lavendula spp.*

Ellagance

Lavendula angustifolia. Fleuroselect award winner. Large dense flower spikes adorn rich 12-14" gray-green foliage. Soothing aroma and soft colours combined in long flowering blooms are ideal in any perennial bed or planter. Zone 6-9. Approx. 50 sds/pkg.

Purple: #14965 **White: #14966**
(A) Pkg for \$7.15 (X2) 200 sds for \$18.95
(M1) 1,000 sds for \$75.20

Fragrant Butterflies

Lavendula stoechas pedunculata. This form of Spanish Lavender produces masses of unusual, showy flowers on tall 3' stems in early spring. The blooms have showy bright purple bracts that are held way above the aromatic grey-green foliage. Overwinter inside where not hardy. Zone 7. Approx. 60 sds/pkg.

(A) Pkg for \$7.05 (B) 500 mg for \$41.90

Hidcote Blue

Hidcote is also known as Common Lavender or Mediterranean Lavender. It grows at a slow rate reaching about 15" and can live up to 10 years. It is the most compact deep blue lavender. This Zone 5 plant blooms from June to August. Approx. 100 sds/pkg.

(A) Pkg for \$4.40 (X5) 500 sds for \$15.00

Munstead

Lavendula angustifolia. A magnet for butterflies and lavender enthusiasts, providing up to 15 years of pleasure! It can be clipped into a formal shape or left natural to provide 14" mounds of fragrant blooms suitable for cutting. Zone 6. Approx. 250 sds/pkg.

LEMON BALM

Perennial • *Melissa officinalis*

Lemon Balm #14730

Lemon Balm is a delicious accent to seafood dishes. The fresh lemon scent is a refreshing addition to teas and potpourri. May also be used in furniture polish and insect repellent recipes. This Zone 5 plant grows to 24". Approx. 500 sds/pkg.

(A) Pkg for \$2.70 (D) 2 g for \$5.65
(F) 5 g for \$10.40

LEMON GRASS

Perennial • *Cymbopogon flexuosus*

Lemon Grass #14741

Much sought after in southeast Asian cooking. When cut, the stalk has an appetizing sweet lemony scent and taste. Tall uniform plants. Germination can be erratic. Start indoors. Zone 7-9. Approx. 250 sds/pkg.

(A) Pkg for \$3.50 (C) 1 g for \$13.05
(F) 5 g for \$38.85

LOVAGE

Perennial • *Levisticum officinale*

Lovage **NEW!** #15075

Lovage is a favourite of many chefs for its strong celery and parsley taste, with hints of citrus. A little goes a long way with this herb! While being a vigorous grower, up to 6' tall in one season, all parts of this lovely plant are edible including the seeds. Hardy to zone 4. Approx. 1000 sds/pkg.

(A) Pkg for \$2.95 (D) 2 g for \$7.95

MARJORAM, SWEET

Annual • *Origanum majorana*

Sweet Marjoram #14860

Sweet Marjoram has a mild oregano-like flavour used fresh or dried in meats, salads, casseroles and in teas and jellies. It grows to 12" and is hardy to Zone 6. Approx. 1000 sds/pkg.

(A) Pkg for \$2.70 (F) 5 g for \$7.80
(H) 25 g for \$25.45

MINT

Perennial • *Mentha piperita*

Mint #14840

Peppermint leaves are used in a variety of recipes, the most popular being jelly and tea. This sun loving mint is hardy to Zone 4. It is best grown in a container since it spreads aggressively. Approx. 1700 sds/pkg.

(A) Pkg for \$3.00 (D) 2 g for \$10.05
(G) 10 g for \$36.40

OREGANO

Perennial • *Origanum spp.*

Oregano #14820

Origanum vulgare. Indispensable in Italian, Spanish and Mexican cooking. It is widely used in tomato dishes and in vinegars. Hardy to Zone 5. Approx. 1000 sds/pkg.

(A) Pkg for \$3.25 (D) 2 g for \$11.30
(G) 10 g for \$26.65

Greek Oregano #15180

Origanum vulgare hirtum. Also known as Winter Marjoram, this compact evergreen oregano has the sweet spiciness of sweet marjoram. Bright green leaves make it an attractive edging plant, especially in winter. Hardy to Zone 5. Approx. 2000 sds/pkg.

(A) Pkg for \$3.40 (D) 2 g for \$15.85

Zaatar #14821

Origanum syriacum. The great flavour of Zaatar is a staple in Middle Eastern cuisine. The foliage is richly scented and spicy including hints of oregano, thyme and marjoram. The plant does well in containers, or your herb garden. Hardy to Zone 9. These compact plants grow 12-15" in height. Approx. 100 sds/pkg.

(A) Pkg for \$3.70 (M1) 1,000 sds for \$16.15
(M5) 5,000 sds for \$52.05

PARSLEY

Biennial • *Petroselinum crispum*

Darki **NEW!** #14905

Dark and Curly. This vibrant dark green curly parsley looks good in the garden and on your plate. Upright growth makes harvesting easy. Suitable for containers and in-ground. Good frost and bolt tolerance. 75-80 days to harvest. Approx. 1000 sds/pkg.

(A) Pkg for \$3.15 (H) 25 g for \$7.10
(J) 125 g for \$17.80 (L) 500 g for \$46.25

Forest Green Organic #40548

Curly leaf parsley used in a wide variety of recipes and as a garnish. Height of 10-12". Approx. 1100 sds/pkg.

(A) Pkg for \$2.90 (H) 25 g for \$6.70

ROSEMARY

Tender Perennial • *Rosmarinus officinalis*

Simply Rosemary #14785

A rich, aromatic herb that is disease and pest resistant, used in poultry, lamb and pork dishes. Multi seed pellets make for much more uniform germination, and ease of planting. Grows well in any herb garden or in containers. Zone 8.

Approx. 10 pellets/pkg.

(A) Pkg for \$5.45 (W) 50 sds for \$14.65
(X2) 200 sds for \$41.60 (M1) 1,000 sds for \$150.40

SAGE

Perennial • *Salvia officinalis*

Sage #14850

This beautiful herb with gray foliage and blue flowers can grow to 30". It is a classic seasoning used in chicken, sausages, pork and veal dishes. Hardy to Zone 5. Approx. 100 sds/pkg.

(A) Pkg for \$3.05 (F) 5 g for \$8.30

SAVORY (SUMMER)

Annual • *Satureja hortensis*

Summer Savory #14870

Used in teas, herb butter, vinegars, soups, and of course, poultry stuffings. Height is about 12-16". Approx. 3000 sds/pkg.

(A) Pkg for \$2.90 (G) 10 g for \$5.85
(H) 25 g for \$10.65 (I) 125 g for \$18.50
(L) 500 g for \$46.25 (O) 2.5 kg for \$190.95

SAFFRON

Crocus sativus

Canadian Saffron Crocus #36100

The most expensive spice in the world, Saffron, grown in your yard! Exclusively Canadian, these bulbs are produced in Quebec. The difficult and indescribable taste is one that is not forgotten once tried. Once the herb is dried, you can enjoy such dishes as Risotto alla Milanese or Paella at home! 1000 bulbs average 6g of saffron a year. Bulbs typically triple their flower output year over year. A package of 20 bulbs should produce enough saffron in the first season for the average family to enjoy sparingly. Saffron is also pollinator friendly and a great source of pollen for honey bees.

Approx. 20 bulbs/pkg.

20 bulbs for \$35.95

STEVIA

Annual • *Stevia rebaudiana*

Candy Organic #40488

Grow your own sweetener! This tender perennial makes a great addition to your herb garden but is also well suited for container growing. Pot it up and bring it indoors in the autumn, and you can enjoy it throughout the winter months. The plants produce a healthy yield of leaves which when dried, gives you a great healthy alternative to sugar, yet the taste is even sweeter. Approx. 20 sds/pkg.

(A) Pkg for \$5.45 (X2) 200 sds for \$23.75

THYME

Perennial • *Thymus spp.*

German Winter Thyme #14890

Thymus vulgaris. Also known as English Thyme. A hardy perennial. Leaves are used fresh or dried to season meats, vegetables, soups & sauces. Height 10-12". Approx. 1500 sds/pkg. Zone 4.

 (X2) 200 sds for \$72.70

Duchess Mix #20484

Annual. *Callistephus chinensis*. This showy, peony-flowered Aster is magnificent. It boasts large, fully double flowers with incurved petals like a Chrysanthemum. This vigorous and upright sun loving plant grows up to 24" with 5-8 floral stems per plant. The mix has 12 colours, including bicolours. A top-notch and long-lasting cut flower mix. Approx. 400 sds/pkg.

(A) Pkg for \$3.05 (F) 5 g for \$6.20
 (H) 25 g for \$18.10

Pavlova Dark Blue #20480

Annual. *Callistephus chinensis*. Stunning deep indigo, fully double 3-5" blooms on strong 30" stems cover these attractive plants. These 'Tiger Paw' Asters have claw-like petals that are incurved and twisted, making for first class bouquets. Large flowers. Approx. 45 sds/pkg.

(A) Pkg for \$2.90 (C) 1 g for \$9.00
 (F) 5 g for \$15.25

ASTER

Asters provide bright colour into the fall. Both perennial and annual Asters will attract bees and butterflies to your garden. Taller varieties can be planted amongst other plants, while dwarf types make ideal, beautiful border displays. Aster flowers are long lasting and have thick stems so they are perfect for cut flowers or simply put in a vase on their own.

Chrisantella Series

VESEYS TOP PICK! **Annual.** *Callistephus chinensis*. Amazing blooms that are tightly packed with solid structure. A single plant can produce up to 10-15 high-quality flowers. Daydream away with these fancy and exceptional shades of beauty in your garden. Approx. 25 sds/pkg.

(A) Pkg for \$3.40 (E) 3 g for \$8.35
(H) 25 g for \$17.00

CANNA

Canna generalis Tropical, contrasting flowers are a must every summer. Green to dark green foliar canopies sit under flower spikes loaded with multiple bright flowers. Will continuously flower all season until temperatures cool. Continuously trimming spent flower spikes will encourage more to grow. A bonus of Cannas from seed is they are not prone to disease that can be transmitted in rhizome production.

South Pacific Series

Annual. Clusters of 4", two toned flowers sit above smooth, green leaves. Trials staff loved the continuous flowering and environmental flexibility. Plants can grow to 26-32". Flower time from seeding is 90-100 days. AAS winner. Approx. 10 sds/pkg.

Orange: #20700 Scarlet: #20701

(A) Pkg for \$12.95 (W) 50 sds for \$43.75

Tropical Series

Annual. The striking bold tropical flowers present colours with undertones of white and sometimes yellow. Dwarf plants grow up to 30" while producing multiple flower spikes all season long. Because of its dwarf habit, these Cannas are perfect for borders, large plantings, or pots. Flowering time from seeding is 90-100 days. Approx. 10 sds/pkg.

Salmon: #20705 Yellow: #20706

(A) Pkg for \$12.95 (W) 50 sds for \$43.75

CELOSIA

Celosia spp. Celosia is a low maintenance annual bedding plant that enjoys full sun. The bright spikes of colour can be used in cut flower arrangements or dried. They perform well in containers as well as flowerbeds.

Brainiac Mix #26360

Annual. Celosia cristata. This compact, brilliantly coloured celosia looks like a densely packed brain. The 6" plants are fun additions for containers, borders or even houseplants. They love full sun and lots of heat in the summer blooming until frost. Approx. 25 sds/pkg.

(A) Pkg for \$5.95 (X1) 100 sds for \$17.95

Bright Sparks Mix #26355

Annual. Celosia plumosa. Boasts large plumes of brilliant colour on an ultra-branched, intermediate plant. Excels in planters either in combo with others or on its own. This superior landscape Celosia resists colour fade along with greater repeat flowering. Enjoys full sun. Height 11-13" Mixture includes Burgundy, Bright yellow, and Scarlet shades. Approx. 50 sds/pkg.

(A) Pkg for \$4.55 (X5) 500 sds for \$16.65

Century Mix #26350

VESEYS TOP PICK! Annual. Celosia argentea plumosa. Excellent early and large flowering plants with a rich mix of velvety scarlet and red shades that are paired with yellow and bright orange. Perfect for landscapes and has proven to be a lasting cut flower. Disease and weather resistant with almost no dead-heading required, this mix will provide long lasting colour and performance all summer. Approx. 50 sds/pkg.

(A) Pkg for \$4.55 (X5) 500 sds for \$16.65

CASTOR BEAN

Ricinus communis. If you have never heard of this odd but interesting annual, it should be on your list to experiment with this season! Ricinus, otherwise known as Castor Bean, is grown for grand stature, with huge, tropical looking foliage and ornamental seed pods. Please note that all parts of plant are poisonous.

New Zealand Purple #24120

Annual. Striking reddish-purple leaves. This variety of Castor Bean has smaller leaves than others. Requires rich soil and full sun. Height: 6-10' Poisonous if ingested. Approx. 10 sds/pkg.

(A) Pkg for \$5.80 (G) 10 g for \$17.95

Zanzibarensis #24110

Annual. Probably the largest variety with the largest leaves conspicuous white veining! It is like a temporary tree needing lots of room since they may reach a height of 6-8' and width of 3-4'. These plants may have various coloured seed heads. They need rich soil and may need support. Approx. 12 sds/pkg.

COLEUS

Plectranthus scutellarioides. Coleus are an annual that need to be started 8-10 weeks before last frost. Pinching helps promote bushier plants. They perform really well in containers or gardens in shady areas.

Black Dragon #21300
Annual. This exotic looking coleus has serrated leaves and unusual texture. They are a deep red, with purplish-black edges, making it an interesting addition to a shady bed or container. They grow 12-14" tall and hold their colour throughout the season. Approx. 50 sds/pkg.
(A) Pkg for \$4.55 (X5) 500 sds for \$16.65

Chocolate Covered Cherry #21275
VESEYS TOP PICK! Annual. Create a bold statement with this 12-14" rich-textured and non-fading Coleus. Vivid colour of rose and mahogany with a frilled green edge lasts throughout the season. This is a reliable performer that can tolerate full sun in areas of high humidity. Later flowering than other Coleus varieties. A must-have addition to the garden or perfect for patio containers. Approx. 10 sds/pkg.
(A) Pkg for \$7.15 (W) 50 sds for \$27.55 (X2) 200 sds for \$65.25

Ruby Sun #21285
Annual. This sun-loving Coleus can tolerate full sun but is also suitable for shady areas. The heart-shaped, ruby-coloured leaves feature a thin, chartreuse border on serrated leaves. They offer long lasting colours in containers, beds, or inside on a sunny windowsill. Plants can grow 20-24" tall and wide and are slow to flower. Approx. 10 sds/pkg.
(A) Pkg for \$7.15 (W) 50 sds for \$27.55 (X2) 200 sds for \$65.25

COREOPSIS

Coreopsis grandiflora. These perennials remind us of little drops of sunshine with their profusely cheerful, daisy-like flowers which are equally complimented with neat, modest foliage. Coreopsis are easily incorporated into many garden environments and supply you with beautiful bouquets as they are an excellent long lasting cutflower. Coreopsis also provides delicious nectar and seeds for birds and butterflies.

Early Sunrise #26450
VESEYS TOP PICK! Perennial. AAS and Fleuroselect Gold Medal winner. Dwarf, compact plants require little care and bloom all summer. Brilliant 2.5" semi-double, rich, golden-yellow blooms. Sow this perennial directly outdoors or indoors for transplants. Height 24-26". Prefers sun to part shade. Zones 3-9. Approx. 50 sds/pkg.
(A) Pkg for \$4.55 (X2) 200 sds for \$13.05

COSMOS

Cosmos bipinnatus. Cosmos are one of the easiest and most popular direct seeded annuals. They bloom until frost making them great in a mixed flower bed, also are a great cut flower.

Casanova Series #21360
Annual. Compact series with a mix of colours including fantastic whites, popping violets and enticing pinks, as well as a first true red contrasting with a yellow center that stands out on its own. The Casanova series have large daisy-like flowers on uniform bushy foliage. Height is around 12" making it perfect for container growing. Approx. 25 sds/pkg.
Red: #21360 Mixed: #21370
(A) Pkg for \$4.90 (X1) 100 sds for \$13.95 (X5) 500 sds for \$41.15

Cosimo Red & White #21311
Annual. Extra early semi-dwarf with red and white flowers striped with pink to give them a variegated appearance. Cosimo Red and White is a bushy plant reaching about 24" tall. They can be direct seeded in your garden after danger of frost has passed. They attract both birds and bees to your garden. Approx. 100 sds/pkg.
(A) Pkg for \$5.15 (X5) 500 sds for \$17.75

Double Click #21390
VESEYS TOP PICK! Annual. These easy to grow, vigorous plants produce fully double and semi-double blooms of white, pink and burgundy. These semi-tall plants are 2-3' tall with large flowers. Once blooms start in mid-summer, they continue until frost. Use in borders and in the cutting garden. Sow directly into the garden after danger of frost has passed. Approx. 35 sds/pkg.
(A) Pkg for \$5.15 (X1) 100 sds for \$11.10 (X5) 500 sds for \$20.30

GERANIUM

Pelargonium spp. Geraniums are a staple of any garden or container, year after year. Plants, when started indoors, will quickly germinate, and grow, and easily adapt when planted in the garden. Scheduled feedings and deadheading not only keep plants looking lush but also encourage more blooms. Some gardeners will move plants inside at the end of the season and grow them as houseplants until the following spring, allowing plants to be grown for several years!

Reach Out Series

Annual. *Pelargonium hortorum.* The Reach Out Geranium series has superb hanging basket performance. These ivy geraniums hang easily with no tangles. Large, fluted flowers bloom nonstop above their waxy dark green leaves. Three colours to choose from lilac, red and white. Low maintenance trailing capability. Height 6-8". Spreads 10-14". Approx. 10 sds/pkg.

Lilac Bicolour: #21923

Red: #21920

MILKWEED

Asclepias spp. Milkweed attracts many kinds of butterflies, especially the monarch, as it is the sole food for the larva. Direct sow seed in late fall or cold stratify for 30 days before planting in the spring.

Carmine Rose #26220
Perennial. Asclepias incarnata. This is a must have for the butterfly garden, it is the exclusive diet of the monarch caterpillar. We have, in fact, seen several such caterpillars in our field trials! An impressive late summer flowering border perennial. Flowers the first year. Reaches a height of 40" by the second year. Zones 4-8. Approx. 200 sds/pkg.
 (A) Pkg for \$4.25 (F) 5 g for \$16.35
 (H) 25 g for \$45.40

Common Milkweed NATIVE #29315
Perennial. Asclepias syriaca. This butterfly and bee favourite produces light pink flowers attracting many foraging insects. Common Milkweed prefers full sun and loamy soil but can tolerate a variety of conditions. This monarch favourite grows 36-48" tall. Zone 4-9. Approx. 200 sds/pkg.
 (A) Pkg for \$5.10 (F) 5 g for \$13.75
 (H) 25 g for \$38.80

Swamp Milkweed NATIVE #29310
Perennial. Asclepias incarnata. The favourite for Monarch butterfly egg laying sites, Swamp Milkweed produces pink flowers over a canopy of foliage. Sow thick in moist sites such as streams and ditches to establish a plentiful crop for Monarch larva consumption. They grow 48-60" tall. Zone 4-9 Approx. 200 sds/pkg.
 (A) Pkg for \$5.10 (F) 5 g for \$13.75
 (H) 25 g for \$38.80

MORNING GLORY

Ipomoea purpurea. Morning Glories are your ideal solution for creatively decorating any trellis or unsightly fence in your yard. They are one of the fastest growing vining plants and have beautiful, large blooms that make a colourful impact in any sunny and bright location. Morning Glory blossoms naturally arrange themselves upright on each stem and open multitudes of fresh flowers each day.

Morning Glory Trio HEIRLOOM #23150
VESEYS TOP PICK! Annual. Heirloom climbers with a beautiful mix of purple, lavender and light pink flowers, grows 6-10' tall. They climb well on fences, buildings or a trellis. Approx. 45 sds/pkg.
 (A) Pkg for \$2.90 (F) 5 g for \$5.40
 (H) 25 g for \$10.45

Venice Mix #23161
Annual. Bi-colour mix of pink and blue blooms with intricate splashes and stripes make this morning glory a stand-out. When trellised this beautiful vine blend can reach 6-8 feet in height. The dazzling colours continuing all summer long will attract birds and bees to your garden. Approx. 40 sds/pkg.
 (A) Pkg for \$2.90 (F) 5 g for \$9.30
 (H) 25 g for \$17.00

NASTURTIUM

Tropaeolum spp. Easy to grow, ornamental, edible, extremely vibrant and multiple showy shades...what more could you want in an annual?

Nasturtiums are loved by many and are considered to also aid in deterring pests from gardens. These low maintenance plants are also a great solution in poor, dry locations and do best if just left to naturally grow.

Alaska Mix **HEIRLOOM** #23240

Annual. *Tropaeolum nanum.* A dwarf nasturtium with attractive and unique green and cream marbled foliage. Large, single blooms in five rich colours are held well above the foliage. Height: 12". Approx. 40 sds/pkg.

(A) Pkg for \$3.40 (H) 25 g for \$11.15
(J) 125 g for \$30.65

Arizona Mix **NEW!** #23211

Annual. *Tropaeolum majus.* Celebrate summer with the burning colours of our Arizona Mix Nasturtiums! Mixed with colours like orange, red, and yellow flowers, and with petals pulled back, is reminiscent of the sun's rays. Requires a trellis. Approx. 40 sds/pkg.

(A) Pkg for \$5.90 (H) 25 g for \$15.35
(J) 125 g for \$54.60

Black Velvet **NEW!** #23214

Annual. *Tropaeolum minus.* This mahogany colour flower creates spectacular contrast while being backdropped by light green leaves. Up close, the flowers look like velvet or wood grain, but look much darker from afar. Define walking borders or definition to accent pieces around the home. Mounding type, grows up to 12" tall. Approx. 40 sds/pkg.

(A) Pkg for \$4.55 (H) 25 g for \$13.60
(J) 125 g for \$36.40

Cherry Rose **NEW!** #23224

Annual. *Tropaeolum majus.* This vibrant, mounding nasturtium produces lovely rose coloured flowers with a yellow eye, appealing to both the gardener and pollinators. Flowers are edible with a tangy, peppery taste. Use in salads, garnish your plates, or stuff with cream cheese like squash flowers. Approx. 40 sds/pkg.

(A) Pkg for \$3.55 (H) 25 g for \$9.90
(J) 125 g for \$21.50

Empress of India **HEIRLOOM** #23260

Annual. *Tropaeolum nanum.* Everyone loves this nasturtium in our trials! Strong-growing plants are compact with very dark green foliage and contrasting brilliant crimson, scarlet 2-3" flowers. Nasturtium flowers, leaves and unripe seed pods are edible with a strong, tangy flavour. These popular easy-to-grow annuals, grow 12-18" tall. Ideal for beds, terraces, window boxes, planters and trellises. Approx. 25 sds/pkg.

(A) Pkg for \$3.50 (H) 25 g for \$11.15
(J) 125 g for \$30.65

Jewel Mixed #23230

Annual. *Tropaeolum nanum.* Sweet, mild spicy flavour when grown as a green. Dwarf plants are covered with large double blooms in a rainbow of bright, sunny colours, held well above the deep green foliage. This popular easy-to-grow annual, grows 12-18" tall. Approx. 40 sds/pkg.

(A) Pkg for \$3.80 (H) 25 g for \$7.90
(J) 125 g for \$20.40 (L) 500 g for \$37.45

Ladybird Purple Spot **NEW!** #23229

Annual. *Tropaeolum minus.* A unique and attractive Nasturtium with flower colours varying from creamy white with paintbrush-like splashes of red, to fully red as they mature. A lovely plant for borders as it has a great mound-like plant shape, growing to 12" high with fantastic colour contrast. Approx. 25 sds/pkg.

(A) Pkg for \$4.55 (H) 25 g for \$13.60
(J) 125 g for \$36.40

Rumba #23215

Annual. *Tropaeolum minus.* Vibrant semi double blossoms of red and peach hues are set off by attractive dark green foliage. These ornamental edibles are great to use in salads with their peppery flavour or just as a garnish. Approx. 35 sds/pkg.

(A) Pkg for \$4.40 (H) 25 g for \$12.80
(J) 125 g for \$29.50 (L) 500 g for \$91.50

Single Tall Mix #23210

Annual. *Tropaeolum majus.* A tall climbing nasturtium with plentiful single 2" blooms in a bright coloured mix. Attractive medium green foliage which displays the blooms well. Support this 5-6' vining nasturtium with a fence or trellis, or let them trail over a wall. A popular easy-to-grow annual that prefers full sun to part shade. Approx. 45 sds/pkg.

(A) Pkg for \$3.00 (H) 25 g for \$7.60
(J) 125 g for \$16.50

Whirlybird Mix #23220

Annual. *Tropaeolum nanum.* Whirlybird has large, semi-double blooms in seven brilliant colours. Blossoms sit well on top of these dwarf, compact and non-trailing plants. Edible blossoms make colorful garnishes. Height: 12". Approx. 45 sds/pkg.

(A) Pkg for \$3.80 (H) 25 g for \$15.15
(J) 125 g for \$34.00 (L) 500 g for \$82.70

Akila Sunset Shades

NEMESIA

Seventh Heaven Mix #23250

Annual. *Nemesia foetens*. This sweetly scented flower has a profusion of blooms atop the 12-14" plants. The well branched plants have a mixture of pink, blue, purple, and white blooms perfect for planters or borders. This upright plant blooms to late summer attracting many pollinators. Approx. 50 sds/pkg.

(A) Pkg for \$5.95 (X2) 200 sds for \$23.95

NICOTIANA

Saratoga Mix #23015

Annual. *Nicotiana alata*. This impressive dwarf bushy plant with up right dense trumpet star shaped flowers is ready to greet the Hummingbirds. Saratoga is early to bloom with eye catching colours for visual impact in the garden or containers. Great for sunny or shaded areas, it loves the heat of summer. Height: 10-12". This plant is poisonous if ingested. Approx. 50 sds/pkg.

(A) Pkg for \$4.25 (X2) 200 sds for \$10.30

NIGELLA

Moody Blues #23871

Hardy Annual. *Nigella damascena*. Soothing pale to deep blue unique double blooms surround an exquisite green seed pod. The spectacular display of this variety will be the conversation of any garden. Bees and butterflies love the flowers and the seed pods are a great choice as a cut or dried flower. *Nigella* self seeds well so you will have them next year too. They love full sun and will grow 18-22" tall. Approx. 190 sds/pkg.

(A) Pkg for \$3.40 (F) 5 g for \$9.90
(H) 25 g for \$19.25

ORNAMENTAL GRASSES

Grasses are so versatile, adding unique shades and textures. And they are easy to grow! The attractive flower plumes are complemented with foliage in beautiful shades of colour that become even more stunning as they mature.

Broom Corn #29190

Annual. *Sorghum vulgare*. Broom corn or Sorghum are 6-8' tall and used for screens or dividers between corn varieties to reduce cross pollination, with the added benefit of unusual fall decorations. There are many colours and may be harvested at any stage of development for beautiful additions to bouquets. When dried the huge seed heads are excellent additions to Christmas décor. Maturity is 100-120 days. Approx. 350 sds/pkg.

(A) Pkg for \$3.50 (H) 25 g for \$6.95
(J) 125 g for \$20.40

Purple Majesty #23300

Annual. *Pennisetum glaucum*. This Millet has deep purple foliage, stems and cattail like plumes making it a striking accent plant. A single plant produces up to three 4' tall spikes and several shorter side shoots. AAS Gold Medal Winner. This heat and drought tolerant plant prefers partial to full sun. Start inside 8-10 weeks before planting out. Approx. 10 sds/pkg.

(A) Pkg for \$7.75 (W) 50 sds for \$28.30
(X2) 200 sds for \$77.50

Jade Princess #23400

Annual. *Pennisetum glaucum*. Bright intense green foliage with contrasting bushy, purple-brown heads. Jade Princess is an eye catcher next to our Purple Majesty and is a great performer for garden and container planting. Compact, versatile and long-lasting ornamental appeal. Jade Princess only grows 30" tall with its leaves reaching almost back to the soil. Approx. 10 sds/pkg.

(A) Pkg for \$7.75 (W) 50 sds for \$28.30
(X2) 200 sds for \$77.50

Javelin #23310

Annual. *Juncus pallidus*. Javelin is an annual grass that can grow up to 48" providing unique contrast in planters or landscapes. The stiff upright straw-coloured foliage provides winter interest in beds as well. It can handle heat, drought and standing water so it is very versatile. Approx. 10 pellets/pkg.

(A) Pkg for \$5.50 (W) 50 sds for \$27.95
(X2) 200 sds for \$62.95

OSTEOSPERMUM

***Osteospermum ecklonis*.** Use 'Osteo' in containers, trim your flower border or plant in groups throughout the garden. These attractive shades of pink, purple, rose and white will make your selection easy or just plant them all!

Asti Mix #23800

Annual. Large flowers in shades of lavender, white and purple mound over this exceptionally uniform plant. Blooms summer to fall with drought and frost tolerance. Grows 20" and covers an area with great performance. Prefers full sun but can tolerate part shade. Approx. 10 sds/pkg.

(A) Pkg for \$8.00 (W) 50 sds for \$34.40
(X2) 200 sds for \$83.40

Akila Series:

Annual. The Akila series offers strong, mounded plants that are self-branching, eliminating the need for pinching. Mixes offer diverse range in colour that will flower within 10 days of each other for constant colour all season long. Plant in mass plantings to get the full effect and colour range of the mixes. Grows 14" tall and 16-18" wide. Approx. 10 sds/pkg.

Grand Canyon Mix: NEW! #23868 Sunset Shades: #23865

(A) Pkg for \$8.00 (W) 50 sds for \$34.40
(X2) 200 sds for \$83.40

Did you know?

Deadheading petunias not only keeps the plants flowering longer but also helps keep plants healthy. Spent blooms are notorious for causing Botrytis, a common foliar fungus that affects the new and healthy blooms longevity, as well as adding spots to flowers, leaving a more undesirable plant.

(H) 25 g for \$45.40

Flander's Poppy #23855
Hardy annual. *Papaver rhoea*. In Flanders Fields the poppies blow.... These Heirloom bright red poppies are known as the Remembrance Day poppy. These hardy annuals will grow 24" tall making them a good choice for interplanting with grasses, or other wildflowers. They self-seed fairly reliably, without becoming weedy. Zone 7-9. Approx. 650 sds/pkg.
(A) Pkg for \$3.50 (F) 5 g for \$14.75
(H) 25 g for \$41.95

Ladybird #23850
Hardy annual. *Papaver commutatum*. 'Ladybird' is the British term for ladybug and an appropriate description of these poppies. These stunning, shiny 3" single blooms of bright crimson with a black blotch are on wiry 18" stems. They are easy to grow direct seeded in the garden. Approx. 3500 sds/pkg.
(A) Pkg for \$3.50 (F) 5 g for \$14.75
(H) 25 g for \$41.95

Pandora #27370
Hardy annual. *Papaver rhoeas*. Pandora has impressive shades of red to dark burgundy with a slight hint of silver to white on the older petals. A fantastic colour choice for a border plant that has strong stems reaching a height of 15- 25". With a little deadheading this poppy will bloom June through September. Direct sow seeds in late fall or cold stratify for 30 days in spring before planting. Approx. 3200 sds/pkg.
(A) Pkg for \$3.70 (F) 5 g for \$15.15
(H) 25 g for \$45.40

Pizzicato #27360
Perennial. *Papaver orientale* A semi-dwarf mixture of red, scarlet, orange, salmon, mauve, rose, pink and white blooms with black centers. 3-4" flowers are held on strong 24" tall stems which withstand strong winds. Since poppies do not like their roots disturbed direct seeding is best, if starting inside they must be kept in the dark to germinate, start in peat pots and be careful when transplanting. Approx. 10 pellets/pkg.
(A) Pkg for \$3.40 (X1) 100 sds for \$12.80

PORTULACA

Happy Hour Mix #23041
Annual. *Portulaca grandiflora*. The hotter the better for this sun loving succulent plant. Happy Hour produces masses of large semi double flowers in bright summer colours, blooming 2 weeks earlier than some other varieties. These 8" upright mounded plants are perfect for rock gardens. Approx. 25 sds/pkg.
(A) Pkg for \$5.15 (X1) 100 sds for \$12.80
(X5) 500 sds for \$40.05

Custom Seed Packages

An enjoyable aspect of the seed business is dealing with the countless numbers of individuals, non-profit organizations, schools and corporations who wish to promote their events through the production of Custom Seed Packages from Vesey's.

With a minimum order of only 100 packages, these become a very affordable giveaway at such events as weddings, graduation parties, bar mitzvahs or anniversaries. The fact that your guests can leave your function with a living product, that when planted, will be a lasting memory of your special event.

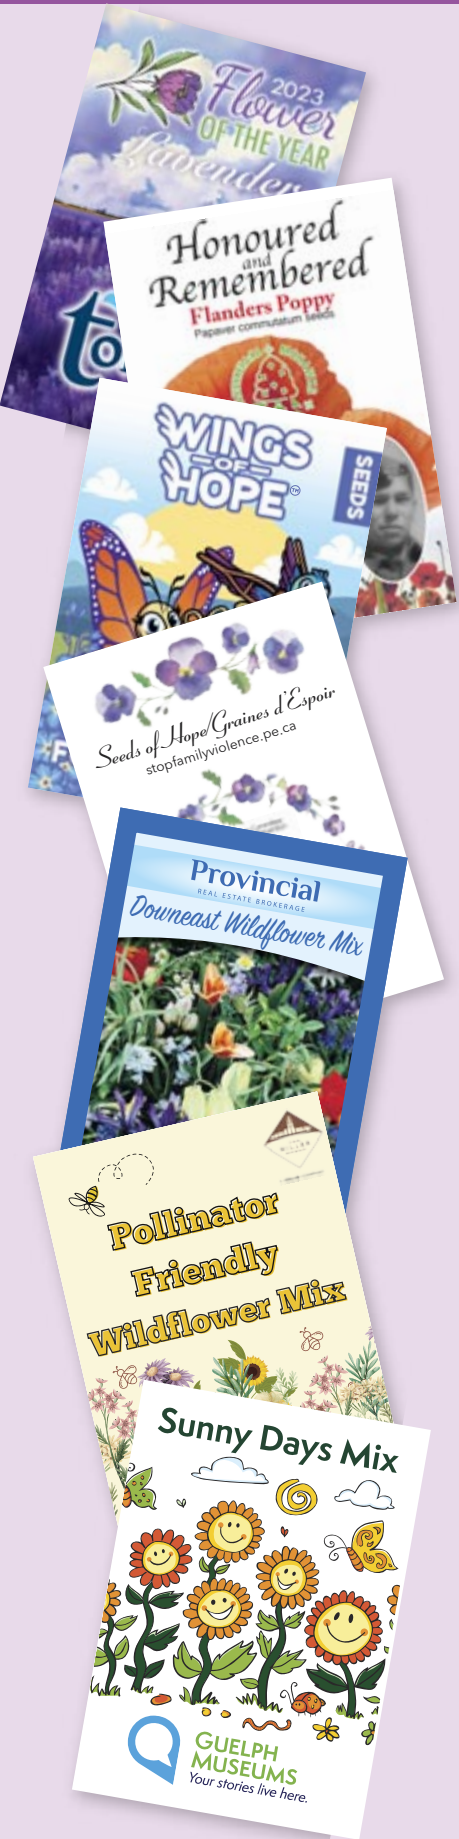

On a larger scale we have had the distinct privilege to supply major amounts of customized packages (such as poppy seed) to the Royal Canadian Legion and Veterans Affairs Canada. For several years we provided millions of packages through our partnership with General Mills during the 'Save the Bee' campaigns in Canada and the US. No order is too big or too small! Forget-Me-Nots are an ongoing favourite choice by our many Real Estate agent customers.

On any order over 5,000 packages we are able to have you provide your own artwork for your custom packages in full colour. On orders under 5,000 pieces, we tend to use existing Vesey's packages but still have the ability to print your special message on each package... even when ordering only 100 pieces. Check out a variety of existing packages available for overprinting at by scanning this QR Code.

To inquire about orders over 5,000 packages, please reach out by email at customseed@veseys.com or give us a call at **1-800-363-7333**.

Custom packages are a great gift and a very 'green' token of your appreciation. For your next event, sales meeting or special occasion, consider our Custom Seed Program and remember to order well in advance of your requirements.

RUDBECKIA

Rudbeckia spp. Rudbeckias of both annual and perennial varieties are so amazing in performance. Both hold up well during heat, drought and even in poor soil locations. No need for extra care, as this plant looks after itself keeping its beauty throughout the whole summer. So easy to grow and looks fabulous planted in drifts with ornamental grasses, along borders, or in large flower containers. A long lasting cutflower, low maintenance and pest-free.

Amber Fire **NEW!** #27592

Biennial. Rudbeckia hirta. Amber Fire has a natural colour variation with all petals having a mixture of dark burgundy and dark/light orange, all the colours of fall! Allow plants to drop seed for continuous blooms season to season. 6" blooms are situated on 22" tall plants. Zone 4-8. Approx. 20 sds/pkg.

(A) Pkg for \$4.80 (X1) 100 sds for \$12.80
(X5) 500 sds for \$40.05

Goldsturm #27590

Perennial. Rudbeckia fulgida. A bold, dependable perennial with golden-yellow flowers often called Black-Eyed Susan. Blooms reliably from July-October on sturdy stems. Easy to grow and perfect for a long-lasting cut flower. Mass plant in borders with ornamental grasses and other late blooming perennials. Start seed indoors 6-8 weeks before last frost. Height 24-30". Approx. 50 sds/pkg.

(A) Pkg for \$2.90 (X2) 200 sds for \$7.10

Toto Series **NEW!**

Biennial. Rudbeckia hirta. Toto series is early flowering and because of its compact height, can be grown in pots or utilized as a walking path border. 2" flowers are settled on stems reaching 14", making for great cut flowers. Toto Mix includes a light yellow, dark yellow, and two-toned variety of dark yellow and light burgundy. Zone 4-8. Approx. 20 sds/pkg.

Gold: #27594

Mix: #27595

(A) Pkg for \$3.80 (X1) 100 sds for \$10.70
(X5) 500 sds for \$37.50

SALVIA

Salvia spp.

Fairy Queen #27586

Annual. Salvia farinacea. This sapphire blue, multi branched salvia is valued for its vertical accents to containers and beds. The 12-18" stems make excellent cut flowers, if picked before they are fully open, they can be dried for winter bouquets. Approx. 25 sds/pkg.

(A) Pkg for \$3.95 (X1) 100 sds for \$10.95

Lighthouse Red #27582

Annual. Salvia splendens. This is a low maintenance landscape plant, that can also be used in container planting. The 24" tall bushy plants display long lasting scarlet spikes of colour all summer long to make a big impact in your garden bed. Approx. 25 sds/pkg.

(A) Pkg for \$3.95 (X1) 100 sds for \$10.95

Summer Jewel Mix #27580

Annual. Salvia coccinea. Super early, profuse non-stop bloomer. Very uniform in height. This mixture made up of AAS winners consisting of lavender, white, pink, and red, adds a whimsical element to your garden. Grows to a height of about 18". Hummingbirds and pollinators love them. Grows well in mixed containers or garden settings. Approx. 25 sds/pkg.

(A) Pkg for \$3.40 (X1) 100 sds for \$9.95

SHASTA DAISY

Alaska #27570

Perennial. Chrysanthemum maximum. This standard white daisy is our top choice for creating 'Daisy Fields'. Drought tolerant, attractive to butterflies and can be direct seeded after last frost. Full sun to partial shade. Height: 24-36". Approx. 1700 sds/pkg.

(A) Pkg for \$2.90 (F) 5 g for \$5.80
(H) 25 g for \$14.70

SNAPDRAGON

Antirrhinum spp.

Candy Showers Mix #24335

Annual. Antirrhinum majus nanum pendula. These compact 10-12" trailing early blooming Snapdragon will bloom all summer long, adding brilliant colour to pots, hanging baskets or flowerbed edges. Approx. 10 pellets/pkg.

(A) Pkg for \$6.95 (W) 50 sds for \$15.95

Madame Butterfly #24323

Annual. Antirrhinum majus. This is where you will find the butterflies and why it is an AAS Winner. Breathtaking multi-coloured fully double ruffled petals are the ideal fit when paired with any other annual or perennial. Dense Azalea-shaped flowers come in stunning shades that are long lasting. The stalks grow 24-36", making them ideal as a cut flower. Approx. 50 sds/pkg.

(A) Pkg for \$5.15 (X2) 200 sds for \$11.40
(M1) 1,000 sds for \$27.55

Potomac Mix #24320

Annual. Antirrhinum majus. These snapdragons can reach 60" in height making them excellent cutting flowers. Potomac offers an excellent mix of bi-coloured snapdragon blooms. They have strong stems, but support is beneficial. These flowers are suitable for field or greenhouse production. The sweetly scented blooms may be eaten. A mix of up to 10 different colours prefers full sun. Approx 50 sds/pkg.

(A) Pkg for \$5.45 (X2) 200 sds for \$20.50

Rocket Mix #24324

VESEYS TOP PICK! Annual. Antirrhinum majus. Tall, bright and beautiful best describe this formula mix called the Rocket series. Closely set florets are displayed on a vigorous, sturdy stem and have excellent heat tolerance. This variety of snapdragons are ideal as a cut flower with its long stem of 30-36". This mixture is made up of AAS winners consisting of bronze, gold, pink, red, rose, and white. The intense shade will delight any flower garden. Approx. 50 sds/pkg.

(A) Pkg for \$4.00 (X2) 200 sds for \$9.15
(M1) 1,000 sds for \$18.75

Snaptastic Mix #24330

Annual. Antirrhinum majus. Sturdy upright habit with superior strong 14-16" stems makes this mix excellent for containers and borders. Intense, long lasting flower stalks in a mix of yellow, orange flame, magenta, pink and red stand up to environment changes. Approx. 50 sds/pkg.

(A) Pkg for \$4.25 (X2) 200 sds for \$10.30
(M1) 1,000 sds for \$25.30

Rio Carnival F1

Sunny Days Compact Mix

Copper Queen

Firecracker

STOCKS

Vintage Mix #27600
Annual. *Matthiola incana*. An heirloom bedding plant with lovely, scented flowers, about half will be fully double blooms. This garden classic is a mix of early, bright, fragrant blooms on sturdy stems ideal for cut flower production. This well branched dwarf series prefers cool growing conditions, grows to 15-20" and is an excellent garden performer. Approx. 50 sds/pkg.
 (A) Pkg for \$4.25 (X2) 200 sds for \$10.65
 (M1) 1,000 sds for \$27.55

STRAWFLOWER

Monstrosum Mixed #29200
Everlasting Annual. *Bracteantha bracteata*. The large fully double, crisp textured flowers on strong stems are an excellent variety for commercial air drying. This plant grows 30-36" with a wide range of colourful 1.5-3" blooms ranging from white to violet. Start seed indoors 6-8 weeks before last frost. Approx. 320 sds/pkg.
 (A) Pkg for \$2.90 (D) 2 g for \$10.80

SUNFLOWERS

***Helianthus annuus*.** Sunflowers can reliably turn any frown upside down. Bright and cheery annual blossoms that start to flower in mid summer bring a smile no matter what colour or size you choose to grow. Sunflowers can be planted in so many ways, even as a small flowering hedge that gives continuous colour right into the fall. Grow large types as cutflowers or dry for seed to feed the birds. Sunflowers are known to captivate many different types of beneficial insects, especially bees and monarch butterflies. Plant in full sun for best impact.

Dwarf Varieties

Bert #24350
VESEYS TOP PICK! Annual. Sturdy and strong, great for cut flower production, containers or landscape. These pollenless, dwarf 14-16" plants have bright yellow flowers with a dark center that makes the flowers stand out on the lush green foliage. Approx. 15 sds/pkg.
 (A) Pkg for \$7.40 (X1) 100 sds for \$23.30
 (X5) 500 sds for \$73.50

Dwarf Pacino Mix #24471
Annual. Sunshine in a pot! an abundance of 5" flowers on dwarf 12-16", bushy, well branched plants. Mix of gold, cola and lemon, are perfect on your sunny patio. Approx. 20 sds/pkg.
 (A) Pkg for \$4.25 (X2) 200 sds for \$18.30
 (M1) 1,000 sds for \$46.30

Junior #25022
Annual. This pollen free 2' dwarf branching sunflower has exceptionally long lasting 4" flowers. Plants have an ornamental appearance even before flowering. The blooms appear about 55 days after sowing. Approx. 20 sds/pkg.
 (A) Pkg for \$4.25 (X2) 200 sds for \$18.30
 (M1) 1,000 sds for \$46.30

Rio Carnival F1 #24395
Annual. This is a pollen-free variety of sunflower, with 5-7" flowers. The shrub like habit of the plant makes it a great border plant as well as growing in a planter. The dark stem and leaves give good contrast to the dark burnt red center and bright yellow outer ring. Maturity is approximately 55 days, so can be successively planted for longer flowering season. Height: 24". Approx. 20 sds/pkg.
 (A) Pkg for \$4.90 (X2) 200 sds for \$21.40
 (M1) 1,000 sds for \$51.20

Sunny Days Compact Mix #24712
Annual. Perfect solution for a short colourful hedge. Cheerful mix of colours form a neat and compact habit at only 24-30" tall with blossoms that are 4-5". Even if its a cloudy day, you will still see sun with a multitude of flowers. Great addition to any flower arrangement. Approx. 30 sds/pkg.
 (A) Pkg for \$4.25 (H) 25 g for \$15.90
 (J) 125 g for \$41.75

Cutting Varieties

Copper Queen #24750
Annual. Large golden yellow petals with a hint of copper red are stunning on this branching 6-8' plant. This pollen free sunflower is great for cut flowers or to enjoying in the garden. Approx. 20 sds/pkg.
 (A) Pkg for \$4.90 (X2) 200 sds for \$21.40
 (M1) 1,000 sds for \$51.20

Firecracker #24390
VESEYS TOP PICK! Annual. This semi-dwarf sunflower has a profusion of 4-6" bi-coloured blooms ranging in colours of burgundy to gold with a chocolate center. These pollen free sunflowers grow 2-3' in height, making them ideal for planters or flowerbeds. Approx. 20 sds/pkg.
 (A) Pkg for \$4.25 (X2) 200 sds for \$18.30
 (M1) 1,000 sds for \$46.30

Giant Varieties

American Giant #24455

VESEYS TOP PICK! Annual. Look no further for the best huge variety to win sunflower competitions, growing to 16'. This hybrid single stalk beauty supports enormous leaves and is topped with 10" golden yellow flower that bees just can't resist. Grow this giant for a stunning display along the back of any flower garden. Matures in 70 days. Approx. 20 sds/pkg.

(A) Pkg for \$3.70 (X2) 200 sds for \$14.85
(M1) 1,000 sds for \$37.45

Grey Stripe HEIRLOOM #24610

Annual. The really big one! Still our number one selling sunflower. Grow for a windbreak at the rear of the garden or for seed for the birds to eat in winter. Extra large heads measuring up to 12" across are supported by sturdy 6-8' stalks. Approx. 25 sds/pkg.

(A) Pkg for \$3.00 (H) 25 g for \$6.45
(J) 125 g for \$14.70 (L) 500 g for \$25.95

Giganteus #24760

Annual. If you like to grow giants, then this sunflower is for you. A single flowered giant type that produces heads 8-10" across and plants that stand 10-12' in height. Dried heads make excellent bird feeders. Approx. 30 sds/pkg.

(A) Pkg for \$3.00 (H) 25 g for \$6.45
(J) 125 g for \$14.70 (L) 500 g for \$25.95

High Hopes #24405

Annual. Rise high and Hope big. One of the tallest varieties our trials. Huge 10-12" flower heads on stalks up to 15-18' high. A sunny, sheltered area is best to grow this giant. Approx. 20 sds/pkg.

(A) Pkg for \$4.90 (X2) 200 sds for \$22.35
(M1) 1,000 sds for \$57.30

Kong #24450

Annual. This beautiful monster reaches heights of 14' or more! Not only is 'Kong' very tall, but it has a branching habit, so that it produces numerous 5-6" flowers instead of just one per plant. Approx. 20 sds/pkg.

(A) Pkg for \$4.00 (X2) 200 sds for \$14.85
(M1) 1,000 sds for \$37.45

Textile Mulching Canvas

Textile Mulching Canvas

Thinking of selling cut flowers or reducing maintenance in the flower patch? Textile Mulch creates a barrier that reduces weed growth, keeps soil warm, and reduces soil moisture evaporation. 8-10", evenly spaced holes, will provide high density Zinnia growing and not harm yields.

See page 125 for more season extending ideas.

Western Mix

Alternative Lawn Mix

#29262

An eco-friendly colourful and diverse alternative to traditional grass lawns. This wildflower and grass mix contains annuals and perennials of daisies, poppies, viola, thyme, chamomile, clover and fine fescue. This mix is useful as a flowering lawn or low growing ground cover with a maximum height of 12-16" tall. Sowing rate 125g/1,000 sq. ft.

Bee Feed Mix

#29261

This mix is composed of reseeding annuals and perennials that will bloom all season long, attracting a wide range of pollinators. The mix includes Aster, Coreopsis, Cosmos, Coneflower, Poppy, and many more. Sowing rate: 125g/1,000 sq. ft.

Bird & Butterfly Mix

#29550

A very popular mix for increasing diversity in your garden, this choice mixture provides seeds and nectar to songbirds, hummingbirds and butterflies. Contains a mixture of reseeding annuals and perennials including Milkweed, Bachelor's Button, Coreopsis, Poppies, Gaillardia, Rudbeckia and many more. Seeding rate: 125g/1,000 sq. ft.

Cottage Garden Mix

#29263

Cottage gardens have adorned countless properties for centuries, with bright and cheery shades of gold, pink, blue, lavender and white lasting all season long as they grow in a natural setting or as a border. This antique style garden includes Zinnias, Poppies, Cosmos, Candytuft, Lupine, Foxgloves, Johnny Jump Ups, and Four O'Clocks to name a few. Sowing rate: 125g/1,000 sq. ft.

Downeast Mixture

#29510

Our most popular mixture is unequalled by any other has been especially adapted to the Northeast and its rigorous climate. This blended mix contains perennials and reseeding annuals which include Cornflower, Flax, Poppy, Lupine, Indian Blanket, Coneflower, Coreopsis, and many more. Sowing rate: 125g/1,000 sq. ft; 3-4 kg/acre.

Drought Tolerant Mix

#29280

This mix is just perfect for those areas that are impossible to water or are extremely hot and dry. Includes perennials and annuals such as Everlasting Pea, Lupin, Coreopsis, Gaillardia, Sage, Primrose, Clover, and Rudbeckia. Sowing Rate: 125g/1,000 sq. ft.

Monarch Butterfly Garden Mix

#29275

The Monarch Butterfly Mixture contains annual and perennial flowers that will provide nectar to many species of butterflies, as well as host plants for larval. Included in the mix are Gaillardia, Milkweed, Cosmos, Aster, Coneflower, Alyssum, and Zinnia. Sowing rate: 250g/1,000 sq. ft.

Shade Mix

#29530

A blend specially suited for shaded or semi-shaded areas, with one to four hours of sunlight per day. Mixture has annuals and perennials such as Columbine, Larkspur, Coneflower, Snapdragon, Sweet William Pinks, Forget-Me-Not, and more. Sowing rate: 125g/1,000 sq. ft.

Western Mix

#29300

Developed for ornamental landscapes. Composed of annuals and perennials that provide colour through out the growing season and adapted to the region. This mix includes Lupins, Poppies, Coreopsis, Flax, Blanket flowers and much more. Sowing rate: 125g/1,000 sq. ft.

GREEN is our favourite colour

With 85 years in the gardening industry under our belt we are well aware of the need to be green. We thought you might have an interest in some of our more recent initiatives. Here are just a few of our ongoing earth friendly changes we have undertaken:

Shipping Cartons

As part of Vesey's Green Program, all our shipping boxes contain a minimum total recycled content of 70% with 60% being post-consumer recycled material. All these cartons are recyclable, repulpable and biodegradable.

Cardboard Recycling

On a daily basis, we receive a large quantity of cardboard boxes containing product from our many suppliers around the globe. Frequently these boxes are no longer useable. Rather than throwing away this cardboard, we shred it to create a wonderful packing material that is utilized when shipping a variety of our products. Using a specialized shredding machine, we make use of the cardboard we receive in a manner that's beneficial to our operation, the product we are shipping, our customers, and the planet.

Bulb Packaging

We know that taking good care of our environment is very important to our customers. It is very important to us too! We are pleased that our bulb packaging continues to be 100% Bio-based material. This means we will no longer ship our product to you in 'oil made' plastic bags. Our bulb packaging is made from the residue of processed sugar cane, which in the past would have been disposed of at garbage landfill sites. This process captures CO2 and reduces our carbon footprint.

Geothermal

In recent years we have switched our oil furnace heating source to a geothermal system within our shipping facility. The geothermal system uses pumps and takes heat from ground water to heat the building in winter as well as air conditioning in the summer.

Peas, Beans & Corn Packaging

We use poly bags to package larger seeds like peas, beans, and corn. In 2019 we switched from LLDPE poly to LLDPE biodegradable poly. This is a major step forward in reducing landfill waste.

Plant Markers

All the plastic plant markers that we offer are made from 90% post-consumer plastic.

Fruit, Berries & Perennial Vegetables

Viking

Greensleeves

Honeycrisp

Liberty

Novamac

**Balsors Hardy Blackberry
Chester Blackberry**

Chippewa

Patriot

Northland

For many gardeners, the ultimate taste experience is that which comes from growing your own fruits and berries. We are pleased to offer a wide selection of fruits and berries from the first rhubarb of spring to the sweet promise of fall grapes. Whether you're interested in preserving or eating straight off the plant, a garden is not complete without fruits and berries. Even in varied Canadian climates, you can be assured of success with our selection of hardy varieties that will reward you with the fresh taste we all crave!

ARONIA BERRIES

Aronia melanocarpa. Poised to become the next superfood of our time, these small black berries are extremely high in antioxidants with 58% more antioxidant content than blueberries and 90% more than cranberries. They are versatile enough for use in endless possibilities such as jam, juice and wine. And, as an added bonus, the shrubs are very easy to grow in almost any condition, tough and disease resistant! 3.5" pot.

Viking VESEYS TOP PICK! #37823

A self-fertile variety favoured by commercial growers for its high yield of extra large fruit on robust, 8 foot shrubs. The berries of 'Viking' are a uniform size and absolutely bursting with flavour. Hardy to zone 3.

1 pkg of 1 plant: \$44.95 • 2 pkgs: \$38.20/pkg
4+ pkgs: \$33.70/pkg

APPLES

Malus. Crispy, juicy apples right in your back yard. The varieties that we have selected are scab resistant, making them much easier to look after. For best results, two varieties should be planted. We ship 1 yr. whips, approximately 18-24" in height which have been grafted onto hardy rootstock. Trees should mature to 15-18 ft. **Apple trees cannot be shipped to B.C.**

Greensleeves #37816

An English variety that we LOVE! Green fruit turns yellow at maturity. Superb flavour and disease resistance. Should be in every orchard. Hardy to zone 4.

1 pkg of 1 tree: \$62.95 • 2 pkgs: \$53.50/pkg
4+ pkgs: \$47.20/pkg

Honeycrisp VESEYS TOP PICK! #37051

An exceptional apple that has taken the apple world by storm. Sweet, super crisp yellow flesh. Stores very well. Good resistance to scab. Hardy to zone 3.

1 pkg of 1 tree: \$62.95 • 2 pkgs: \$53.50/pkg
4+ pkgs: \$47.20/pkg

Liberty #37810

Superlative variety resistant to a host of diseases. This apple has outstanding flavour, and is aromatic and juicy. The conical red fruit is among the very best and as an added bonus, it is excellent for cider. Hardy to zone 4.

1 pkg of 1 tree: \$62.95 • 2 pkgs: \$53.50/pkg
4+ pkgs: \$47.20/pkg

Novamac #37050

Exceptional high quality apple. This scab-free McIntosh type apple has that old-fashioned sweet flavour we all know and love. YUM! Crisp white flesh and shiny red skin. Hardy to zone 4.

1 pkg of 1 tree: \$62.95 • 2 pkgs: \$53.50/pkg
4+ pkgs: \$47.20/pkg

Chester Blackberry #37809

Considered to be one of the most winter hardy and thornless varieties available. Chester produces large, very sweet, high quality berries that are juicy and have great flavour. Excellent fresh for use in jams, jellies and baking. Zone 4. 4" pot.

1 pkg of 1 plant: \$23.95 • 2 pkgs: \$20.35/pkg
4+ pkgs: \$17.95/pkg

BLUEBERRY

Vaccinium. High-bush blueberries with high yields in short season areas. Bushes will grow to about 3-4 feet tall. Although these varieties are considered self-fertile, this is only true for 'Patriot'. For 'Chippewa' and 'Northland', you will receive a better crop and bigger berries if you plant 2 different varieties. Hardy to zone 4. Requires acidic soil. We ship 2 yr. old plants in 4" pots. Begins producing fruit in the third year.

Chippewa #37100

Mid-season variety that is self-fertile so can be grown on its own. Excellent quality.

1 pkg of 1 plant: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

Patriot #37815

Attractive, powder blue fruit with excellent flavour and quality. Mid-late season variety.

1 pkg of 1 plant: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

Northland VESEYS TOP PICK! #37102

Branches will not break under heavy snow load. Good quality with a wild berry flavour.

1 pkg of 1 plant: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

BLACKBERRY

Balsors Hardy Blackberry VESEYS TOP PICK! #37806

Rubus. An exceptional hardy selection of blackberry from Nova Scotia. Produces very large, sweet berries late in the summer. These dark, juicy berries are great for baking, but most people aren't able to resist the temptation to eat them right off the plant. Produces fruit the second year. Zone 4. 4" pot.

1 pkg of 1 plant: \$31.95 • 2 pkgs: \$27.15/pkg
4+ pkgs: \$23.95/pkg

Consort Black

Titania Black

Red Lake

Firecracker Goji

Hinnomaki

Himrod Seedless

Canadice Seedless

Valiant

Marquette

Aurora

Indigo Gem

Boreal

CURRENT

Ribes. 'Red Lake' is self-pollinating. Although two different varieties of black currants are not required for pollination, they typically yield more fruit when two varieties are planted. No.1 size plants.

Consort Black #37402

Deep ebony fruit, perfect for jams and preserves. Medium sized berries on compact plants growing about 4 feet tall. 'Consort' is completely resistant to white pine blister. Very hardy. Zone 2. Produces fruit in 2-3 years.

1 pkg of 1 plant: \$38.95 • 2 pkgs: \$33.00/pkg
4+ pkgs: \$29.20/pkg

Titania Black #37403

Titania' currants are matte black-brown in colour and produce rich, deeply flavoured juice. Good for jams and preserves. Fruit is easy to pick and stores very well for several months. Hardy to zone 3.

1 pkg of 1 plant: \$38.95 • 2 pkgs: \$33.00/pkg
4+ pkgs: \$29.20/pkg

Red Lake #37400

Beautiful clusters of fruit as red as rubies. Red currants are best known for wonderful jellies, but with their bright red colour these also make a shining addition to summer salads and drinks. 'Red Lake' is very productive and one of the best tasting currants. Hardy to zone 2. Produces fruit 2-3 years.

1 pkg of 1 plant: \$38.95 • 2 pkgs: \$33.00/pkg
4+ pkgs: \$29.20/pkg

GOJI BERRY

Firecracker #37805

Lycium barbarum. Self-pollinating and early! Goji berries are renowned for their health benefits. The thornless plants of this variety have long, flexible canes of gray-green foliage with purple-white blooms followed by scarlet-red fruit. 'Firecracker' is one of the earliest to ripen. This 'superfruit' is juicy and sweet. The plants grow upright 5 to 8 feet, with up to 10 feet of spread. Hardy to zone 3 with protection. 4" pot.

1 pkg of 1 plant: \$29.95 • 2 pkgs: \$25.45/pkg
4+ pkgs: \$22.45/pkg

GOOSEBERRY

Hinnomaki #37401

Ribes. Dual purpose, ornamental and edible. 'Hinnomaki' has a unique tart and sweet combination. Tart skin covers the sweet flesh of the tasty ruby berries, so you can enjoy both flavours. The plants produce little white flowers and the green foliage turns bright red in the fall. The bush grows to five feet in height with a spread of four feet. Mildew-resistant and cold hardy to Zone 3. 4" pot.

1 pkg of 1 plant: \$31.95 • 2 pkgs: \$27.15/pkg
4+ pkgs: \$23.95/pkg

GRAPES

Vitis. A selection of hardy grapes offering a wide range of uses from sweet table grapes to delicious grape jelly and delectable home-made wine. Although these grapes are hardy, areas that are susceptible to late frosts should be avoided. Planting more than one type will improve your harvest. Bears fruit in 3-4 years. 1 plant.

Himrod Seedless #37304

Sweet and seedless. This self-pollinating variety produces sweet, medium sized grapes that turn yellow when ripe and can withstand cold winter temperatures. Plants are hardy to zone 5.

1 pkg of 1 plant: \$25.95 • 2 pkgs: \$22.00/pkg
4+ pkgs: \$19.45/pkg

Canadice Seedless #37814

VESEYS TOP PICK! 'Canadice' produces beautiful, pink-blushed grapes with excellent flavour. Compact fruit clusters. Produces 35-40 clusters per vine. Hardy to zone 5.

1 pkg of 1 plant: \$25.95 • 2 pkgs: \$22.00/pkg
4+ pkgs: \$19.45/pkg

Valiant #37305

VESEYS TOP PICK! The hardiest grape on the market. Dark purple-black berries in a very tight cluster. A mild flavoured grape that is very tasty and the absolute best for juice! Hardy to zone 2b.

1 pkg of 1 plant: \$38.95 • 2 pkgs: \$33.00/pkg
4+ pkgs: \$29.20/pkg

Marquette #37821

A hardy, high quality red wine grape with disease resistance and complex flavour. 'Marquette' has high sugar and moderate acidity making it ideal for wine making. Finished wines can have notes of cherry, pepper and spice. Self-pollinating. Hardy to zone 3b.

1 pkg of 1 plant: \$38.95 • 2 pkgs: \$33.00/pkg
4+ pkgs: \$29.20/pkg

HASKAP

Lonicera. Unique, tart flavour compares to a cross between blueberries and raspberries, but really is unique. These native shrubs have been bred in Saskatchewan and are harder than highbush blueberries, and more tolerant of a wide range of soil types. Can be used for fresh eating, baked into desserts like blueberries, or even dried like raisins. They really excel when turned into sauces, and make the very deepest purple jam. Extremely high in antioxidants. Will begin bearing fruit in 2-3 years. Birds also love the fruit, so Black Netting is recommended. All are hardy to Zone 2.

AURORA & INDIGO GEM HASKAP

An early maturing pair with excellent flavour. They are great companions with similar size and flavour. More compact than the "Boreal" varieties, and they fit well in smaller gardens. Must be grown together for pollination. 2" plug.

Indigo Gem #37456

High yield with a delicious tangy plum flavour. Matures to 5-6'.

1 pkg of 1 plug: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

Aurora (Pollinator) #37452

Upright, up to 5' high.
1 pkg of 1 plug: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

BOREAL HASKAP

Three exciting haskaps; bigger berries, bigger plants, all with great flavour. 'Blizzard' will bloom first and then 'Beast' will overlap in blooming, followed by 'Beauty'. Since 'Beast' blooms mid-season and overlaps the bloom time of all three, it can pollinate both 'Blizzard', which blooms early and 'Beauty', which blooms late. All will grow to about 5-6 feet. 2" plug.

Boreal Beast VESEYS TOP PICK! #37453

Mid-season maturing, large fruit.
1 pkg of 1 plug: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

Boreal Beauty #37454

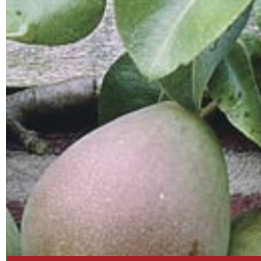

Best tasting, late-maturing.
1 pkg of 1 plug: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

Boreal Blizzard #37455

Earliest of the Boreals, with the largest fruit.
1 pkg of 1 plug: \$18.95 • 2 pkgs: \$16.00/pkg
4+ pkgs: \$14.20/pkg

HARDY CHERRIES

Prunus. Romance Series. Beautiful, bright red cherries, ideal for home made cherry pie. These exciting new bush cherries, developed by the University of Saskatchewan after 50 years of breeding work, are perfect for the home gardener. They are very hardy (zone 3), disease resistant and their bush shape is very suitable for the garden. They are heavy yielding, producing up to 10 to 15 kg per plant. With proper care they should begin to bear fruit in 3 years, with full maturity (7 to 8 feet) in 5 to 6 years. These are tart cherries, ideal for cooking, but are also sweet enough for fresh eating. We offer three varieties, all are one year old plants in 4" pots. All are self-pollinating but better results are obtained when two varieties are planted.
Cherry trees cannot be shipped to BC.

Juliette VESEYS TOP PICK! #37200
Early to mid season maturity. Dark red 5 gram fruit, with excellent flavour. Good for fresh eating and processing.
1 pkg of 1 plant: \$37.95 • 2 pkgs: \$30.50/pkg
4+ pkgs: \$28.45/pkg

Crimson Passion #37201
Early to mid season maturity. Dark red 7 gram fruit are the largest in the series, and the sweetest of the three. Fresh eating type. More compact plant than the others.
1 pkg of 1 plant: \$37.95 • 2 pkgs: \$30.50/pkg
4+ pkgs: \$28.45/pkg

Romeo #37203
Late season. Dark red, almost black, 4 gram fruit have good flavour and make dark red cherry pies and juice.
1 pkg of 1 plant: \$37.95 • 2 pkgs: \$30.50/pkg
4+ pkgs: \$28.45/pkg

PEAR TREES

Pears make a great addition to a home orchard. Wonderful sweet flavour, and they have less pest issues than apples. Pear trees have an attractive upright shape, and are highly ornamental with beautiful white blossoms in the spring and blazing foliage in fall. 18-24" grafted tree.
Pear trees can't be shipped to B.C.

Patten VESEYS TOP PICK! #37521
The best quality hardy pear. Large fruit, sweet, excellent for fresh eating, and good for canning. Requires another variety as a pollinator. Should be picked 1 week before maturing and allowed to ripen off the tree. Hardy to Zone 3.
1 pkg of 1 tree: \$68.95 • 2 pkgs: \$58.60/pkg
4+ pkgs: \$51.70/pkg

Honey Sweet #37525
The name says it all. A sweet, smooth pear with excellent flavour. Unique in that it will set fruit without a pollinator, but does much better when grown with another variety. Hardy to zone 4.
1 pkg of 1 tree: \$68.95 • 2 pkgs: \$58.60/pkg
4+ pkgs: \$51.70/pkg

RHUBARB

Canada Red Rhubarb #37804
VESEYS TOP PICK! Rheum. 'Canada Red' is both quick growing and hardy. Coming back bigger and better each season, this plant requires very little care. Perfect for pies and delightful when combined with strawberries in a cobbler. Harvest fruit second year. Hardy to all zones. No.1 crown.
1 pkg of 1 plant: \$21.95 • 2 pkgs: \$18.65/pkg
4+ pkgs: \$16.45/pkg

RASPBERRY

Rubus. Delicious raspberries are perfect for homemade jam and preserves and even better eaten straight off the plant. Raspberries are hardy to zone 3. No.1 sized canes. Produces fruit in second year.

Anne #37602
This raspberry produces exceptionally flavoured yellow berries that have a slight pink blush to them. 'Anne' is perfect for fresh eating and ripens in late August.
1 pkg of 3 canes: \$31.95 • 2 pkgs: \$27.15/pkg
4+ pkgs: \$23.95/pkg

Boyne VESEYS TOP PICK! #37600
This ultra-hardy raspberry is very reliable. 'Boyne' produces dark red, medium sized berries.
1 pkg of 3 canes: \$31.95 • 2 pkgs: \$27.15/pkg
4+ pkgs: \$23.95/pkg

Encore #37605
Late season raspberry to keep you picking for longer. Very hardy, nearly spineless plants. Large fruit with excellent flavour.
1 pkg of 3 canes: \$31.95 • 2 pkgs: \$27.15/pkg
4+ pkgs: \$23.95/pkg

Nova #37601
'Nova' is almost thornless and produces bright red, medium sized berries early in the season, with a very nice but tart flavour.
1 pkg of 3 canes: \$41.95 • 2 pkgs: \$35.65/pkg
4+ pkgs: \$31.45/pkg

Royalty #37606
Beautiful dusky red-purple fruit. This late season raspberry produces large berries with excellent flavour. Perfect for fresh eating and makes the darkest red jelly.
1 pkg of 3 canes: \$31.95 • 2 pkgs: \$27.15/pkg
4+ pkgs: \$23.95/pkg

KIWI

Arctic Kiwi #37829
NEW! Actinidia kolomikta. With flavour even sweeter than the tropical fuzzy Kiwi, and vigorous vines so lovely they are often grown as an ornamental in Canadian climates, you'll want to try growing Arctic Kiwi in your own yard! Fruit is small, almost grape sized with an edible skin and wildly sweet, delicious flavour! Vines are so robust you can quickly cover an arbor. Shipping a No.1 plant, 8-12" in height.
1 pkg of 1 plant: \$38.95 • 2 pkgs: \$33.00/pkg
4+ pkgs: \$29.20/pkg

Male Pollinator #37550
NEW! One male pollinator can pollinate at least 9 females. You must use an 'Arctic Kiwi' male.
1 pkg of 1 plant: \$38.95 • 2 pkgs: \$33.00/pkg
4+ pkgs: \$29.20/pkg

Albion

Cavendish

Sable

Bob Gordon Elderberry

Trader

Opal Plum

Horseradish

Guelph Millennium

Honeywood

STRAWBERRY

Fragaria. The berry crop that no garden should be without. Nothing compares to the flavour of the first strawberries picked fresh from the garden. We offer a selection of varieties, ensuring a long harvest. Produces fruit in second year. Strawberries are planted 12-18" apart, in rows 4 feet apart and are hardy to zone 2 if covered. No.1 sized roots.

Albion (Everbearing) #37701

VESEYS TOP PICK! Sweet homegrown berries all summer long. 'Albion' is a day neutral type that produces berries all summer and into the fall. In autumn with a late frost we have picked berries well into October. With great flavour and good yields, 'Albion' produces more runners and larger berries than other varieties we've tested. Hardy to zone 2 if covered.

1 pkg of 25 roots: \$52.95 • 2 pkgs: \$45.00/pkg
4+ pkgs: \$39.70/pkg

Kent #37702

'Kent' is a vigorous mid-season variety which produces high yields of bright red fruit. Kent has been a long-time favourite of both home gardeners and commercial growers. Hardy to zone 2 if covered.

1 pkg of 25 roots: \$41.95 • 2 pkgs: \$35.65/pkg
4+ pkgs: \$31.45/pkg

Cavendish **NEW!** #37824

Developed in Nova Scotia, the Cavendish Strawberry has long been considered one of the very best and most reliable June bearing varieties by U-Pick growers, market farmers and home gardeners alike! Superior winter hardiness, large, bright red and juicy berries, excellent runner formation and a long ripening season, not to mention a dreamy, sweet strawberry flavour. Hardy to zone 3.

1 pkg of 25 roots: \$41.95 • 2 pkgs: \$35.65/pkg
4+ pkgs: \$31.45/pkg

Sable #37703

An improved early season berry with better size and excellent flavour. Bright red berries on vigorous plants. A great way to start the strawberry season!

1 pkg of 25 roots: \$31.95 • 2 pkgs: \$27.15/pkg
4+ pkgs: \$23.95/pkg

YUM & YUMMER!

Bob Gordon Elderberry #37811

Sambucus canadensis. Bigger, sweeter berries and lots of them! They are considered to be the best Elderberry cultivar available. 'Bob Gordon' consistently produces easy-to-harvest high yields. Berries ripen evenly, meaning you can easily harvest the entire cluster at once. Hardy to zone 3. We ship 8-12" plants.

1 pkg of 1 plant: \$51.95 • 2 pkgs: \$44.15/pkg
4+ pkgs: \$37.45/pkg

Trader Everbearing Mulberry #37817

VESEYS TOP PICK! Morus alba x rubra. There are so many things to love about 'Trader' Everbearing Mulberry! First, the tree itself is absolutely beautiful and can be grown as a trunk or multi-stemmed shrub. Big, glossy black fruit are present throughout the summer and are an irresistible blend of sweet and tart. Even the leaves are starting to be considered a super-food and can be made into a powerful healing tea. 'Trader' is winter hardy (Zone 3-4), vigorous, long-lived and disease and pest resistant. We ship 3.5" pot.

1 pkg of 1 plant: \$56.95 • 2 pkgs: \$48.40/pkg
4+ pkgs: \$42.70/pkg

Opal Plum **VESEYS TOP PICK!** #37818

Prunus spp. 'Opal' stands alone as the hardiest European type Plum available on the market. It is vigorous, productive and self-fertile. Even in short summer seasons, the fruit will reliably ripen. The plums are round, red-purple with a golden flesh and have a complex and sweet flavour, fresh or dried. Hardy to zone 3. We ship 18" trees. **Plum trees cannot be shipped to B.C.**

1 pkg of 1 tree: \$79.95 • 2 pkgs: \$67.95/pkg
4+ pkgs: \$59.95/pkg

Horseradish #37803

Armoracia rusticana. Easy-to-grow perennial. Horseradish is a widely-adapted, hardy perennial producing roots that can be ground or finely shredded to make wonderfully hot and sweet sauces and condiments. Horseradish root can be harvested in late fall or early spring - dig in the fall after a hard frost for a sweeter flavour, or before the plant leaves out in the spring for maximum pungency. Roots should be divided and replanted every 2 years to prevent them from becoming woody. Horseradish spreads easily so you may want to isolate it in your garden. Hardy to zone 3b. No.1 root.

1 pkg of 1 root: \$14.95 • 2 pkgs: \$12.70/pkg
4+ pkgs: \$11.20/pkg

Guelph Millennium Asparagus #37801

VESEYS TOP PICK! Asparagus officinalis. 'Guelph Millennium' is one of the best asparagus varieties in our trials with consistently high yields. These hardy male plants produce top quality spears ideal for both backyard gardens and commercial production. Rust tolerant. Hardy to zone 2. No.1 root.

1 pkg of 8 roots: \$20.95 • 3 pkgs: \$17.80/pkg
6 pkgs: \$15.70/pkg • 16 pkgs: \$13.60/pkg

SASKATOONS

Amelanchier alnifolia

Honeywood #37800

Amelanchier alnifolia. Great yields of juicy, blueberry-like fruits produced on very hardy bushes. This native shrub, also known as 'Service Berries', is very widely adapted but does best in well drained soil. 'Honeywood' is more compact than other varieties, usually staying under 8-9 feet tall, making it more suitable for back yard gardens. Excellent flavour, great for pies, jam or eating right off the bush. 1yr. old plant. 4" pot. Hardy to zone 2.

1 pkg of 1 plant: \$33.95 • 2 pkgs: \$28.85/pkg
4+ pkgs: \$25.45/pkg

Gardening Tools & Accessories

Glory Greenhouse

GLORY GREENHOUSES

Manifest your gardening dreams in the aptly named Glory Greenhouse. This is our top of the line offering complete with a 10-year warranty.

In a beautiful, classic design, this greenhouse kit is created for plants and the humans that care for them. Filled with features, these greenhouses have a wide entrance, high roof, and tall eaves for ample room to move around, plant your garden, and store your tools. The Glory greenhouse has a gray powder-coated aluminum frame and includes a galvanized steel base kit that adds even more height, structural support, and stability. Combined with the 10 mm high impact twin-wall polycarbonate panels, you have a greenhouse that is as resilient and functional as it is aesthetically pleasing.

Here are just a few of the Glory's remarkable features:

- Integrated interior and exterior anchoring systems included
- Side louvered window included as well as roof ventilation
- Highly resistant, reinforced, translucent, and safe polycarbonate greenhouse kit
- Entirely built with heavy-duty multi-wall glazing for controlled light exposure and heat insulation
- Reinforced, extra-thick non-rusting aluminum structure to withstand harsh weather conditions

As with all our greenhouses, we require that you construct a small deck platform that is 12" to 18" wider and longer than the greenhouse itself. This will provide a solid base to which you can secure the greenhouse frame and is a requirement of the warranty.

Deluxe 3 Tier Indoor SunLit® Garden

Deluxe 3 Tier Indoor SunLite® Gardens

If you've tried starting seed under standard fluorescent lights, you will be incredibly surprised as to how much better they grow in our indoor LED light gardens. Not only are the lights much brighter and appropriate for growing than standard fluorescent tubes, they are also incredibly easy to adjust up and down in order to keep the lights at just the right height above your plants.

This Deluxe 3-Tier SunLite Garden features our revolutionary LED lighting technology, creating the new gold standard for seed starting and indoor gardening. You'll be amazed at how well your plants grow as they bask in the glow of these specialized LEDs. The sleek and rugged frame holds three light fixtures that you can easily raise and lower to the perfect height for plants. Each ballast holds two 4' LED light tubes which are included. Includes three watertight plant trays and casters for easy moving. Frame and fixtures are made from lightweight, rustproof, powder-coated aluminum. Unit measures 174cm (68.5") H x 134cm (52.8") W x 37cm (14.6") D.

About our LEDs: Engineered LED light tubes specifically to meet the exacting needs of plants. They deliver full-spectrum light with an additional spike of blue light to stimulate stronger root growth and enhance photosynthesis. Long-lasting LED tubes won't shatter like glass bulbs and they're mercury-free, so unlike fluorescent bulbs there's no need for special disposal. LEDs are economical too, they use half the electricity and last 5x longer than fluorescent bulbs.

Please Note: These items may be shipped via Fed Ex Ground. We will require a street or civic address and a daytime phone number. Please include this information when placing your order. (Plants & pots shown in photo sold separately).

World Famous Veg Trug

World Famous Veg Trug

The classic Veg Trug brings the grow-your-own experience to gardeners regardless of means or space. It's the best of both worlds; the V-shape simultaneously allows for shallow and deep growth letting you grow absolutely anything, all at once and without wasting space. The raised height saves your back and gives those who need it easy-seated or wheelchair access. It's height also keeps the average garden pest away from your beloved plants. Constructed with 100% FSC certified wood and measuring 183 cm (L) x 80cm (H) x 76 cm (D), the V-shape and liner holds 420 liters of compost and allows for proper aeration and drainage of your root systems. Because of its unique and proven design, the Veg Trug results in stronger plants, thicker growth, healthier crops, and unbeatable fresh flavour. For further information including recommended planting plan-o-grams and video, go to www.veseys.com/vegtrug

Ladbrooke Soil Blockers

A family run business in Great Britain, Ladbrooke Soil Blockers is led by three sisters - Ali, Roo and Vicky. Working closely with their team, the sisters work together to design, build and package each and every one of these remarkable handmade gardening tools; the concept and design of which was passed down from the inventor himself, Mike Ladbrooke.

For years we have been asked by our many customers to source a high quality and dependable soil blocker. While we have passed over several cheap imitations, we have finally gone to the original source to provide you the best that money can buy.

The Micro 20 is the ultimate hand-held seedling starting block, making twenty 2cm compost blocks at a time. Seedlings started in the Micro 20 can be transplanted into the Mini 4 when using the cube inserts.

The Mini 4 is the most versatile of the blockers. It produces four 5cm blocks. Cube Inserts may be fitted to leave indentations for transplanting Micro 20 blocks. Dowel Pins can also be fitted for cuttings and larger seeds. Please note that Seed Pins are included with this product, but Cube Inserts and Dowel Pins need to be purchased separately if required.

89292 Micro 20 Soil Blocker\$49.95
89293 Mini 4 Soil Blocker\$59.95

Mini 4 Soil Blocker accessories:

89294 Cube Inserts (pack of 4)\$9.95
89295 Seed Pins (pack of 4)\$6.95
89296 Dowel Pins (pack of 4)\$6.95

Cube Inserts: when fitted into the Mini 4 Soil Blocker, are used to make a square indentation to accommodate seedlings started in the Micro 20 Blocker. Creating the ideal potting on system, eliminating root shock.

Seed Pins: are used to make an indentation in your cube for small and medium sized seed.

Dowel Pins: can be used in the Mini 4 to create deeper indentations suitable for larger seeds and cuttings.

Professional 84 Cell Trays

Professional 84 Cell Trays

Seed-In Soil Digger

Seed-In Soil Digger

The patent-pending Seed-In soil digger is the first hand-held garden tool of its kind. This new tool allows gardeners to simultaneously create seventeen evenly-spaced holes in the soil for planting seeds and seedlings. Use every hole for growing crops like spinach, arugula, carrots, scallions, peas, and bok choy, or space more widely using every second or third hole for growing beets, onions, broccoli, radishes, lettuce, and more! With the Seed-In soil digger, there is no need to measure the distance between each seed hole or dig each one individually. This means that gardeners can grow perfectly-spaced plants with significantly less time and effort! This one-of-a-kind garden tool makes a perfect gift for any gardener!

89223\$26.95

Mini Hand Seeder

Ideal for planting carrot seed! Especially useful for the home gardener. Save time and seed, thinning and transplanting. Instantly adjustable to any size of seed.

81780\$4.95

Watering Tray with Capillary Matting

Watering Tray with Capillary Matting

Made from recycled and recyclable plastic. Tray holds 1/2 gallon of water. Use with capillary matting to water plants while on holiday.

Tray measures 55cm (21 3/4") L; 31cm (12 1/4") W; 3cm (1 1/4") H

24 Hole Soil Digger

24 Hole Soil Digger

The 24 Hole Soil Digger is an innovative garden tool that allows gardeners to create perfect planting holes in standard 72-cell seed starting trays. The tool can also be used in the garden to stamp 24 holes in the soil for direct sowing of seeds. Use every hole for planting spinach, arugula, carrots, etc., or skip a hole for plants that will need more room later on. Makes perfectly shaped and even depth impressions in your planting trays or garden; it makes seed sowing so much easier and far more accurate. Constructed from indestructible nylon.

89263\$39.95

Seeding Square

Seeding Square

From new gardeners to seasoned Pros, the Seeding Square is a must have tool for small scale vegetable gardening. This clever device optimizes your garden plot for the highest yield in the smallest space. Planting can be done in rows or by the square foot and reduces the number of weeds and makes them easy to spot. Colour coded, the Seeding Square provides perfect spacing for your seeds and makes planting both fun and easy. *As seen on Dragon's Den.*

88127\$39.95

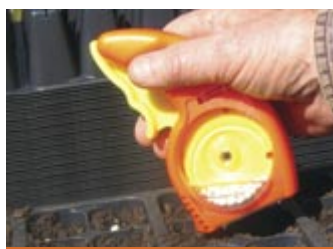

Seedmaster Vibrating Hand Seeder

Uses a built-in manual vibration mechanism to sow seeds evenly and quickly. Four interchangeable baffles allow for precise sowing of a wide range of seed types.

89199\$10.95

Vibrating Hand Seeder

Precision Handheld Seeder

SOWEZ Precision Handheld Seeder

This trigger activated seeder brings field proven seed disc technology into the realm of handheld seeders. The trigger actuated seed disc oscillates rather than rotating continuously in one direction and this has allowed us to put four different size seed cups on one seed disc. The seeder is capable of planting all pelleted seeds and many non-pelleted seeds into planting trays, soil blocks, raised beds, etc. The different seed cups are changed by turning a knob on the back of the seeder. The seeder is built of tough, UV resistant ABS with a clear polycarbonate hopper.

85167\$39.95

Jiffy Pots

Jiffy Pots

Achieve earlier maturity and heavier yields! A pot wall of compressed peat is a nearly perfect environment for root development and there is little chance for transplanting set-backs when plants are set in the garden. Jiffy pots are also very convenient and easy to handle. Available in round or square, from 2 inches to 3½ inches in diameter.

SIZE CODE:		N50	2 OR MORE	4 OR MORE	CASE

Eco-Friendly Cow Pots

An environmentally friendly product which uses dried, composted cow manure mixed with natural fibers and pressed into pots. The beauty of this product is that it's odourless, free from weed seeds and when transplanted in the ground, dissolves within weeks while delivering valuable organic nutrients to your soil. When being used in the greenhouse or indoors they will last for months while increasing plant health and eliminating the normal waste associated with plastic pots. By transplanting the entire pot and contents in your garden, plant shock is greatly reduced. Sold in packages of 12.

85663N12	3" Square CowPots (1 pkg of 12)	\$11.95
	3 or more	\$9.85
85664N12	4" Square CowPots (1 pkg of 12)	\$12.95

All Natural Wooden Stakes

Each year our gardeners have been purchasing tens of thousand of garden stakes for their beds. In recent seasons you have been requesting a change from our traditional Yellow Painted Stakes to something a little more natural. In response to these requests we continue to offer all our regular sizes but are pleased to have found a much smoother, stronger and all natural replacement. Available in 5", 10" and 12" lengths.

Coloured Garden Markers

Recycled plastic garden markers in 4" and 5" lengths. Package contains 10 each of 5 colours (red, orange, yellow, blue and pink).

Plastic Garden Markers

White recycled plastic stakes in sizes ranging from 4 to 8 inches long. These stakes are easy to mark on and the best thing about them is that they are reusable year after year.

ALL PLASTIC MARKERS & STAKES ARE MADE FROM 90% RECYCLED CONSUMER PLASTIC

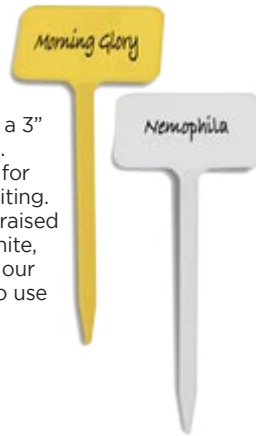

T-Label Plant Stakes

Rigid recycled plastic plant labels, 6" in height, with a 2" wide flat surface to write on. Ideal for seed trays or pots. Available in white, yellow or black. See our white pen (below) to use with black stakes.

Angled Head Plant Stakes

Rigid 7" recycled plastic markers with a 3" wide writing surface. Angled head makes for easy reading and writing. Ideal for displays or raised beds. Available in white, yellow or black. See our white pen (below) to use with black stakes.

Waterproof Garden Marker

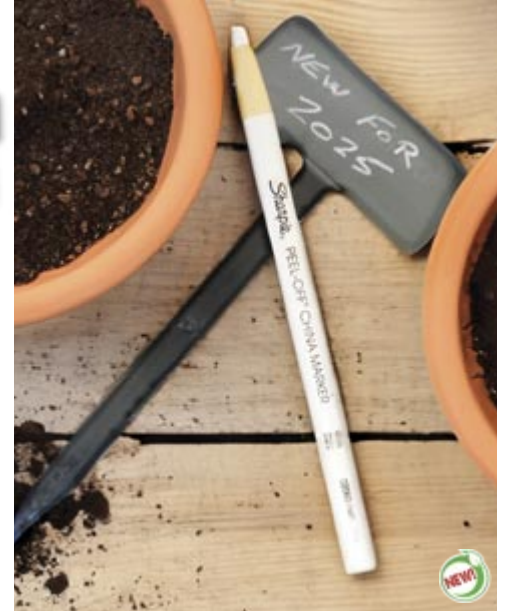

Our new Garden Markers are specifically designed to work in combination with our plastic signs and stakes. When used together they provide a permanent and distinctive look. Makes a great 'blackboard and chalk' look on our new black plant stakes sold above.

- 86042 White Waterproof Marker..... \$9.95 each
- 86043 Black Waterproof Marker..... \$9.95 each

Sharpie Black Marker (Fine)

Permanent Black Marker for use with Vesey's gardening stakes.

- 81313 \$2.95 each

China Marker

NEW! The perfect marker for glass, metal, china and especially great for plastic plant markers, it's commonly known as a grease pencil. Fadeproof and moisture resistant it's easy to remove your markings when desired. An inexpensive solution to having your notations last longer. String pull for sharpening.

- 89339 White China Marker\$2.95
- 89340 Black China Marker\$2.95

To be used with white Waterproof Garden Marker (86042 - see below)

Black T-label Plant Stakes

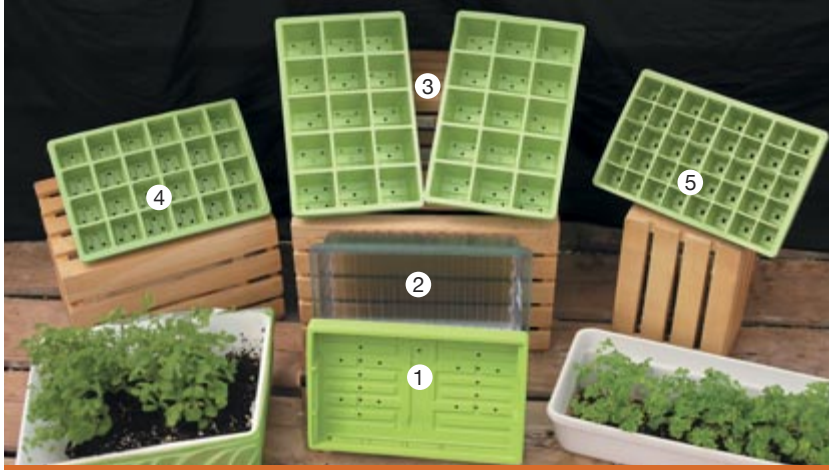

Black T-label Plant Stakes

Rigid black plastic plant labels, 6" H, 2" W.

Black Angled Head Plant Stakes

Rigid 7" black plastic markers with a 3" wide writing surface. Angled head makes for easy reading and writing.

Darlac Expert Pruner

The name says it all! A top of the range ergonomically designed pruner of exceptional quality. Unlike most pruners with a large cut capacity, this one has slim profile handles offering greater comfort even for small hands. Drop forged for strength and durability, the extra deep sap groove is excellent and SK5 carbon steel blade provides for a razor-sharp edge. Compare the 'other' industry leading brand at almost twice the price. (award winning pruner)

89117\$59.95

Darlac Compact Pruner

A lightweight bypass action pruner for general pruning, it's small enough to fit in your pocket yet as strong as larger equivalents. Great for fine or delicate pruning and flower arranging. Comfortable non-slip grip. Made from high carbon Japanese tool steel, the precision ground blade is hard chrome plated for rust resistance. Simple and effective safety catch.

89119\$32.95

Darlac Professional Pruner

Featuring an aluminum body and a precision ground blade, the handle on the Professional Pruner is slim enough for almost any sized hand. The high carbon steel blade is easily sharpened and can be adjusted to the finest tension for ultimate performance. An added bonus is that it's coated for clean cutting and rust resistance. (award winning pruner).

89118\$36.95

Mower Blade & Tool Sharpener

Lawn Mower Blade & Tool Sharpener

High quality Corundum, angled grinding wheel produces sharp new cutting edges on rotary mower blades, to the correct angle, in minutes. Wheel is reversible to

give around 10 sharpens of a rotary mower blade. Fits any power drill. Instructions with product show how to easily maintain blade balance.

88053\$13.95

Darlac Folding Saw

Darlac Folding Saw

Definitely a handy tool to have on hand when pruning diameters have outgrown your secateurs. This saw has a unique tooth pattern that glides through wet or dry wood creating an ultra clean finish cut. Ideal for gardening or camping, it cuts through wood without clogging. Blade locks in both open and closed positions and is suitable for right or left-handed use. Cuts on the backstroke with very little pressure (a multi award winning tool). 9" length.

89120\$39.95

Secateur & Lopper Sharpener

Secateur & Lopper Sharpener

Sharpens secateurs, pruners, loppers, tree pruners and pruning knives - curved or straight edge blades. Four angle grinding jig ensures sharpening to the correct angle for your tool. Abrasive stone last for years.

88055\$13.95

Weedcomb

Weedcomb Weeder/Cultivator

NEW! Constructed with alloy steel, the Weedcomb weeder/cultivator is built to last, ensuring durability and long-lasting use with its extremely comfortable grip. Featuring an ergonomic handle with a rubber grip, this handheld rake literally combs out the weeds and provides a secure grip which reduces hand fatigue. The unique design of the Weedcomb helps to easily and effectively remove weeds in a wide range of sizes and thicknesses, making yard work less of a chore.

89327\$29.95

Shear & Scissor Sharpener

Garden Tool Sharpening Kit

Sharpens all types of metal rotary mower blades, tree pruners, loppers, shears, secateurs - straight & curved cutting edges; regular and long-handled shears. 84015\$23.95

The Pad • The Super Cushy Pad

The Pad & The Super Cushy Pad

NEW! When we first discovered these incredible pads at an international gardening show this year, we knew immediately we had to offer such an amazing product to our customer base. There are so many features to these very special pads there's almost too many to mention. The material acts in a similar fashion to Memory Foam. They do not absorb water keeping you dry. They will float in water for easy retrieval (although they are not a floatation device), and act as a barrier/insulator between you and a hard surface. Washable, they are industrial chemical, oil, & grease resistant. Great for any hard surface, they are constructed of Premium NBR foam (Negligible volatile organic compounds). Light weight, will not mold/mildew if stored wet and feature a convenient carry handle. Made from 20% recycled material. 38 cm x 51 cm.

89291 The Super Cushy Pad - 5cm**\$39.95**

High Wheel Cultivator

High Wheel Cultivator

Our customers with larger home or market gardens absolutely love this cultivator from Earthway. With very little effort, you can make furrows or weed rows and can cover a large area very quickly. Made from heavy-duty tubular steel and a 24" steel wheel for easy handling in rough terrain. Comes with 3 standard, easy-to-switch tools: a 5-tine cultivator, a moldboard plow and a twin-end furrow plow. One of the most useful garden tools you'll ever buy!

Giant Scare Eye Balloons

Giant Scare Eye Balloons

The answer to the control of pest birds! When hung from trees or long poles, these balloons repel birds with their bright colour and design. Weaving motion and streamers simulate a live predator bird which frightens other birds immediately. Also available in a pre-packaged collection containing 1 each of white, yellow and black. 16" diameter.

- 85512 Yellow Scare Eyes\$17.95 ea.
- 85000 1 ea. of 3 colours\$39.95

Safer's Garden Sulphur

Effective contact fungicide. Controls powdery mildew, rust, black spot, scab and mites in the home and garden. May be used up to one day before harvest. Active ingredient 92% Sulphur.

- 85435 300g Dust...\$17.95

Bird X Irri-Tape

Irri-Tape is designed to utilize sight and sound to scare birds away from an affected area. The iridescent material shimmers and shines in the sunlight, disorienting and confusing any bird that catches a glimpse. Also creates a metallic noise as it flaps in the wind, adding a threatening sound to keep pest birds away.

- 80321 25' roll..... \$21.95

Garden Defense Owl

It's all in the eyes! Measuring 16" in height, the Garden Defense Owl has long been a favourite for gardeners and homeowners wishing to keep bird pests from their window ledges, fruit trees and crops. This realistic recreation of one of nature's best known predators can be filled with sand for extra weight or attached to a ledge, shelf or roof. The brightly coloured eyes look so real that birds will give this creature a very wide berth.

- 85001..... \$54.95

Eco-Way King Bug Killer

A ready-to-use dust for use on vegetables, small fruit, flowers and ornamentals for control of crawling insects such as Caterpillars, Colorado Potato Beetles, Earwigs, Ants etc. Most effective when applied directly on the insect. May be applied up to day of harvest.

- 88091 300g\$25.95
- 88092 750g\$42.95

Diatomaceous Earth

Mined and then ground into a powder-like consistency, gardeners have found this organic product very helpful in warding off insects such as earwigs, ants, slugs, etc. The sharp edges cut soft bodied insects, and then absorb the insect body fluids. Approved for use in certified organic operations. Comes in a handy plastic shaker container.

- 85896 200g.....\$14.95

Chicken Wire Crop Coop

Chicken Wire Crop Coop

Crop Coop is made from heavy-gauge wire so it will hold its shape season after season. Still, it's lightweight enough so that it's easy to install and even easier to remove when you need to tend or harvest. Keep bunnies, deer and other hungry critters from ruining your garden with minimum fuss. Want to cover multiple plants at once? This innovative cage covers an entire 2' x 4' bed and the clever design can accommodate plants of varying heights. Add a second to span any of our 8' cedar beds or elevated cedar planter boxes. Low carbon steel. 22" W x 45" L 28" H at the peak, walls are 16" H.

Floating Row Covers

Floating Row Covers

Floating row covers are the ideal solution for holding in warmth and moisture for faster germination, earlier harvests, higher yields and reduced frost damage. They let water, air and sun through and are lightweight, so support hoops are not necessary. They are also essential in preventing insects and other pests from damaging crops. The lightweight Ag-19 provides up to 39°F frost protection and has an 85% light transmission. The medium weight Ag-30 provides up to 6°C frost protection and has a 70% light transmission.

Dalen Better Reds Mulch Film

Dalen Better Reds Mulch Film (3' x 24')

Dalen Better Reds Mulch Film is a durable plastic which lays well over flat or raised beds. Studies have shown that 'red' enhances growth and yields of crops such as tomatoes and strawberries. Red mulch reflects intensified red light to developing plants which increases their photosynthetic capacity. This mulch has season-long integrity and is easily removed from the field after harvest. Also warms the soil and controls weeds.

- 89209** 3 ft. x 24 ft. **\$19.95**

Bio Mulch

Bio Mulch

Our new Bio Mulch film stops weeds, warms the soil and reduces water evaporation. This mulch will produce superior results while respecting the environment. The Compostable & Biodegradable BioTelo Mulch Film, made of Mater-Bi, a corn starch based raw material, is compostable and biodegradable. It leaves no toxic residues in the ground and you save on removal, recycling and land fill costs.

- 83200** Bio Mulch 48" x 200' **\$89.95***

Earth Staples

VESEYS EXCLUSIVE!

For ground cover protection we recommend either our 6" Earth Staples while our 10" version is best used to anchor any of our many vegetable cages, protecting them against wind or any leaning that may occur due to the weight of the crop. Each package contains heavy duty staples that can be reused year after year.

- 80209** 6" Earth Staples (pkg of 15) **\$14.95**

Textile Mulching Canvas

Textile Mulching Canvas

Preventing weed growth and gully erosion, the Velitex Mulching Canvas is the perfect choice for the home gardener and landscaper. Measuring 1 1/4m wide x 10m in length, this long-life woven canvas inhibits weed growth, saves bed cleaning and is permeable to water and air. Can also be used under a layer of gravel in pathways. 5 year UV stability.

- 83610** **\$23.95**

Titan Squash Tunnel

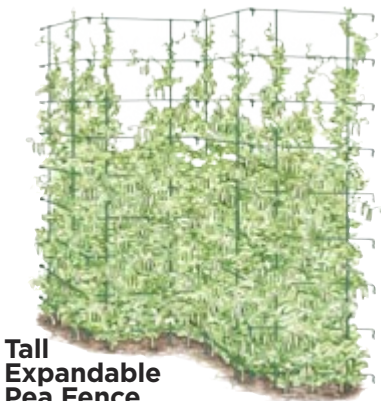

Here's one of the best and most creative ways we've seen to grow these sprawling plants — with a strong arched structure that gets plants up off the ground where they can produce clean, perfectly formed fruits. As the plants flourish, they form a delightful leafy tunnel that's a perfect play space for kids or a shady area for growing salad greens. Holds up to 70 lbs. Disassembles easily into a small bundle for off-season storage. Polyethylene-coated steel tubing, nylon netting. 63"L x 80"H. Width at base is 65"

89039.....\$149.95*
*additional freight \$19

Titan Pea Tunnel

The Titan Pea Tunnel has the strength and stability to support the most robust vines, and it puts pods within reach for the easiest harvest ever. Better yet, the polyethylene-coated steel frame and strong nylon netting are unfazed by the elements, and will last for years. Innovative clip system creates a rigid framing system that supports a heavy crop. You can even use the shady space inside the tunnel to grow tender greens. Dimensions: 72" L x 14" W x 71" H.

Garden Row Snip-n-Drip

Apply water just where you want it — and not where you don't. You can customize this convenient soaker hose system to suit your vegetable garden or any garden planted in rows. No special tools required — just use scissors to cut the hoses to the sizes you need. Snap the fittings in place and you're ready to water. The weeping action of soaker hoses delivers water right to the roots, with minimal loss due to evaporation and runoff. Soaker hoses use up to 80% less water than sprinklers! We recommend our Earth Staples, sold separately, to hold soaker hoses in place. Easily create a customized watering system for rows of plants. Kit includes everything you need! Water up to four 25' rows. Set it up in less than an hour, and then leave it in place for easy watering all season long.

88031\$129.95

To see all available Snip 'n Drip parts and accessories, please scan the following QR code:

Lifetime Sprinkler

Lifetime Sprinkler

Many sprinklers can barely make it through a single season because of their inexpensive plastic components so we know that you'll appreciate these lifetime sprinklers made of coated steel and solid brass. Spiked base has a foot tread to make placement easy. Choose the short model or the 5 foot Hi-Rise model to reach over plants. Both water a 30 foot circle.

Galvanized Herb Planters and Tray

Galvanized Herb Planters and Tray

Harkening back to the days of the family farmhouse, those memories make this charming tray-and-planters set so unique and appealing. Each of the charming little pots makes a perfect home for herbs, succulents or sprouts, while the rectangular tray keeps them attractively corralled and easily transportable. You could split up the set and grow microgreens or mini cacti in the versatile tray. All pots and the tray itself each have drainage holes with plug. With use, plants and tray will develop a rustic patina that only adds to their charm. Set includes tray and 5 pots.

Tray is 21" L x 4 1/2" W x 2" H. Pots are 4" in diameter

89134**\$53.95**

Demeter Mobile Plant Cart

The planter box sits at a comfortable working height, making it easy to tend and your plants. Made from sturdy yet lightweight, powder-coated steel. A shelf holds accessories. 45 1/2" L x 14" W x 32" H. Holds 50 quarts of potting mix.

The Worm Café

The Worm Café

Interest in vermicomposting has grown by leaps and bounds since we first introduced the hobby; we are now introducing the absolute best new composter available today. The Worm Café is a stylish and functional addition to any patio or garden. Made from 100% recycled and UV stabilized plastic, it features a hinged and fly-proof lid with stylized legs and built in ant protection. Worms recycle your leftover food scraps into a dark, soil-like material with a pleasant earthy smell - known as worm castings. They also produce a liquid worm tea which is a great additive for gardens that provides exceptional colour, quality and quantity of fruit, vegetables, flowers and ornamental plants. Included with the Worm Café is a drip free tap and a bedding block to get you started. Fully assembled unit features 3 working trays and measures 29 1/2" H x 22 1/2" L x 15.4" W.

Rotary Compost Sifter

Rotary Compost Sifter

Not everything decomposes at the same pace, and it can be a pain waiting around for your compost to be perfect. Worse, is spreading your compost and still finding a whole avocado or banana peels in it! This sifter solves the problem. Simply add your compost, crank the handle, and watch the best of the best filter out, ready to nourish your garden; the Easy-Turn Handle delivers perfectly sifted Compost every time. The anodized stainless-steel gears will stay smooth for years to come and they keep the blade rotating easily. The ergonomic ball handle makes it easy to push through heavy, chunky compost. Includes ground spikes to secure unit to the ground or work surface. Use over a tub or cart to collect your compost for dispersal later or keep it mobile and sift compost directly in the garden where you want it. 11" x 20" x 22"

ECO Bee Nester

ECO Bee Nester

The eco-friendly Eco Bee Nester is our latest addition to our wildlife collection, and it is designed to attract and care for solitary bees in your garden. The Bee Nester is made for Mason Bees and Leaf Cutter Bees, who will use the tubes to lay their eggs each spring and summer, closing up the tubes with either mud or leaves. It is designed and made from natural, environmentally friendly materials, making it kind to nature and for nature. The Eco Nester is formed from natural plant fibres with almost zero waste pollution during production. The pretty colour blends into flower patches and gardens, and the rustic hanging string is durable and long-lasting. The internal nesting tubes can be replaced yearly, making this a long-term investment for your local bees.

Dragonfly Wingman

Dragonfly Wingman

NEW! The new Dragonfly Wingman Repellent is a chemical free alternative to keeping horse flies, deer flies, and other flying pests away from you. Perfect to use while working in the garden, canoeing your favourite stream, or even walking 18 holes of golf. While attached to your hat the Dragonfly Wingman appears to be a real dragonfly in flight scaring off many flying insects. Simply clip it to your hat, backpack, or stroller. It does work best positioned above your head. Our horticulture team are using them with great success in the Veseys field trials. Colours vary, random colour will be shipped.

Garlic Lover's Paradise

Allium sativum. Fall planted garlic, or hardneck garlic, is easy to grow and produces super large cloves that surround a central stem. Unlike the soft neck garlic, that produces smaller and smaller cloves as you get closer to the center. Plant them in mid-fall, several weeks before freezing. In late summer, your garlic will be ready to harvest. HT 8-24" |  

Music

Big cloves with bold flavour. A hardneck, porcelain garlic with white parchment skin and a slight blush of pink. 4-6 large cloves/head. Hardy and stores well.
